Enclosed Price List

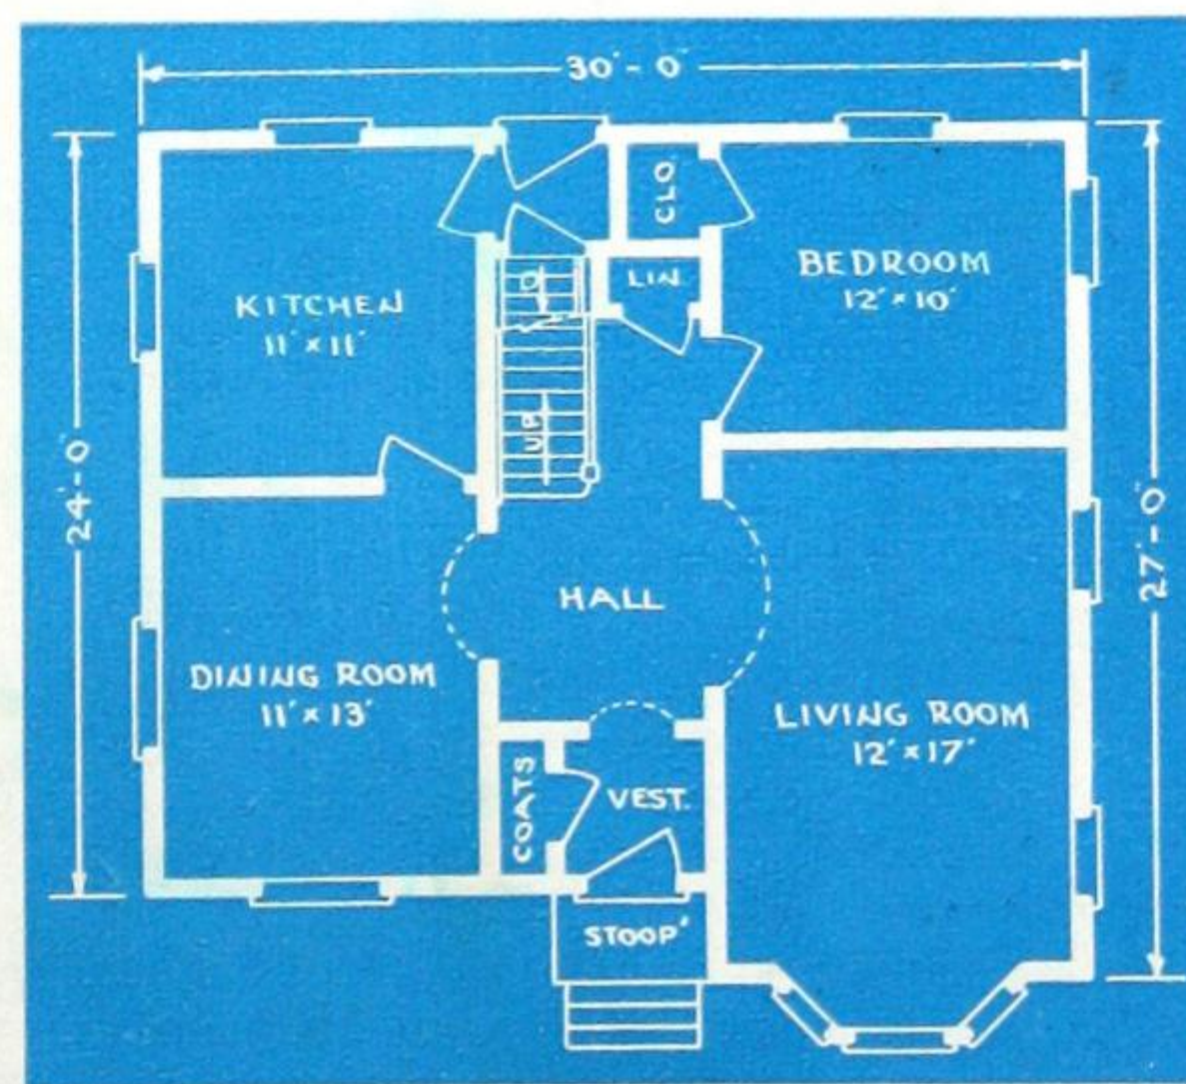

The Sherwood

We Pay
The Freight

THE SHERWOOD combines an exceptionally attractive exterior appearance with interior spaciousness usually found only in homes costing much more to build. Plan No. 1 has all rooms on one floor, there are no rooms upstairs. Plan No. 2 has living room, dining room, kitchen and bedroom downstairs with two fine bedrooms and bathroom upstairs. In Plan No. 2 double windows are placed in the gables instead of vents as shown in the illustration above to provide ample light and ventilation in the upstairs bedrooms. A dormer in the roof at the rear provides full headroom for the stairs and bathroom.

METHOD OF BUNDLING & SHIPPING
READI CUT HOUSES

Where the Saving Comes In

FIRST — Machine cutting at the Mill and quantity production in large volume costs so much less than hand cutting on the job, and it's more accurate.

SECOND — You buy the lumber and mill-work at wholesale price and get the very highest grade of dry material at a lower price than you pay locally for just ordinary lumber.

THIRD — Cost of erection is just about one-third less. An Aladdin Home can be built so much more quickly. Hundreds have been built without skilled carpenters as there is practically no sawing or cutting of lumber to be done on the job.

FOURTH — You pay only for the material required to build your home and there is no waste. We guarantee ample quantity of each item.

FIFTH — All hardware, paint, glass, nails, etc., are supplied at wholesale costs, and are guaranteed to be first class quality in every respect.

IN BUILDING an Aladdin Home, you make a large saving in the cost of erection. The part of the work that is the hardest and takes the most time, the measuring, sawing and dressing, is all done at our Mill in the most efficient manner and with absolute accuracy. We cut the lumber to exact size required with modern high speed machinery and can do immensely better work at a much lower cost than hand labour.

With large production and modern factory manufacturing methods, we effect a saving for you on all items entering into the construction of your home.

THE ALADDIN READI-CUT SYSTEM Does Away with the Waste Pile Saves 30% Time and Cost of Erection

Not a piece of lumber is wasted in building an Aladdin Home. You pay only for the material actually used in the construction. Our efficient methods mean a saving of many dollars to you. You have seen the waste pile around homes built with lumber cut by hand. Wasted lumber costs just as much as lumber actually used. All this is eliminated with Aladdin Homes.

You save in cost of erection because it takes very much less time to build an Aladdin Home with all the figuring, measuring, and sawing eliminated. Why waste time and money in doing things by hand which can be done much more quickly and cheaply by machinery.

Aladdin Readi-Cut Homes are not a new idea. Thousands of them have been built throughout Canada during the past thirty-three years with the greatest satisfaction. Quantity production results in the same saving in building homes as it does in manufacturing any other product.

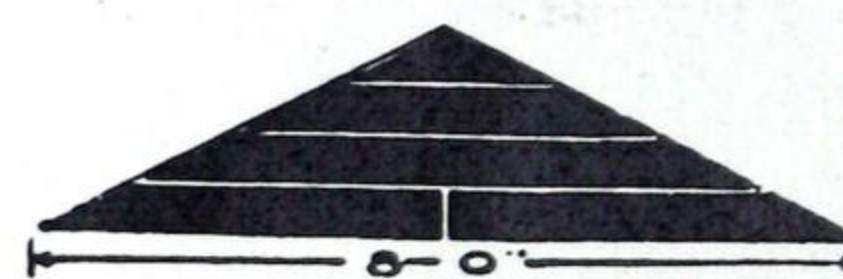

You know in advance what the materials will cost, you know there will be no shortage, you know that there will be no waste and you know that your home will be built at a minimum cost. Buying an Aladdin Home is the safest, easiest and wisest way to obtain your new home.

The fact that the length is marked on each piece, all pieces of the same length are interchangeable, and the various items bundled and marked, means that it is the

matter of only a moment to lay your hand on each piece as required and to nail it into position. You save all the time otherwise required for measuring, marking, cutting and fitting each piece by hand.

CUTTING THE "CUTTING COSTS"

We illustrate below one of the many minor economies which become possible in mills such as ours which are day after day repeating the same operations. It is natural that each workman should become an expert in his own particular duty, with the result that he discovers short cuts, and develops simple methods for the saving of time and material.

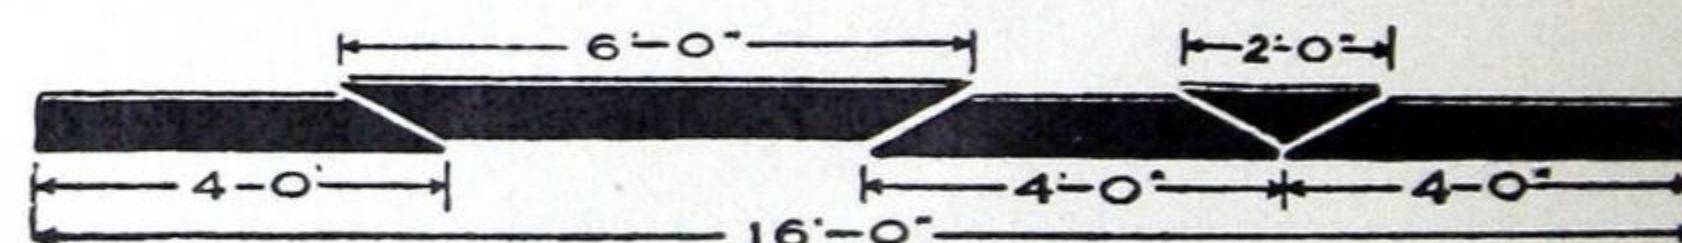

FOR EXAMPLE — TWENTY FEET OF LUMBER FROM A SIXTEEN-FOOT BOARD—HOW IT IS DONE

To cut the sheathing for this gable, the carpenter usually takes an eight-foot board, a six-foot board, a four-

foot board and a two-foot board and cuts them this way:

The carpenter requires twenty feet of lumber for the job. We take a sixteen-foot board and cut it this way:

and get twenty feet of lumber at the cost of sixteen feet—and YOU get the saving.

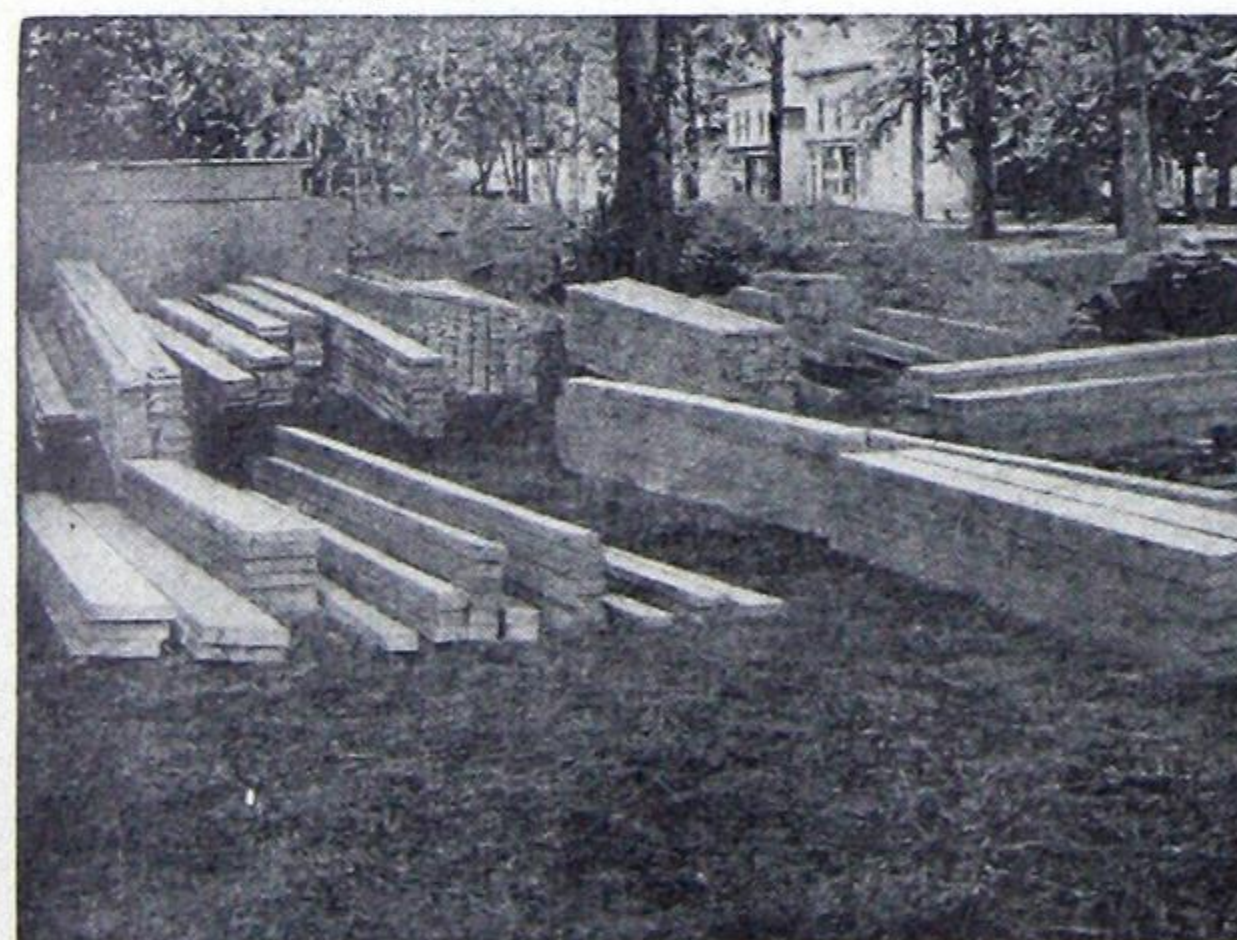

ALADDIN HOMES LEAD IN QUALITY, CONSTRUCTION AND VALUE

Aladdin Homes are exactly the kind of homes that would be erected by the best and most experienced builder. They are not portable or sectional in any way and are the equal of the most soundly constructed homes anywhere. The only difference is the saving in cost of material and erection, the elimination of all dealer's profit and your assurance of unsurpassed quality.

All the Planning—all the Cutting—all the Experimenting and a large part of the work of Building your home has been done before we ship the materials.

Thousands of enthusiastic owners of Aladdin Homes throughout Canada are firmly convinced that they have built the finest homes at a large saving over the old-fashioned method that is wasteful of materials and labour. What we have done for so many others, we can do for you.

Aladdin Homes are expertly designed and every piece of material is of adequate size and strength for the use to which it is put. No matter what you pay, you cannot have a home more solidly and substantially built or of better materials than an Aladdin Home.

The Simple Plan of Laying Out Material on the Site

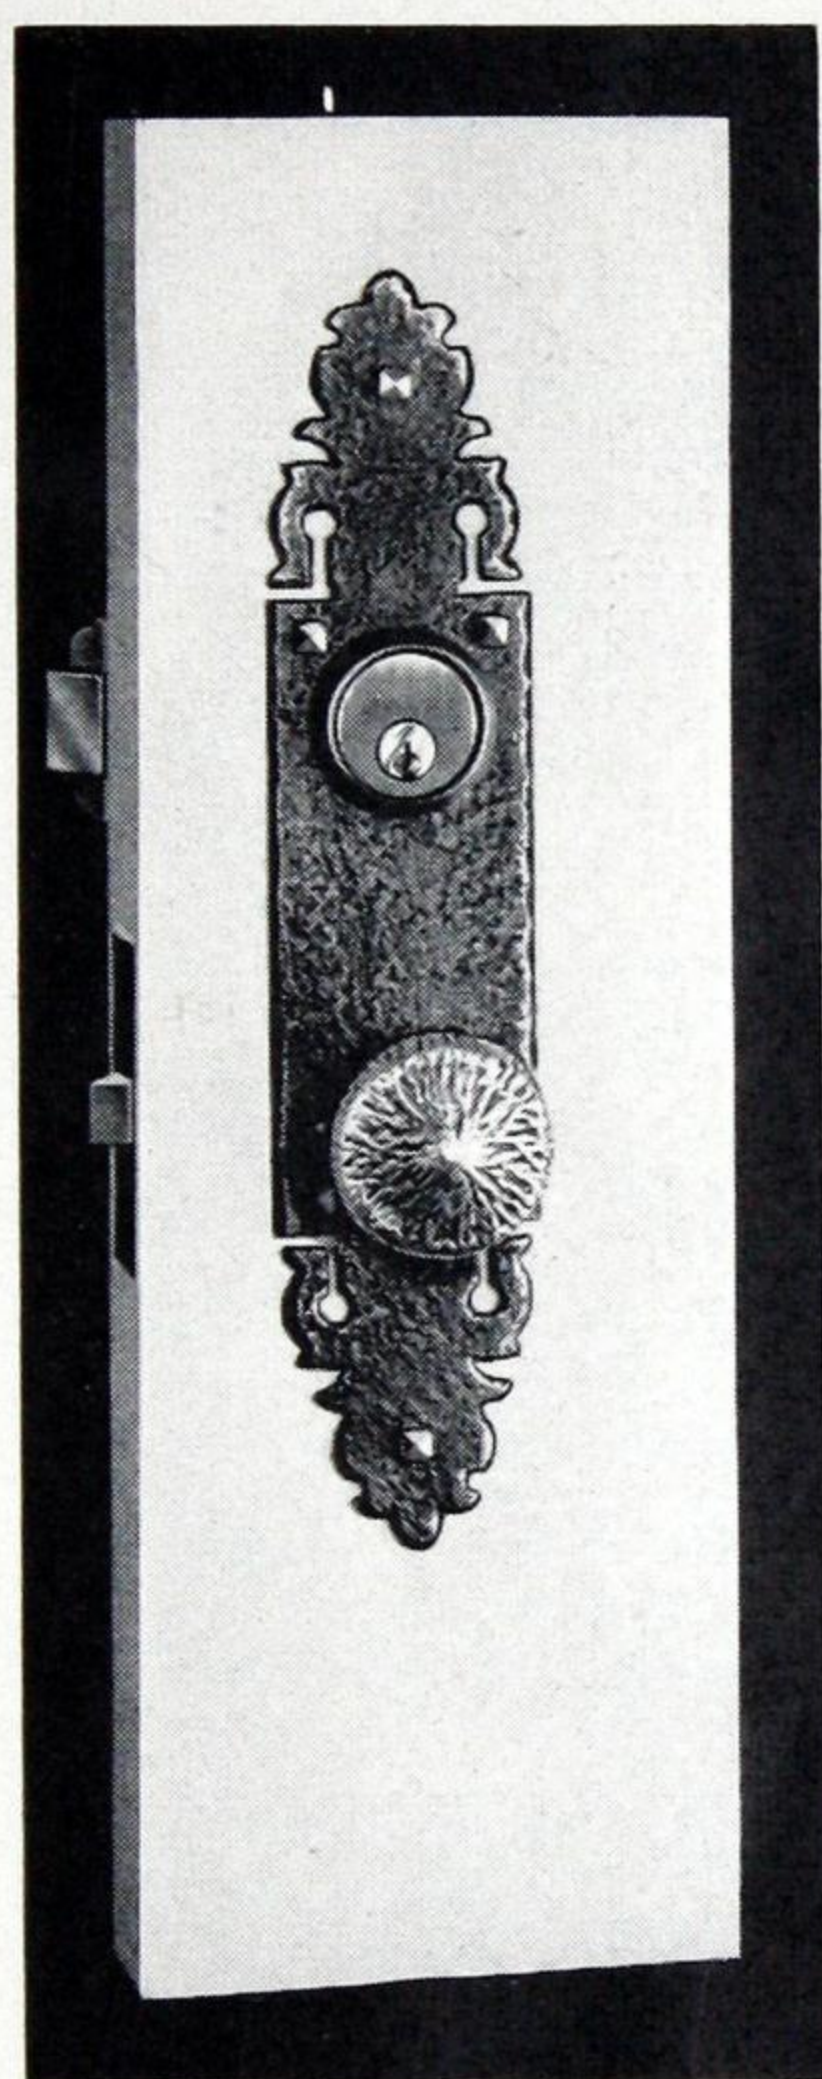

Finest Hardware for Aladdin Homes

All Hardware down to the Smallest Nail and Hinge is Included with Your Aladdin Home

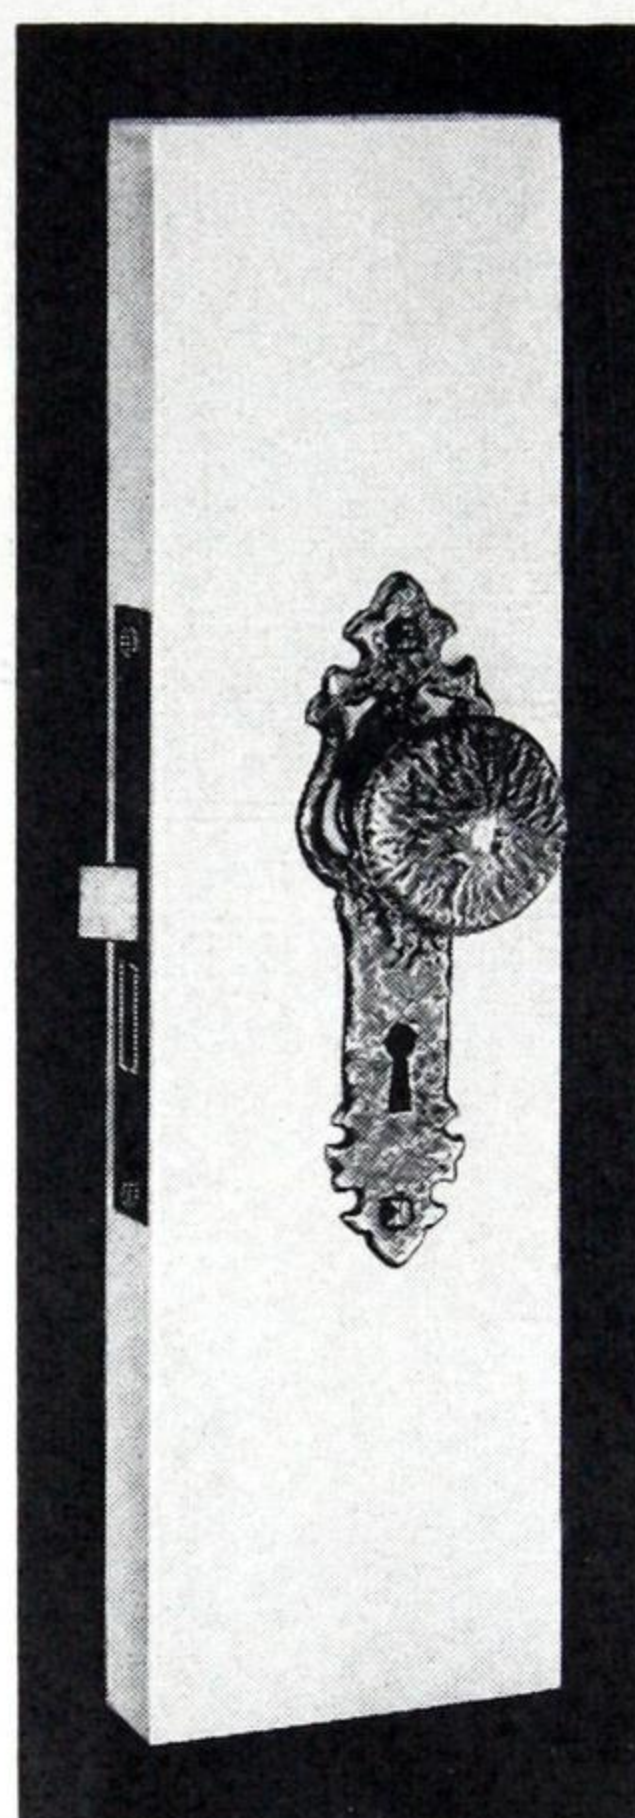

FRONT DOOR SET

The modern attractive Front Door Set supplied for Aladdin Homes is illustrated above. It is absolutely rustproof and will last a lifetime. The sturdy cylinder lock provides absolute security.

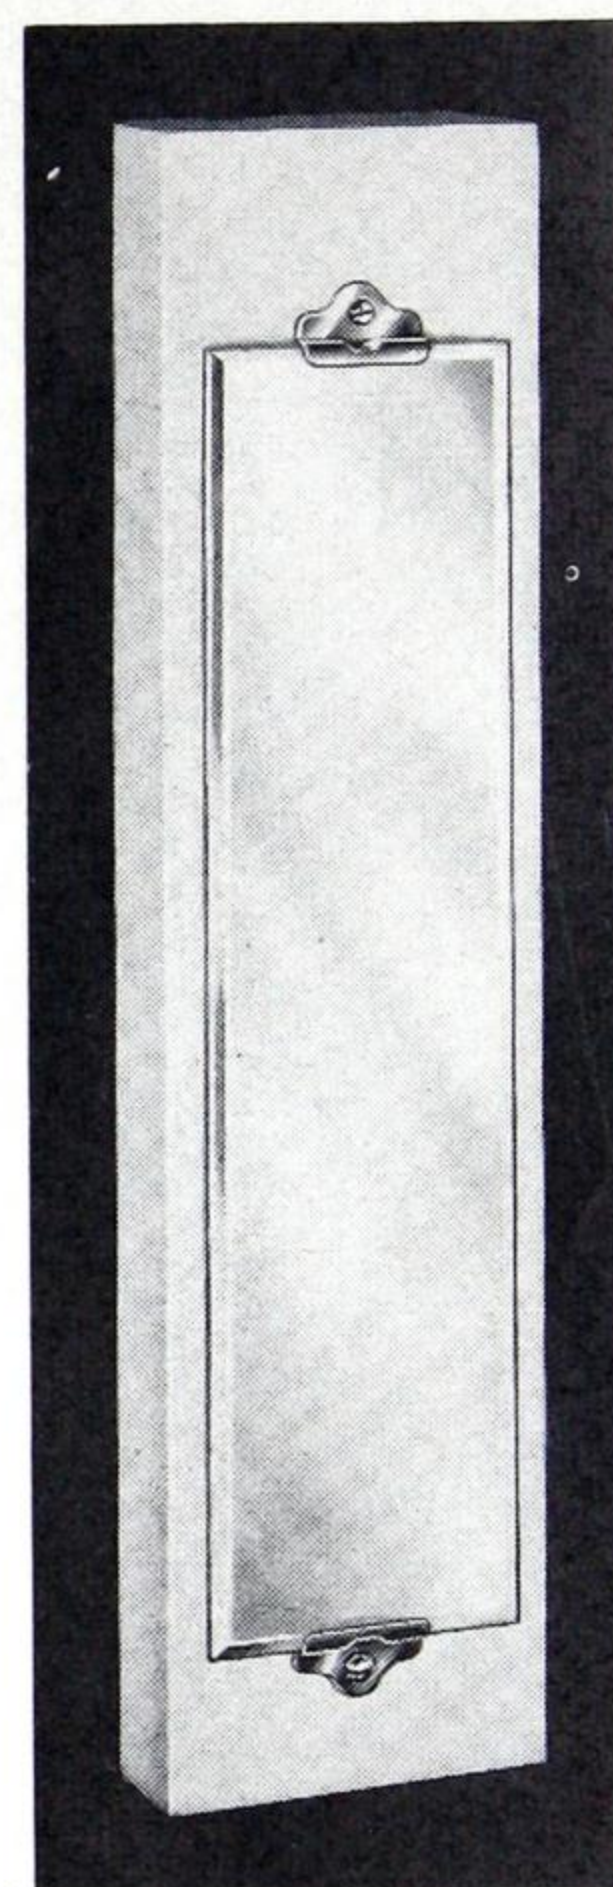

REAR DOOR SET

The Rear Door Set supplied matches the Front Door Set and is of the same high quality. It is equipped with night latch and cylinder lock for complete protection.

INTERIOR DOOR SETS

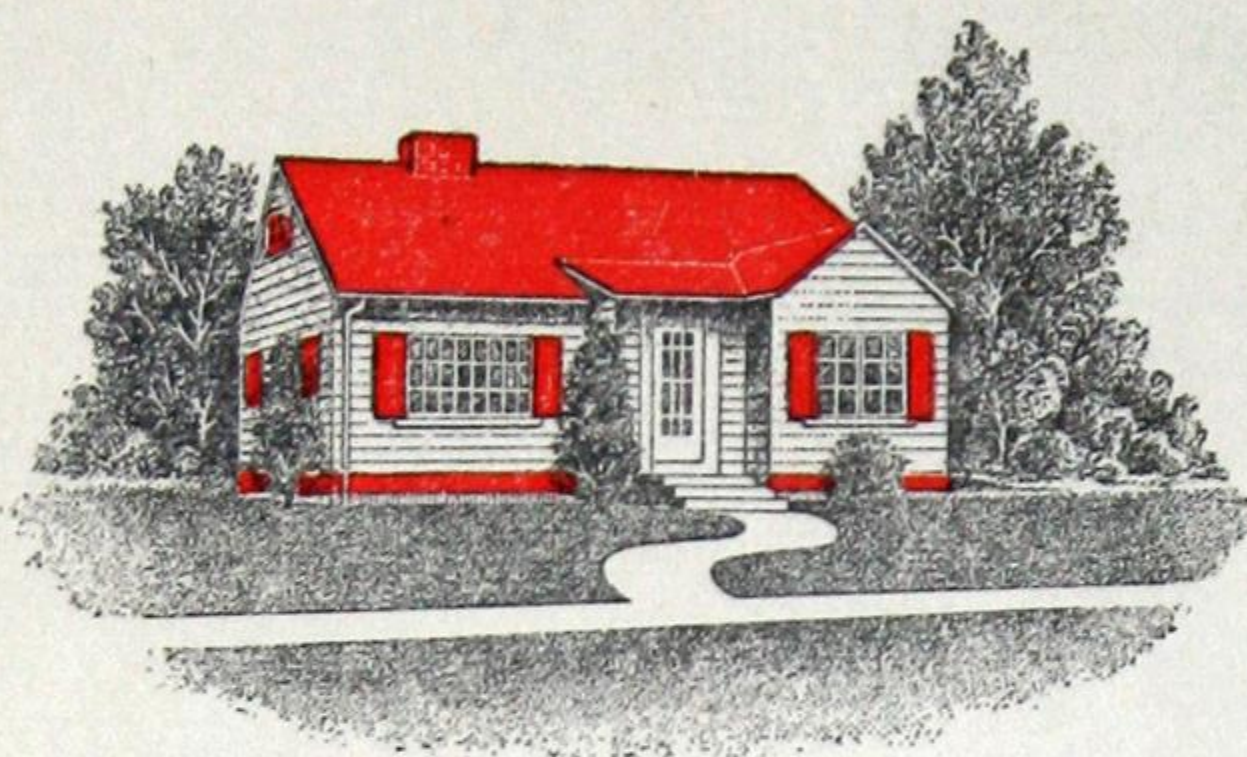

The Interior Door Sets are the same attractive pattern as the Front Door Set and the Rear Door Set and enhance the beauty of the home throughout. No finer hardware is manufactured than that supplied for Aladdin Homes.

PUSH PLATES

Heavy bevelled glass push plates size 3" x 12" are supplied when there is a double swing door between the kitchen and the dining room. Special double acting floor hinge is also supplied for swing doors.

A first class home deserves first class hardware and the hardware for Aladdin Homes has been selected with the greatest care. All hardware required is supplied for every Aladdin Home, front door set, rear door set, interior door sets, floor hinge and push plates for double swing doors, all window hardware, sash lists, sash fasts, hinges, galvanized flashings, all nails of various sizes required — in fact, everything.

ALADDIN HOMES LIMITED

Temple Building
62 Richmond St. West (at Bay)
Toronto 1, Ontario

"Homes of Quality"

We are pleased to send you our latest catalogue of Aladdin Homes.

Aladdin Homes are the result of more than thirty-five years experience in home designing and planning. They are first class in every detail of construction, built of the finest materials, warm and comfortable in the coldest weather, and give the greatest value from every standpoint.

There is no easier or quicker way of getting your new home built and completed, ready to move into, than to buy an Aladdin Home. We ship you the materials you will need in building it, the lumber readi-cut for quick, easy erection, sash, doors, trim, paint, hardware, insulation, shingles, flooring, etc., and you receive them at a price much lower than you would otherwise have to pay.

The Aladdin Read-Cut System eliminates waste and saves you the expensive hand cutting and hand fitting of the old-fashioned "cut-as-you-go" method of building. The lumber is cut at our Mill to the exact length, breadth and thickness required and is all ready to be nailed into place. The complete Erection Plans which we supply clearly illustrate and simplify every step of the erection work.

If you are planning to build your new home this year your order should be placed as soon as possible so that we will be able to make delivery when you are ready.

Please let us know which home shown in the catalogue is best suited to your requirements by filling out the enclosed coupon. We will be glad to give you complete information regarding the home you select and to render any service that will be of assistance to you in your building plans.

Yours very truly,

President.

MILLS THROUGHOUT CANADA

Aladdin Homes Readi-Cut

ALADDIN EASY PAYMENT PLAN PRICE LIST

The following pages show the down payment and convenient monthly payments for the complete materials we furnish for the Aladdin Homes illustrated in Catalogue No. 51. By taking advantage of this convenient payment plan you may enjoy now the many comforts of a modern, well-designed home—a home that will belong to you.

To ensure your satisfaction, we have adopted the principle that we will purchase only materials that are one hundred percent Number One. Any home is only as good as the materials used in its construction and it is only after many safeguards and inspections that we are satisfied all material for your Aladdin Home is "THE VERY BEST FOR ITS PURPOSE".

We not only guarantee the quality of all materials, but also guarantee that there will be ample of each item to fully complete your Aladdin Home in accordance with the specifications and that it will be delivered free from damage in transit. We know how entirely pleased you will be with Aladdin Materials, Aladdin Service and Aladdin Plans.

Your Aladdin Home is built of the same joists, studding, flooring, doors, windows, stairs and trim that are built into the finest homes. The only difference between an Aladdin Home and the best home constructed in the old-fashioned way is that you save the expensive hand cutting and hand fitting and the large amount of waste always present in the "cut-as-you-go" method.

Aladdin Homes are "Proven-In-Use" Homes. Each home has been carefully designed, been altered here and there, this and that feature added, until they are as nearly perfect as long experience can make them. During the past thirty-three years thousands of Aladdin Homes have been built—enough to make a large city. Their worth is proven.

ALADDIN EASY PAYMENT PLAN

The above list shows the down payment and the monthly payments for nine years under the Aladdin Easy Payment Plan for the complete materials we furnish as listed on page No. 3 of the catalogue. If you wish to make a larger down payment or spread the monthly payments over a shorter period, ask for quotation on that basis.

No monthly payment is made until two months after the materials are delivered. The monthly payments shown are the exact amount to be paid, including insurance. THERE IS NO INTEREST OR OTHER COST TO BE ADDED IN MAKING PAYMENTS ON THE DATE DUE. A credit at the rate of six percent per annum will be given for any payments made in advance of the date due.

EXTERIOR FINISH

Unless otherwise stated, the above prices include wood siding for the outside walls. Cedar shingles will be furnished for the outside walls, instead of siding, without added cost. When the outside walls are to be stuccoed, we omit the siding and furnish metal lath, but not the stucco materials. When brick veneer is to be used, we omit the siding and furnish special door and window frames for the brick veneer. Ask for quotation with the kind of exterior finish you wish for the home you select.

INTERIOR FINISH

The above prices include Gyproc Lath for the interior walls, ceilings and partitions for a finish of plaster. We supply the Gyproc Lath but not the plaster materials.

If you do not wish to plaster the interior, we will supply Wallboard for the interior walls, ceilings and partitions instead of Lath. If you wish to use Wallboard on the interior, instead of plastering, ask for quotation on the home you select.

LUMBER FOR FOUNDATION FORMS

It is not necessary to purchase additional lumber for forms for poured concrete foundation walls. The lumber we furnish can be used for this purpose and afterwards used in the home itself.

CABINET WITH IRONING BOARD—FREE

A cabinet with a folding ironing board is supplied free for every Aladdin Home to be inset in the wall of the kitchen.

BASEMENT WINDOWS

Basement windows are not included in the standard price as many customers obtain them locally. They will be supplied complete with sash, frame, and hardware if desired. Sash have three lights, each 10" x 16". Price, each, \$3.00

FRENCH DOORS

French Doors, complete with hardware, each door with 15 lights of glass, will be supplied at a price, each \$13.00

WEIGHTS AND PULLEYS OR SPIRAL BALANCES

The standard price includes friction fasteners for the sliding sash windows to hold the sash open in the position desired. Special box window frames with sash weights, cord and pulleys or Spiral Balances will be supplied for any Aladdin Home at a small charge which will be quoted upon request.

STORM SASH, COMBINATION DOORS, WINDOW SCREENS

Storm sash, combination storm and screen doors, and window screens will be supplied for any Aladdin Home. Ask for quotation on the home you select.

VERANDAHS

Verandahs illustrated are always included in the standard price unless quoted separately on the price list.

REVERSING THE PLAN

The plan of any Aladdin Home will be reversed without charge so that the rooms shown on the left side will be on the right side and the rooms shown on the right side will be on the left side.

CLOSET DOORS

Doors shown on floor plan, as in illustration, are included at the standard price.

On a few homes where framed openings are shown, as in illustration, closet doors are not included. They will be supplied, complete with hardware, at a price, each \$5.00

ROCK WOOL INSULATION FOR WALLS

The standard price includes Aladdin Heavy Inter-wall Insulation, heavy asphalt roll insulation, to be placed on the outside walls over the sheathing and also Rock Wool Insulation to be placed between the ceiling joists under the roof. Rock wool Insulation will be supplied to be placed in the outside walls at a small charge which will be quoted upon request.

SPECIFICATIONS

FRAMING MATERIAL—No. 1 Quality selected for strength and thoroughly seasoned. Accurately cut to fit.

SILLS—Cut to fit. Built up to 8" x 8" from 2" x 8". High quality, sound, seasoned stock.

MAIN FLOOR JOISTS—2" x 8" and 2" x 10" according to span. Spaced on 16" centres and of strength according to best building practice. Doubled around openings.

SECOND FLOOR JOISTS — 2" x 8" second floor joists spaced on 16" centres for all two storey homes.

PORCH JOISTS—Outside joists are doubled. Double porch joists through centre as required.

CEILING JOISTS — According to span, placed on 16" centres.

RAFTERS—2" x 4" and 2" x 6", all accurately cut to length, bevelled, notched and marked.

COLLAR BEAMS—Where required, in proper size to assure the sturdiest roof construction possible, cut to fit.

WALL AND PARTITION PLATES — 2" x 4" plate used at the bottom and double 2" x 4" plate at the top of all walls and partitions.

BRIDGING—Cross bridging for all floor joists. On larger spans two rows of bridging. Cut to fit.

STUDDING—2" x 4" wall and partition stud-
ding, dressed to uniform size, accurately cut to fit, placed on 16" centres. Doubled over door and window openings.

GABLE STUDDING—Mitred to slope of rafters.

SUB-FLOORING — Both upstairs and downstairs, matched shiplap or tongue and groove, laid diagonally on the floor joists.

WALL SHEATHING — The outside walls are sheathed with best quality matched shiplap or tongue and groove, dressed.

ROOF SHEATHING—Dressed and matched shiplap or tongue and groove, covered with asphalt felt under the asphalt roof shingles. All roofs are close boarded and laid tight.

WATERPROOF LINING PAPER — Heavy, dense, tough, waterproof lining paper between sub-floor and hardwood flooring.

INTERWALL INSULATION — Heavy Aladdin Interwall Insulation placed on the outside of the wall sheathing, under the siding, shingles, stucco or brick veneer. It seals the walls tightly, keeping the warmth inside and the cold outside.

SIDING — Best quality siding for outside walls with three coats of paint.

ROOF SHINGLES—Best quality 210-lb. asphalt slate shingles of the colour you select.

ASPHALT FELT — Supplied for all homes to be placed over the roof boards under the asphalt shingles.

WALL SHINGLES—Where wood shingles are desired on the outside walls, clear heavy Cedar shingles are furnished with special shingle paint.

LATH — Gyproc Lath, the ideal base for plaster, is supplied at the standard price for the interior walls, ceilings and partitions.

STEPS — For front and rear, cut to fit and bundled.

VERANDAH RAILINGS, BALUSTERS, ETC.—White Pine, all machined, ready to put in place. Verandah ceiling clear Fir V-Joint with varnish.

VERANDAH FLOORING — White Pine, best quality, cut to fit and bundled.

OUTSIDE FINISH LUMBER—All No. 1 White Pine stock, dressed four sides, cut to length, bevelled and bundled.

WINDOW AND DOOR FRAMES — Made from finest quality dressing stock. Cut to fit and carefully bundled.

INTERIOR TRIM — Moulded base, Quarter Round, Door and Window Trim, etc., all finest quality of pleasing design.

INTERIOR DOORS — Best quality 1 $\frac{3}{8}$ " thick interior doors supplied where shown on floor plans.

EXTERIOR DOORS — Best quality, 1 $\frac{3}{4}$ " thick, of design shown in illustration.

HARDWOOD FLOORING—First grade Birch hardwood flooring, both upstairs and downstairs, laid over diagonal sub-flooring.

MAIN STAIRS — Supplied complete, with treads, newels, handrails, balusters, etc., all machined, cut to fit and bundled.

CELLAR STAIRS — Always furnished where shown on floor plans. Cut to fit and bundled.

WINDOWS—The finest sash produced, glazed with fine quality window glass, well puttied. Furnished with frame and trim, cut to fit and bundled.

FLOWER BOXES, SHUTTERS, TRELLIS, ETC.—Always furnished where shown on illustration.

NAILS—We supply nails of all necessary sizes in excess quantity, galvanized shingle nails, etc., etc.

FLASHINGS—Heavy gauge galvanized flashings where required.

FINISH HARDWARE — We furnish all finish hardware required, including highest quality cylinder lock sets for front and rear doors, interior door lock sets, knobs, hinges, window fittings, sash lifts, sash locks, floor hinge and push plates for double swing door, etc.

GLASS — All windows and doors are shipped glazed with the glass securely puttied in place.

ROCK WOOL INSULATION—Insulating Rock Wool is furnished for every Aladdin Home to be placed between the ceiling joists, under the roof. It thoroughly insulates this area, reducing fuel cost and keeping your home warm and comfortable the year 'round.

METAL LATH—When outside walls are to be stuccoed, we furnish heavy galvanized metal lath for the outside walls.

PAINTS — No finer paints are manufactured than those supplied with your Aladdin Home. Three coats for all woodwork of the exterior and interior of the color you select. Finishing materials and wax supplied for hardwood flooring.

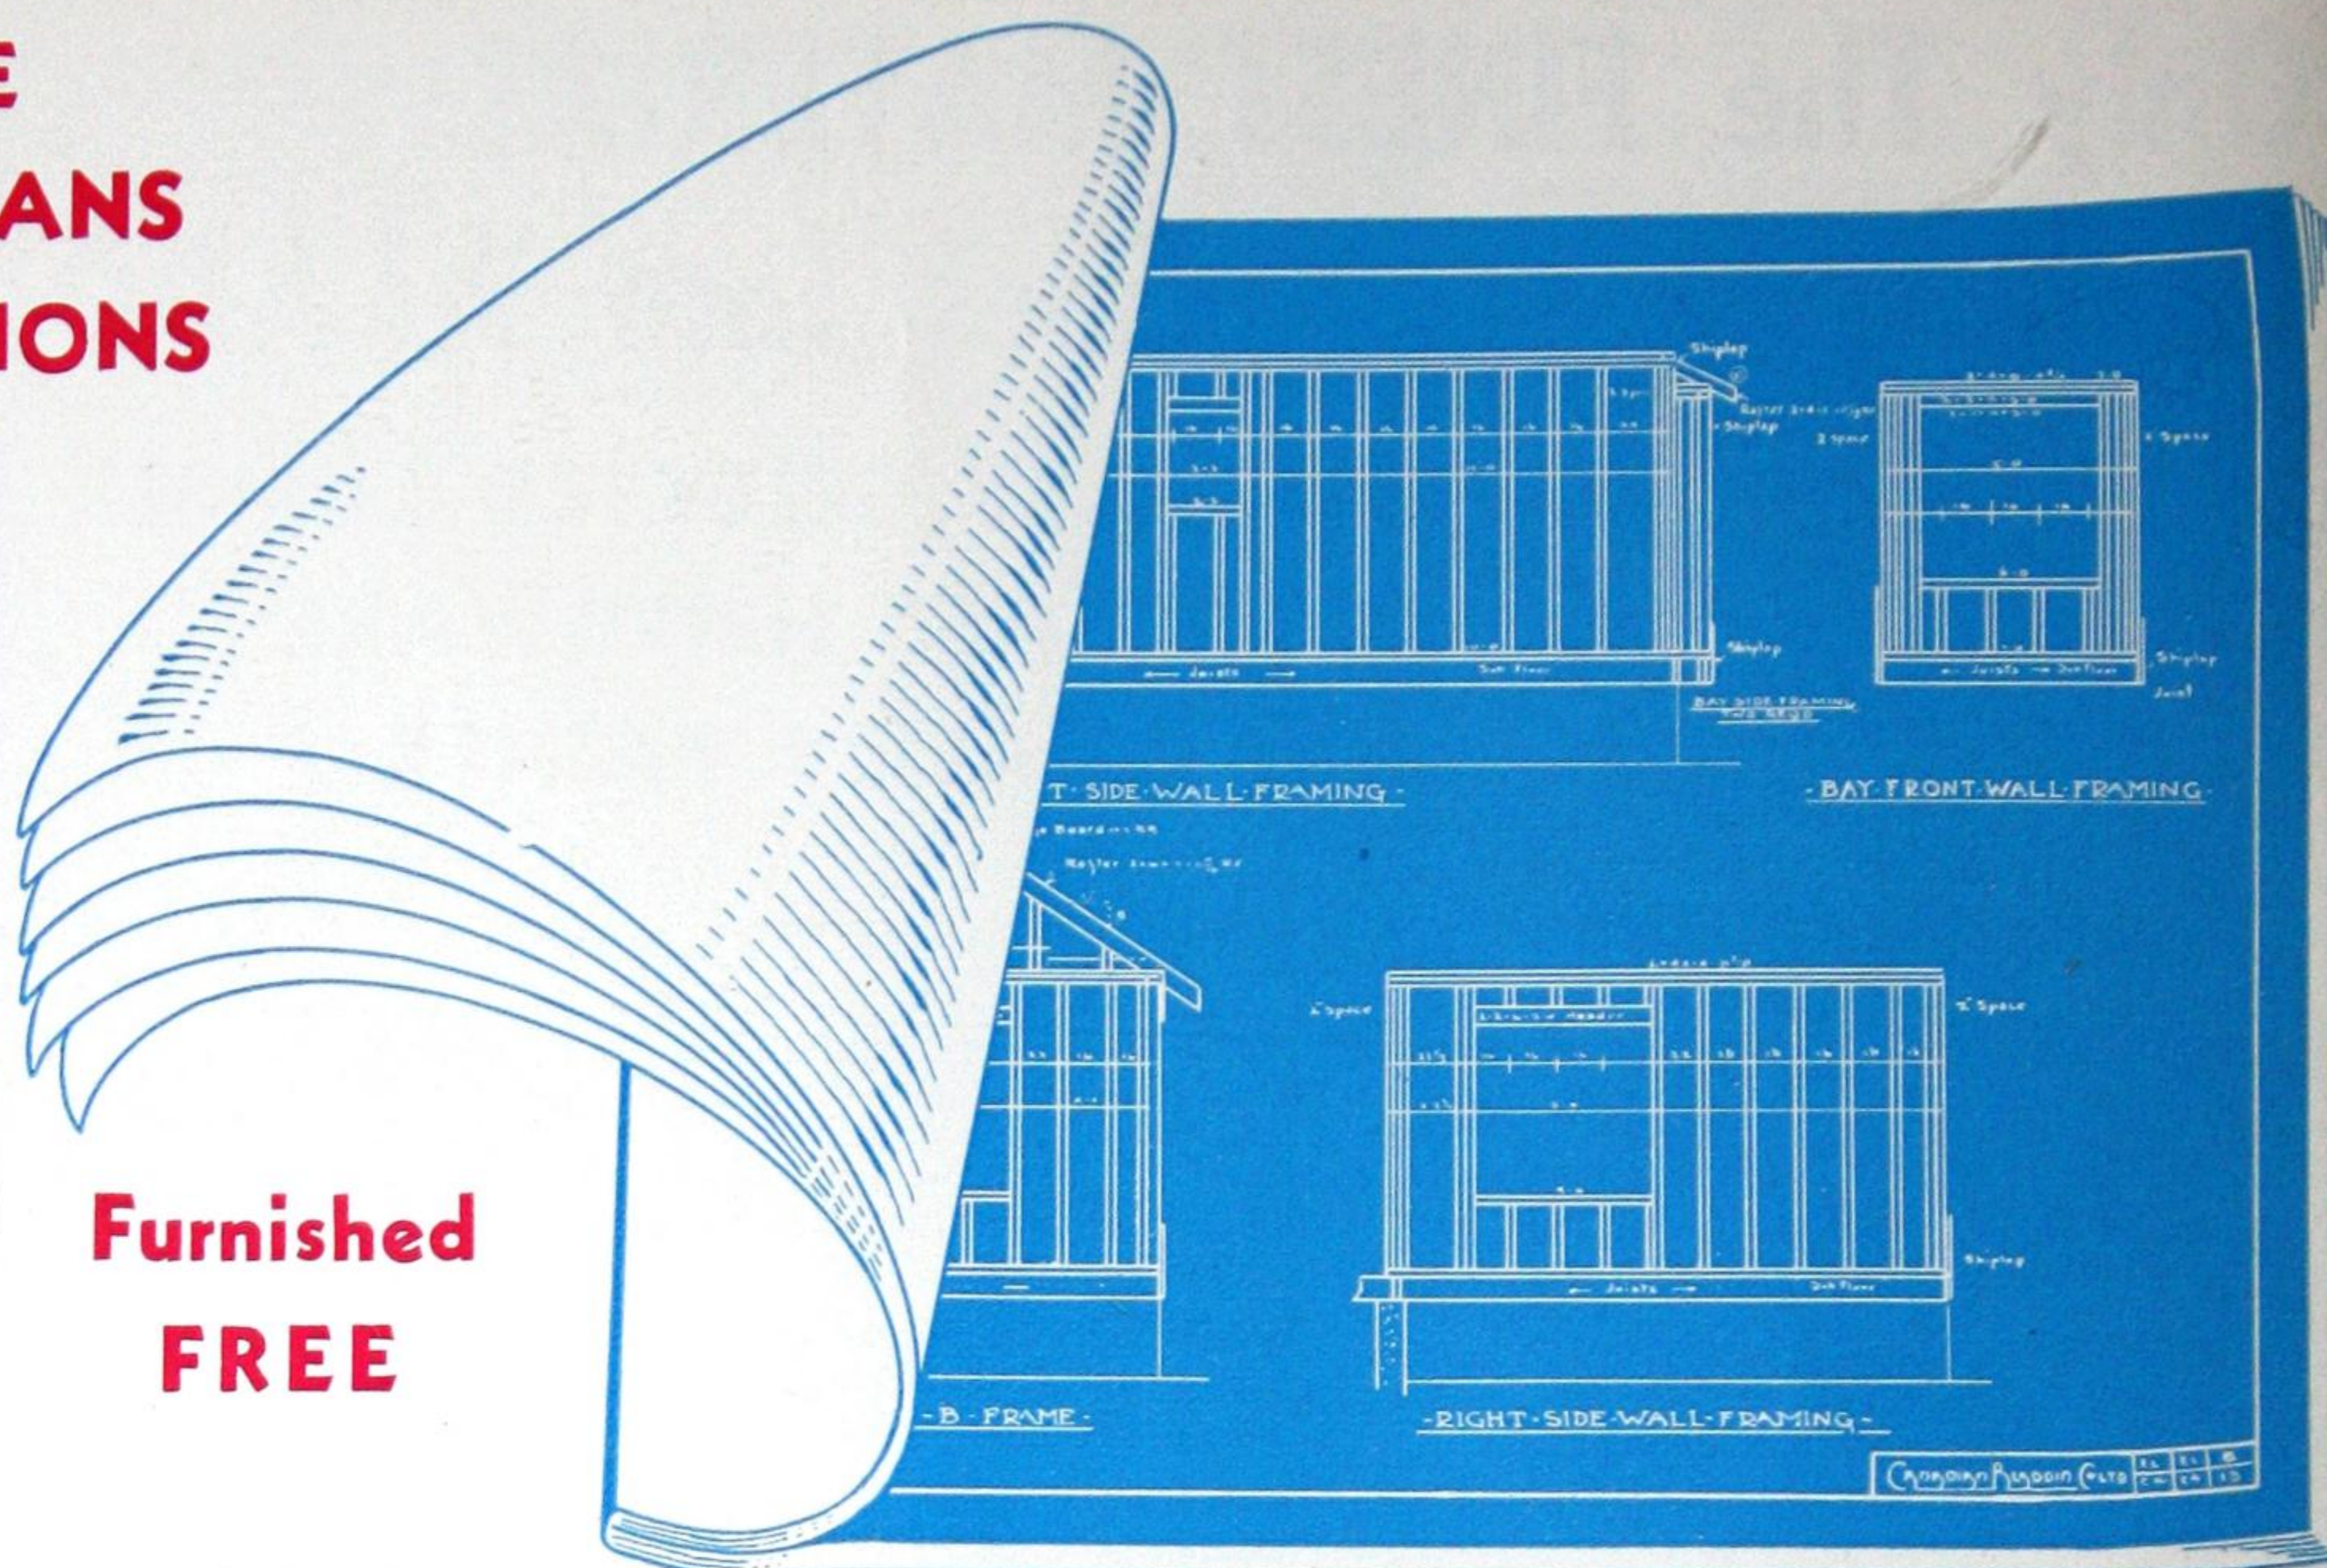

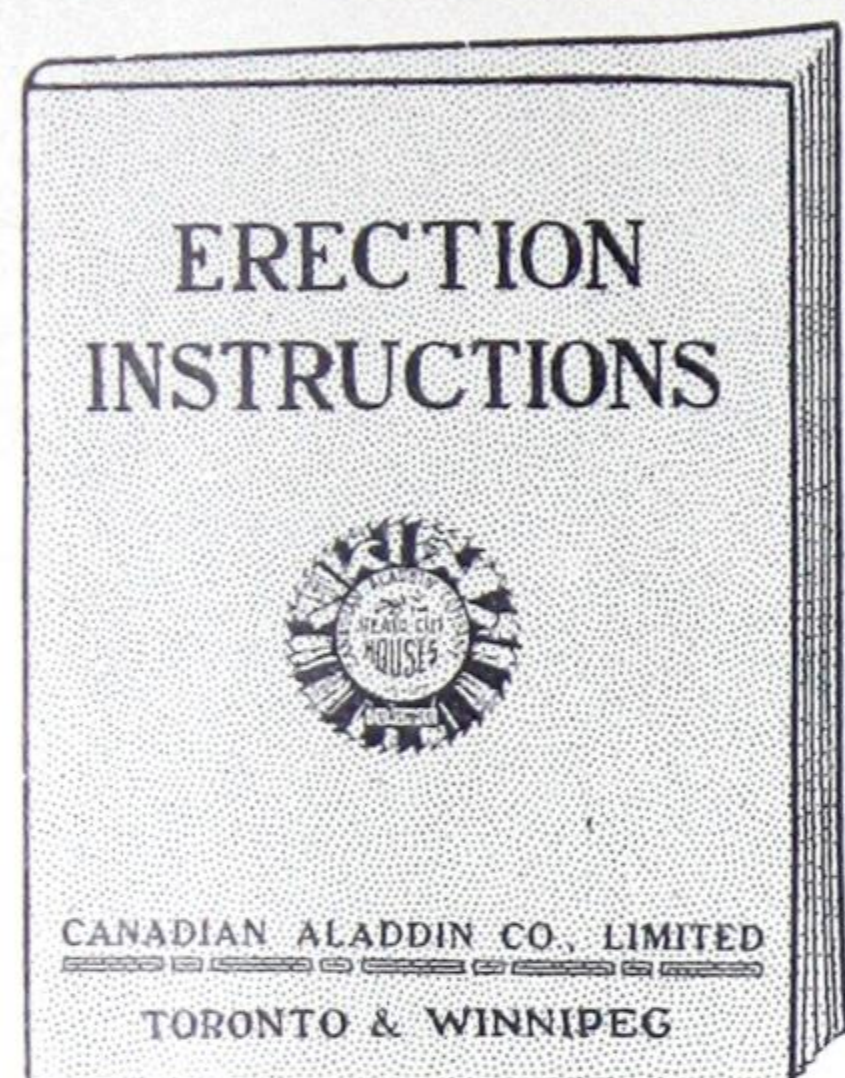

FOUNDATION, FIREPLACE, CHIMNEY, MASONRY, ETC.—We do not furnish masonry materials, bricks, cement, etc., or plaster materials as they can be purchased as cheaply in one locality as another. The foundation plan we furnish shows exactly how the foundation is to be put in. If poured concrete is used for the foundation, the lumber we furnish can be used for the foundation forms and afterwards used in the home itself. If you do not have a basement, the home may be built on concrete piers or posts and we will supply the sills around the outside as well as the centre sill.

We do not cut the openings for fireplaces and chimneys and they can be located wherever desired or omitted entirely. Some of the floor plans show suggested locations. We will furnish windows in place of any fireplace shown on the floor plans, if desired.

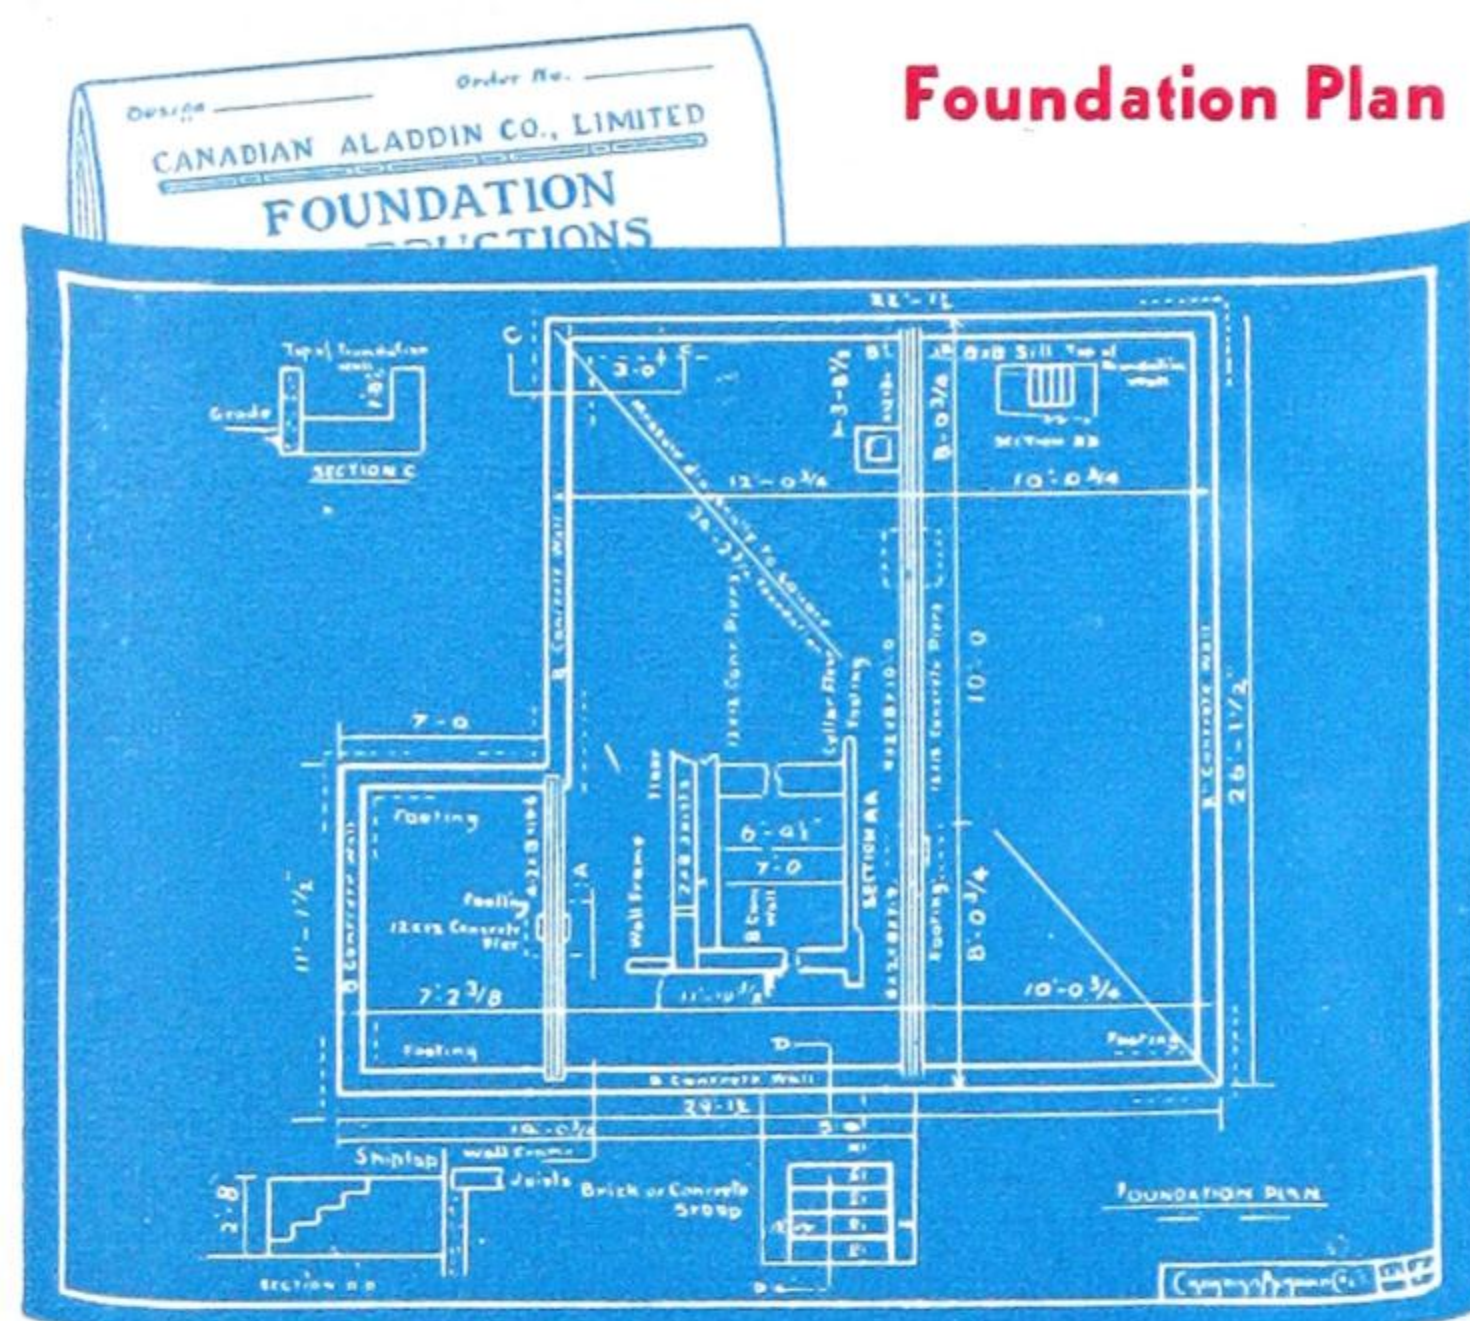

WALLBOARD

If you do not wish to use plaster, Wallboard will be furnished for the interior walls, ceilings and partitions. Ask for quotation on Wallboard for the home you select.

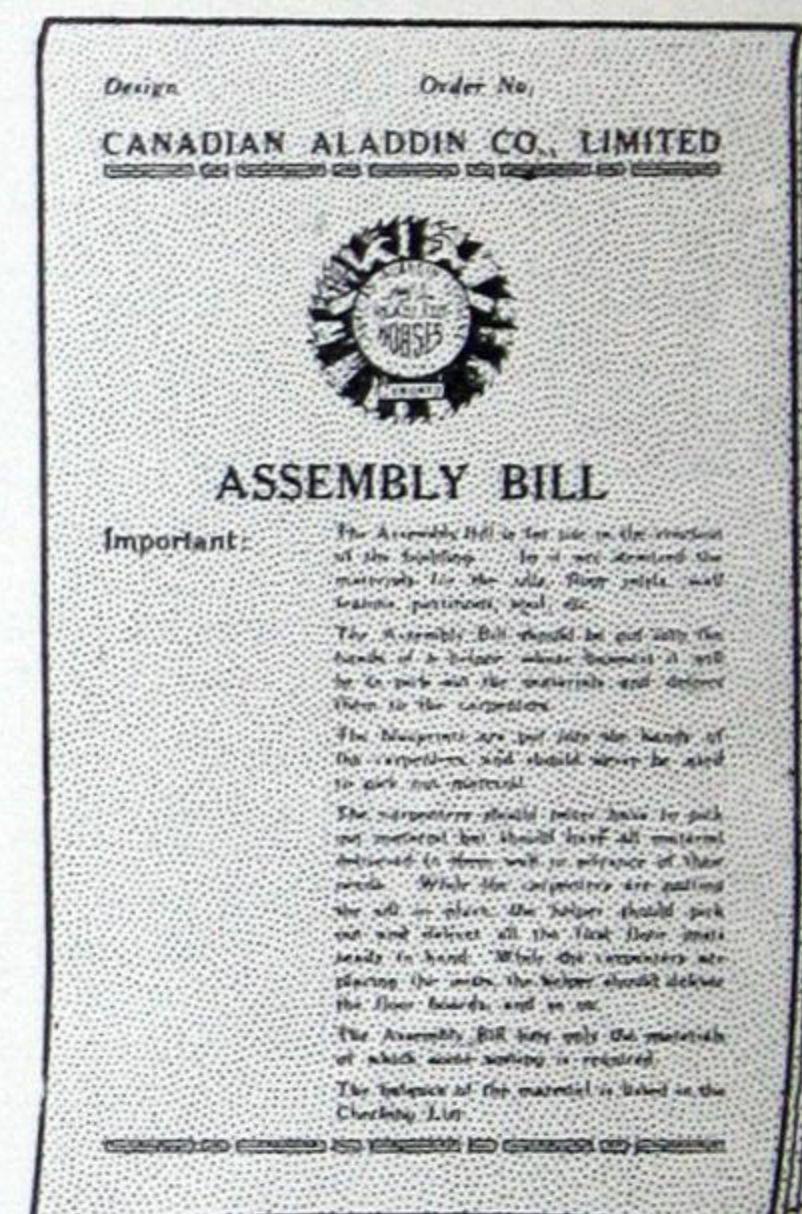

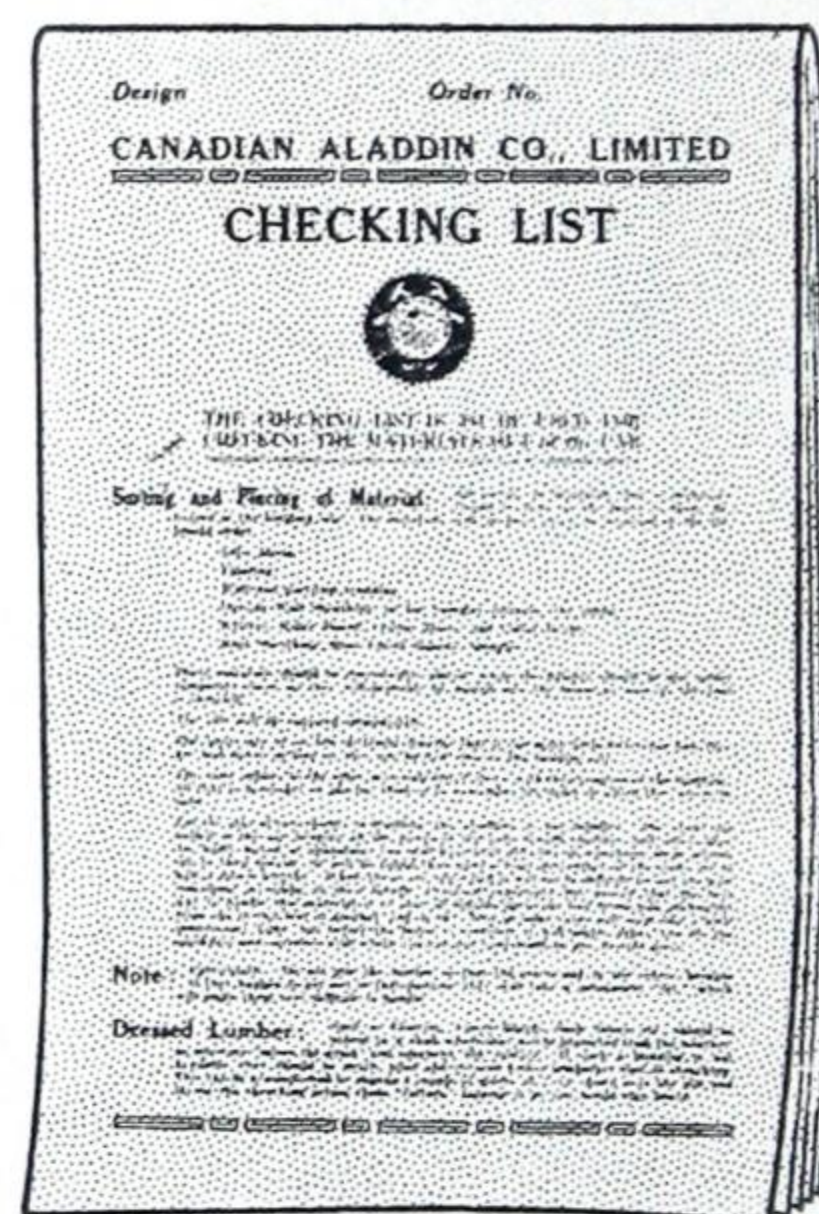

COMPLETE ERECTION PLANS and INSTRUCTIONS

**Furnished
FREE**

Foundation Plan

WITH every Aladdin Home we furnish **FREE OF CHARGE** a complete set of Erection Plans and Instructions prepared by our architects showing every board in the house. Every step in the work of erecting the home is explained and pictured. It is impossible to make a mistake. The foundation plan shows exactly how the foundation is to be built for your Aladdin Home. You also receive a Checking List of the complete materials and an Assembly Bill listing the materials in just the order required in building. Our Erection Plans are so complete and easy to follow that many Aladdin Homes have been erected by the owners themselves.

Nothing To Figure Out

With an Aladdin Home you receive the benefit of valuable and complete architectural service. The materials are selected and manufactured exactly in accordance with the detailed plans and specifications and you are assured that your home will be properly constructed in every particular. We will send you the foundation plan in advance and the complete blueprint plans before the arrival of the materials. The erection of your Aladdin Home is easy, simple, systematic and economical.

Change In Floor Plan May Be Made To Suit Individual Taste

The plans for every Aladdin Home have been developed by our designers with great care so that they are most practical from the standpoint of convenience in arrangement and economy in building. Maximum saving is the result.

If you find, however, that a change in the plan is desirable, write us about it. We will be glad to accommodate you by making such changes as are practical.

EXTRA HEAVY WALL INSULATION

Every Aladdin Home is specially insulated to keep in the heat and to keep out the cold.

ALADDIN HEAVY INTERWALL INSULATION, a heavy saturated asphalt felt insulation, is furnished to be placed over all exterior walls, outside the sheathing lumber and between it and the siding, stucco, or whatever wall finish is used.

It seals the home tightly, no air or drafts can penetrate it. Heat and cold cannot go through it. It is **THICK, HEAVY, WARM** insulation.

Aladdin Homes are completely insulated, the four walls, the floor and the roof.

BEST ASPHALT SLATE ROOF SHINGLES

The asphalt slate roof shingles for Aladdin Homes weigh 210 lbs. per square. A layer of asphalt felt is applied under the shingles to give extra warmth and protection.

These high quality shingles are scientifically manufactured to retain their pleasing appearance, protective qualities, and add the final touch of colour and beauty to every Aladdin Home.

We spare no materials to ensure that your Aladdin Home will be super-warm and superior in every detail of construction.

FINEST QUALITY PAINTS

No finer paints are manufactured than supplied with your Aladdin Home for we have used the greatest care to seek out and use only the very best. They not only beautify and preserve but offer the greatest value due to their long lasting qualities.

The special priming paint, the colour paint for the finishing coats, etc., cannot be excelled in spreading, wearing, covering capacity and colour fastness.

The colours you prefer may be selected from the complete colour card which will be sent to you.

These Ceiling Joists are insulated with Rock Wool. It protects from the Summer Sun and the Winter Cold.

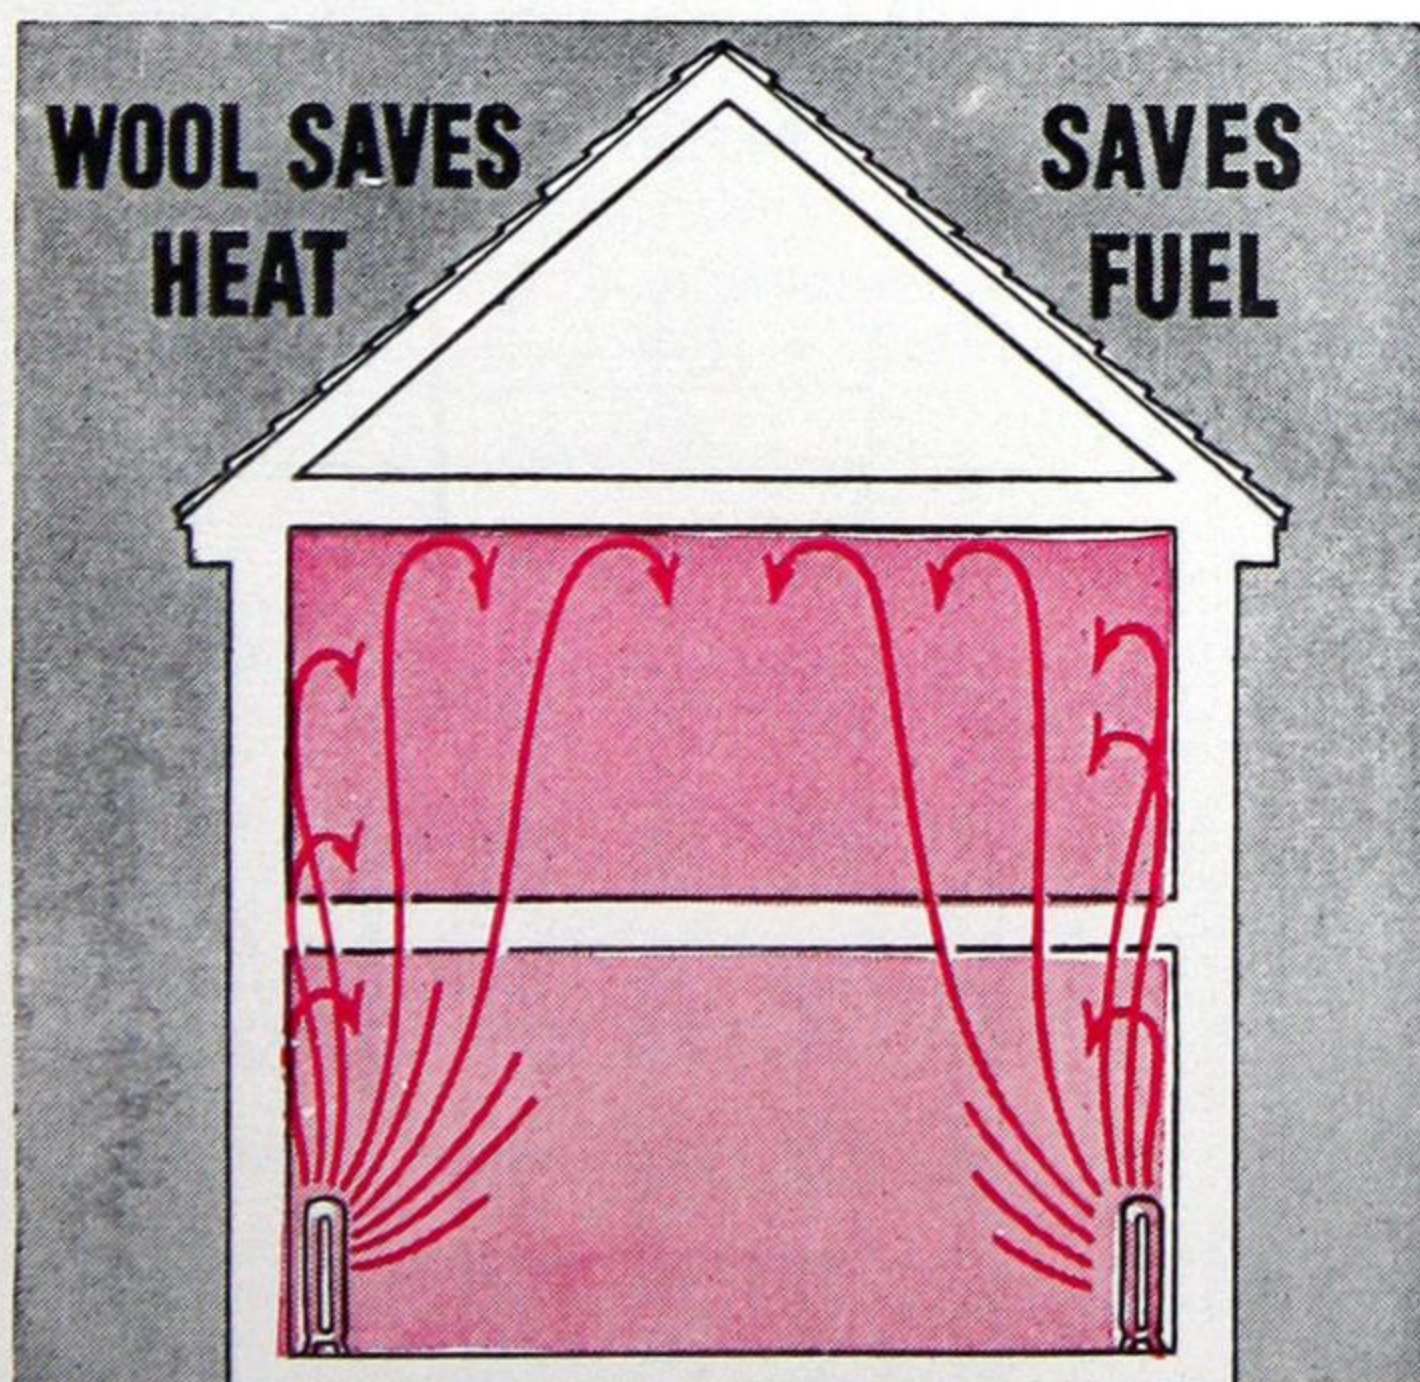

ROCK WOOL INSULATION FOR EVERY ALADDIN HOME

THE most important place to insulate in any home is the ceiling below the roof. For every Aladdin Home we furnish a warm layer of Super-Seal Insulating Rock Wool to be placed between the ceiling joists under the roof. The rising heat is thus forced back into the living quarters of your home, making it warm and comfortable in the coldest winter weather. Reducing the loss of furnace heat reduces the amount of fuel used.

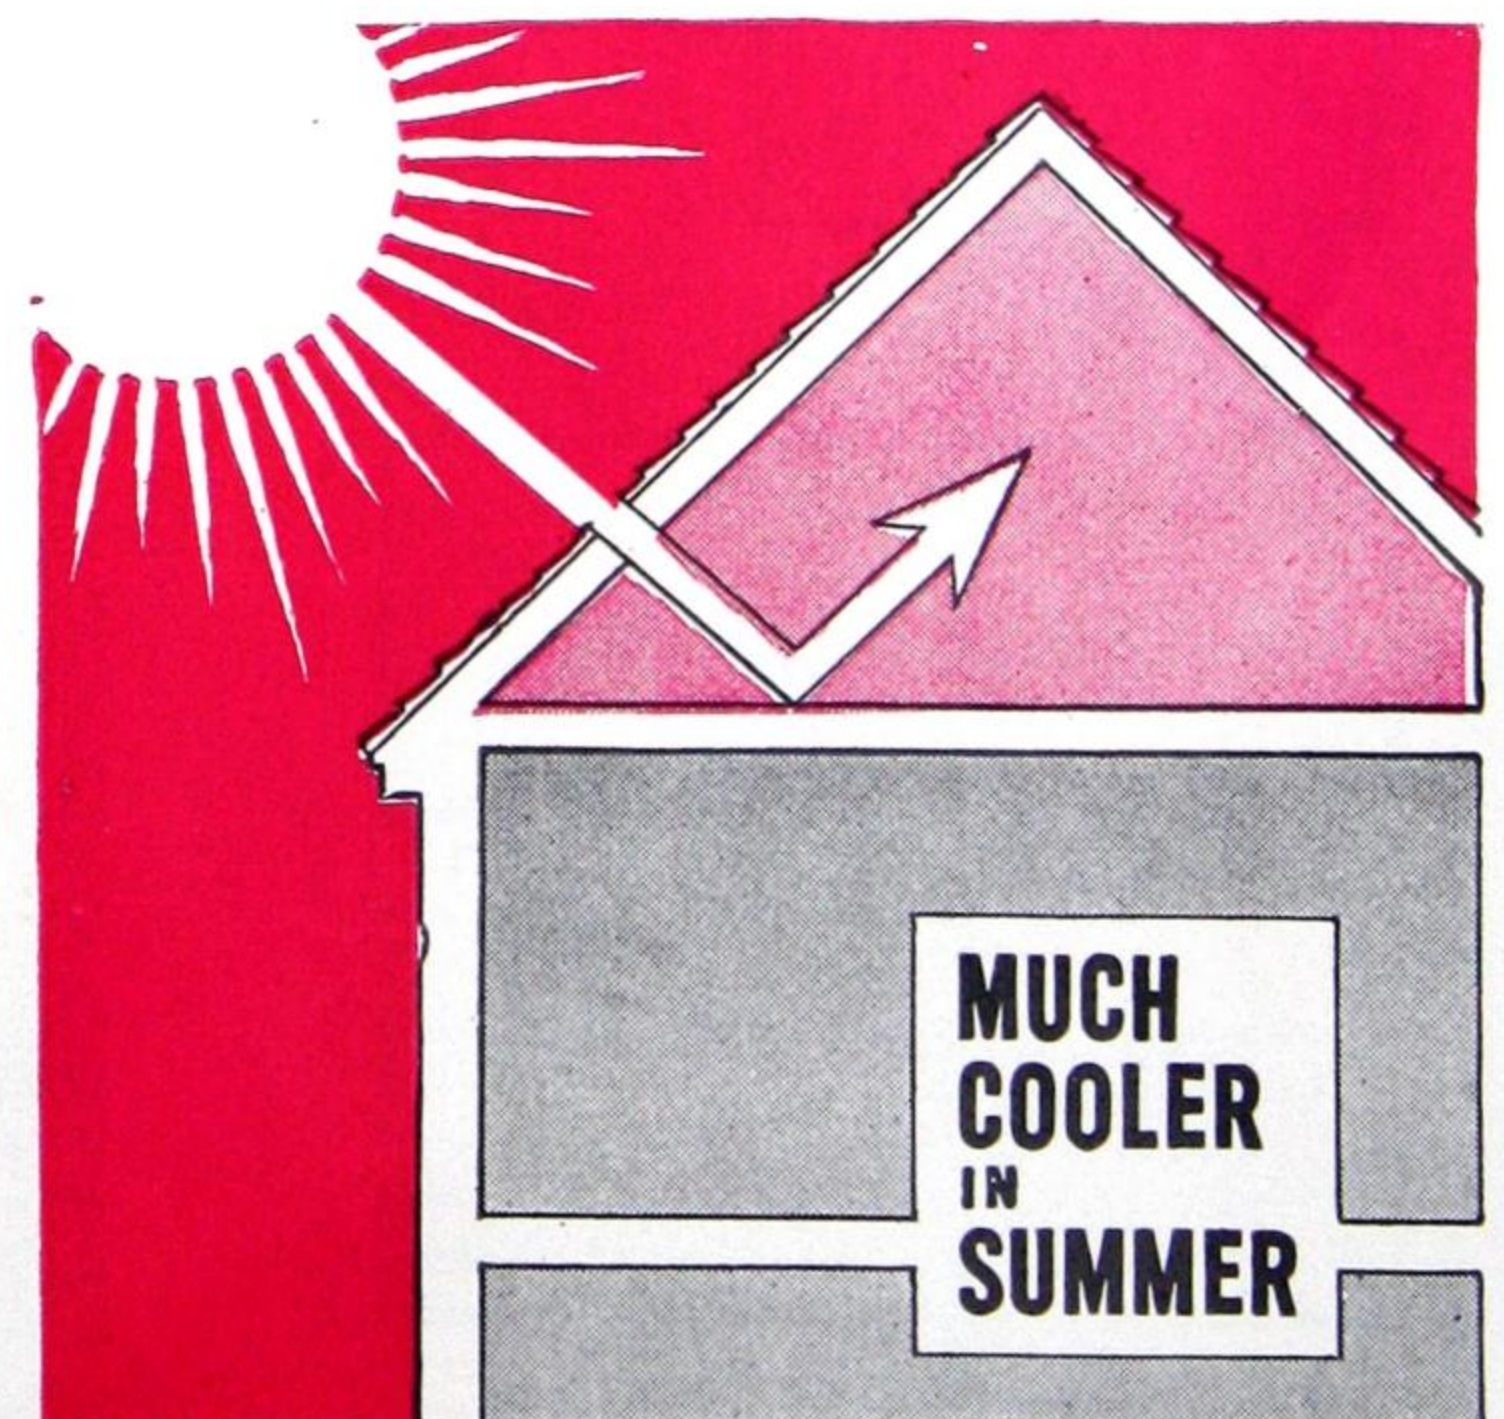

The fluffy resilient layers of Rock Wool are the exact size to fit between the ceiling joists, are simply laid out and the work of insulation is completed. It will permanently keep your home warm and comfortable and effect a substantial saving in fuel every year.

Rock Wool keeps your home warm in the same way that a knitted sweater keeps you warm. Heat cannot pass through its millions of tiny air cells. It is the most efficient insulating material known and has a moisture proof barrier on the underside of the insulation.

Rock Wool keeps the hot rays of the sun from entering your home in summertime, making every room comfortable the year 'round.

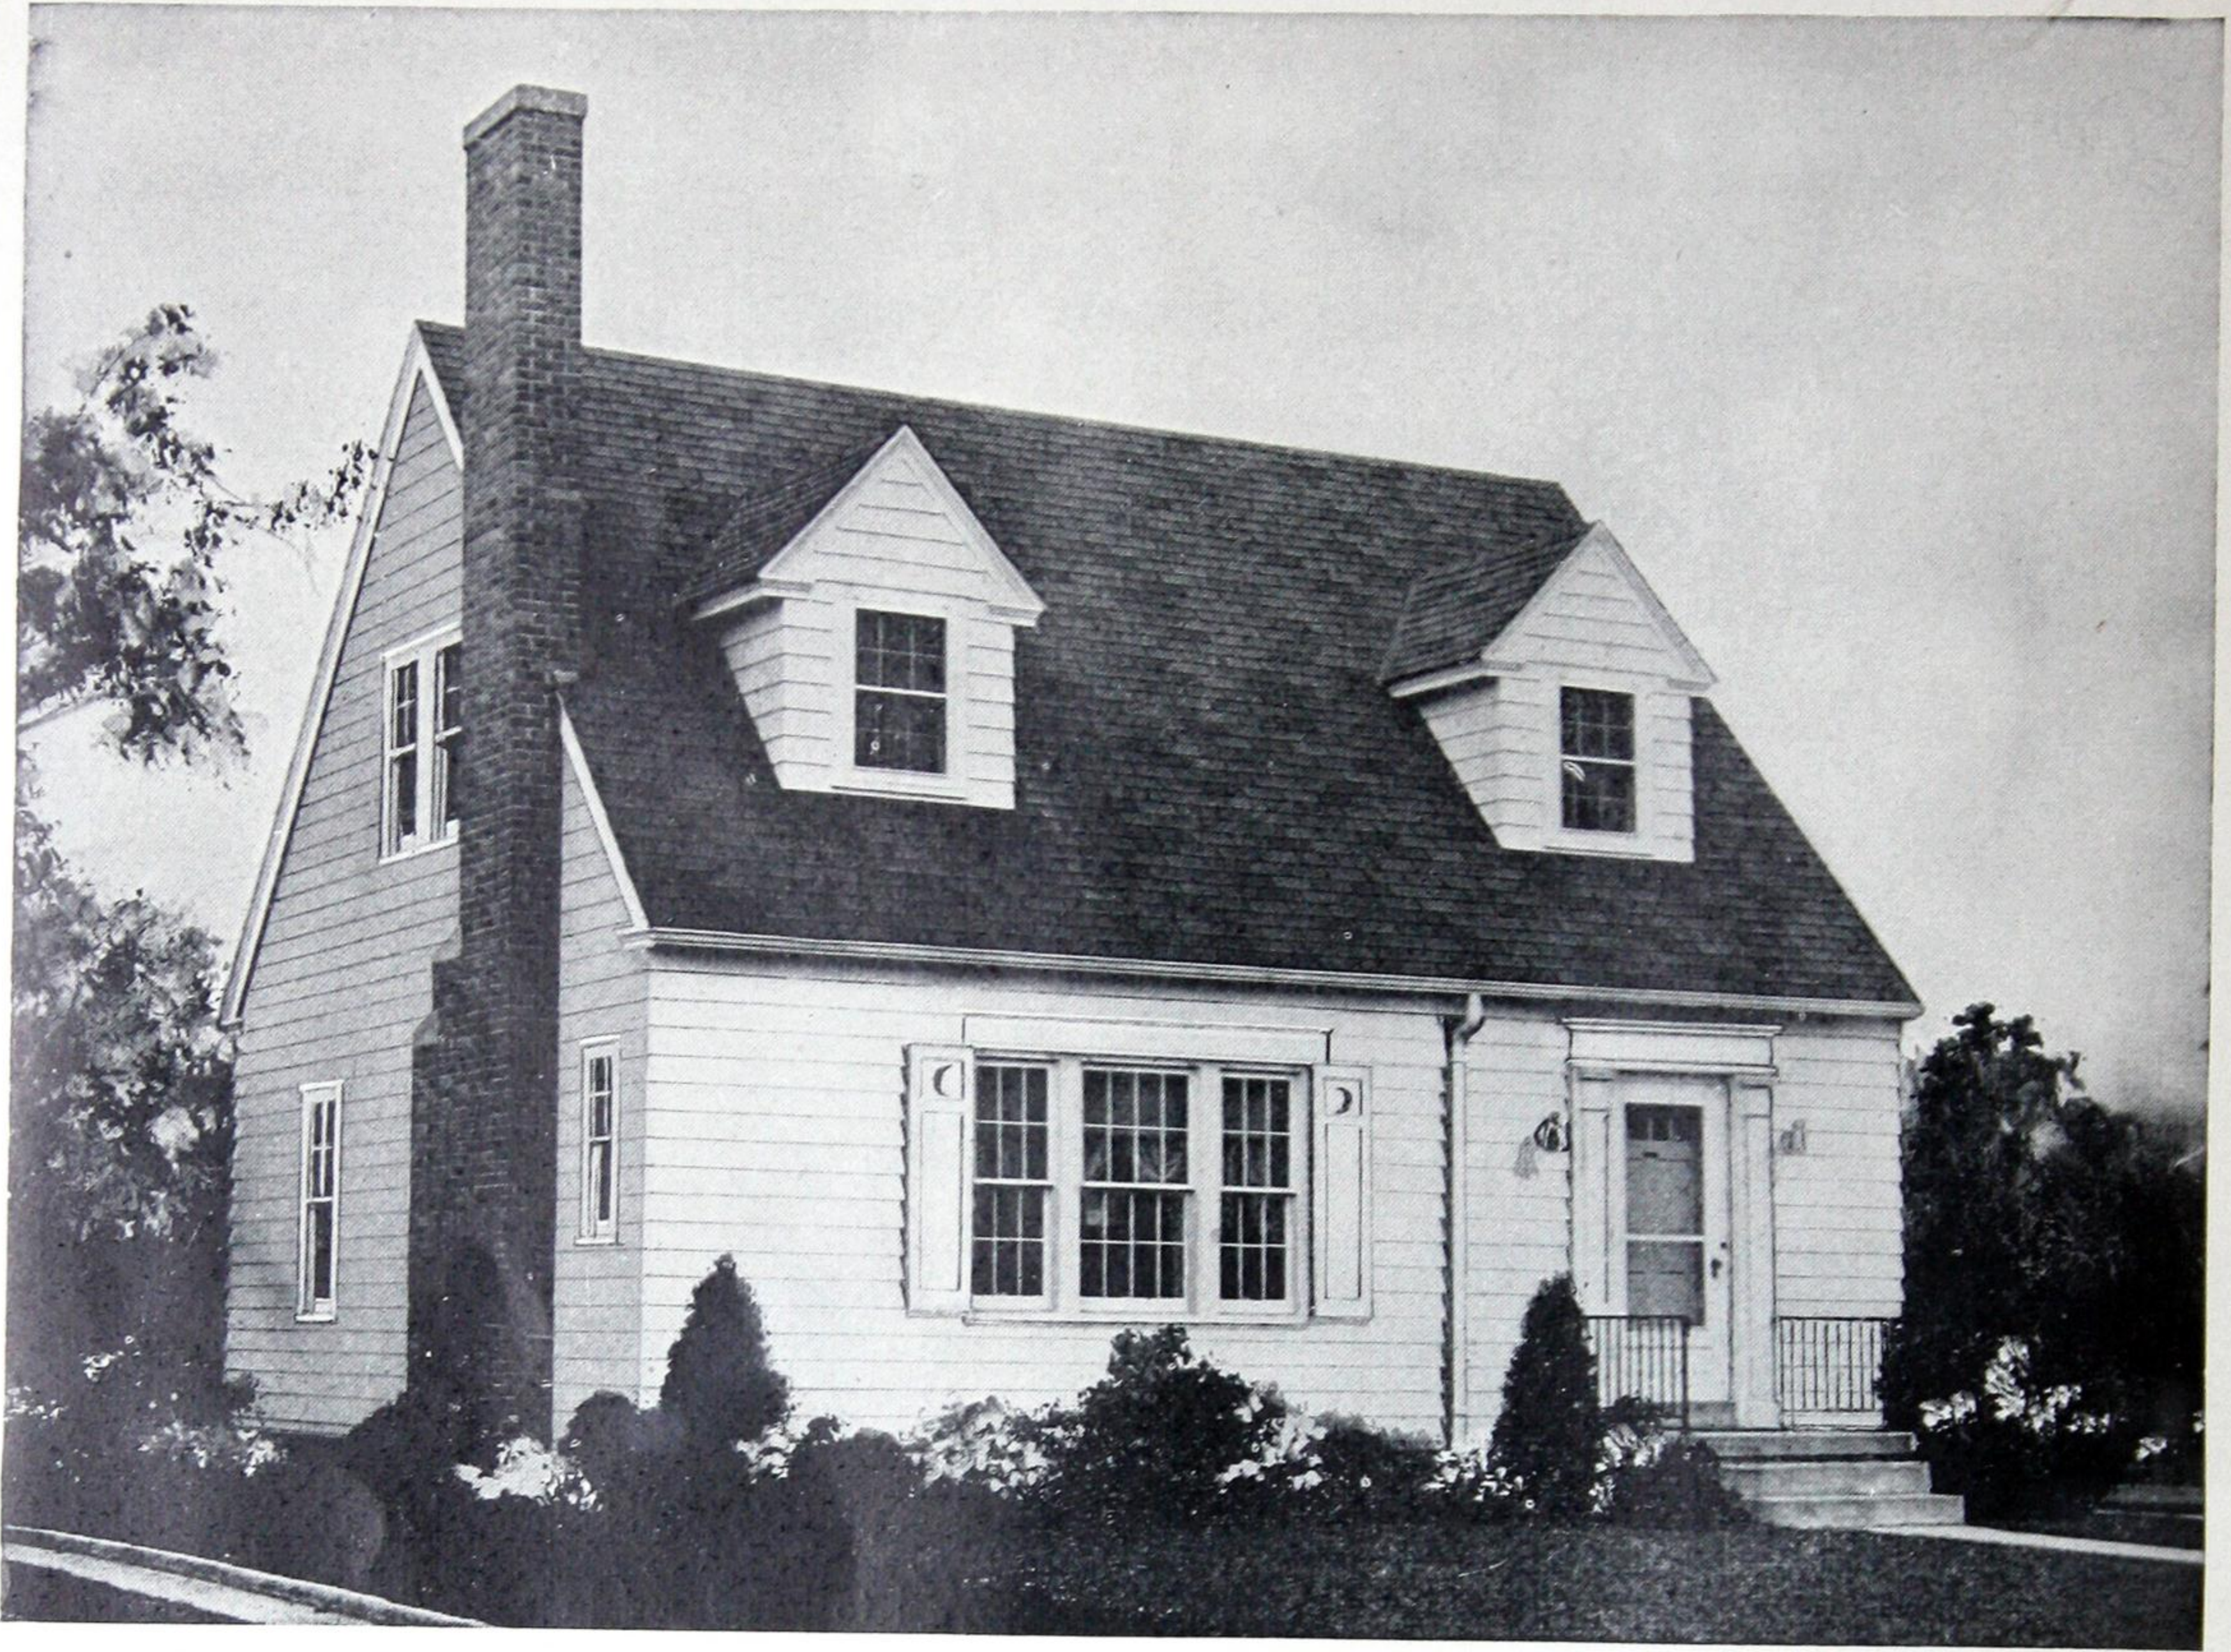

This illustrates the flow of heat during the winter months. Rock Wool keeps the furnace heat in your home.

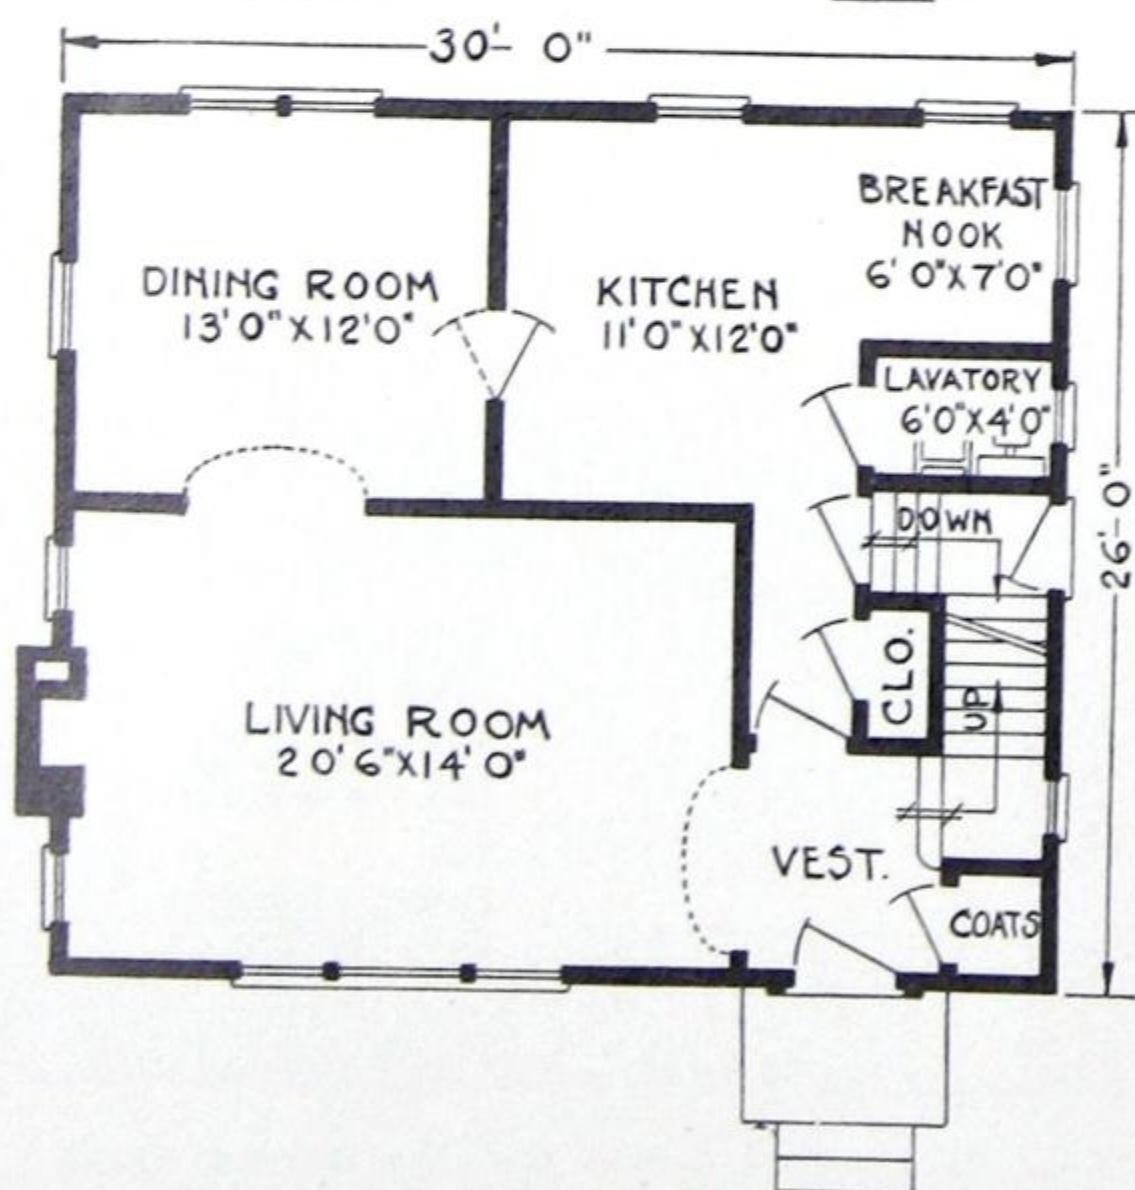

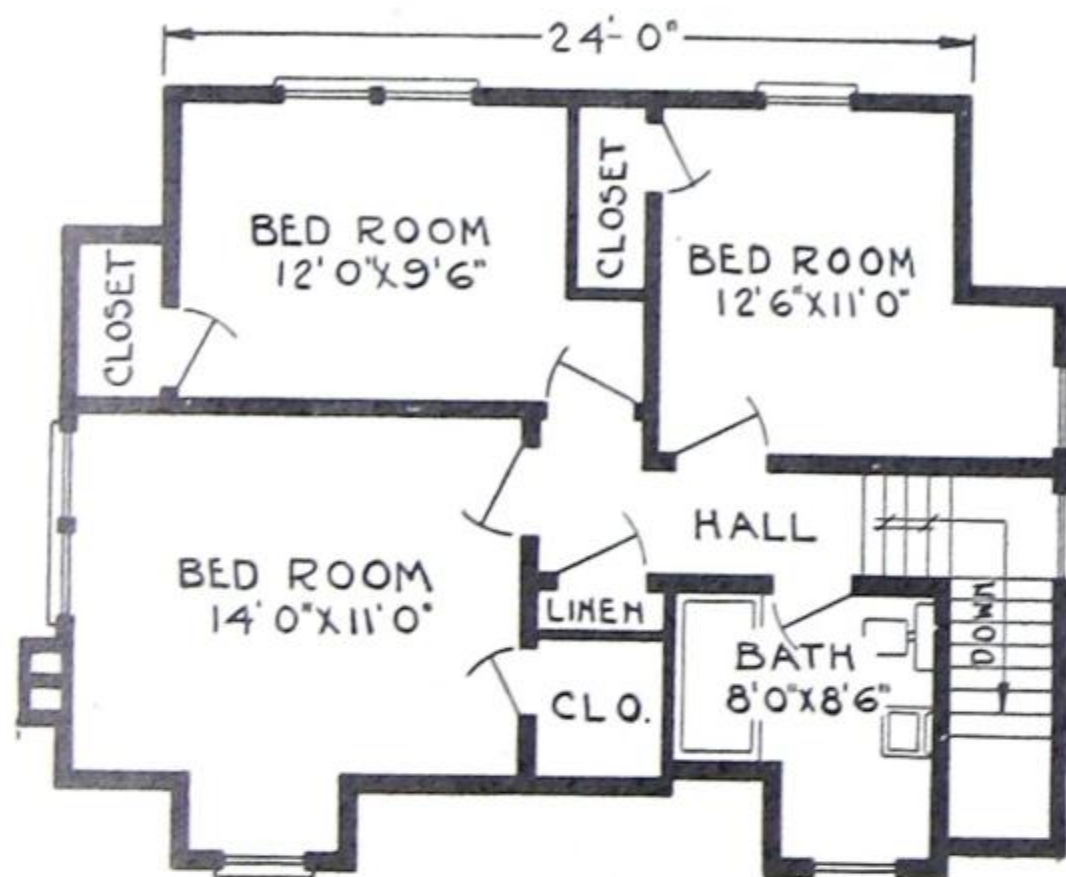

This shows how Rock Wool keeps out the summer heat. The living rooms remain cool and comfortable.

A New Favorite with Two Splendid Arrangements

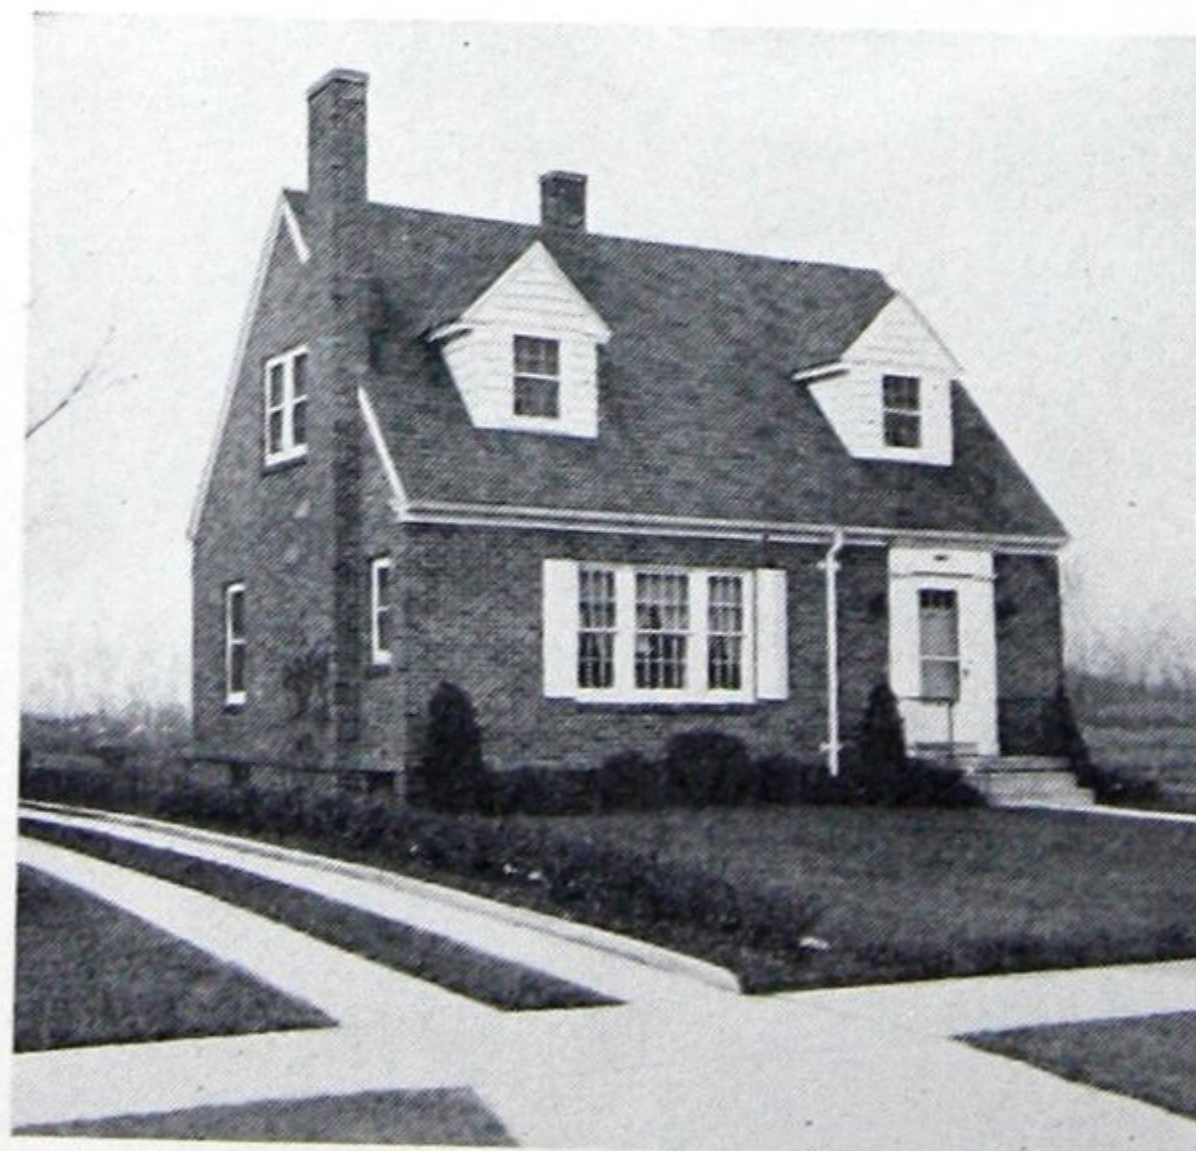

The Kendal

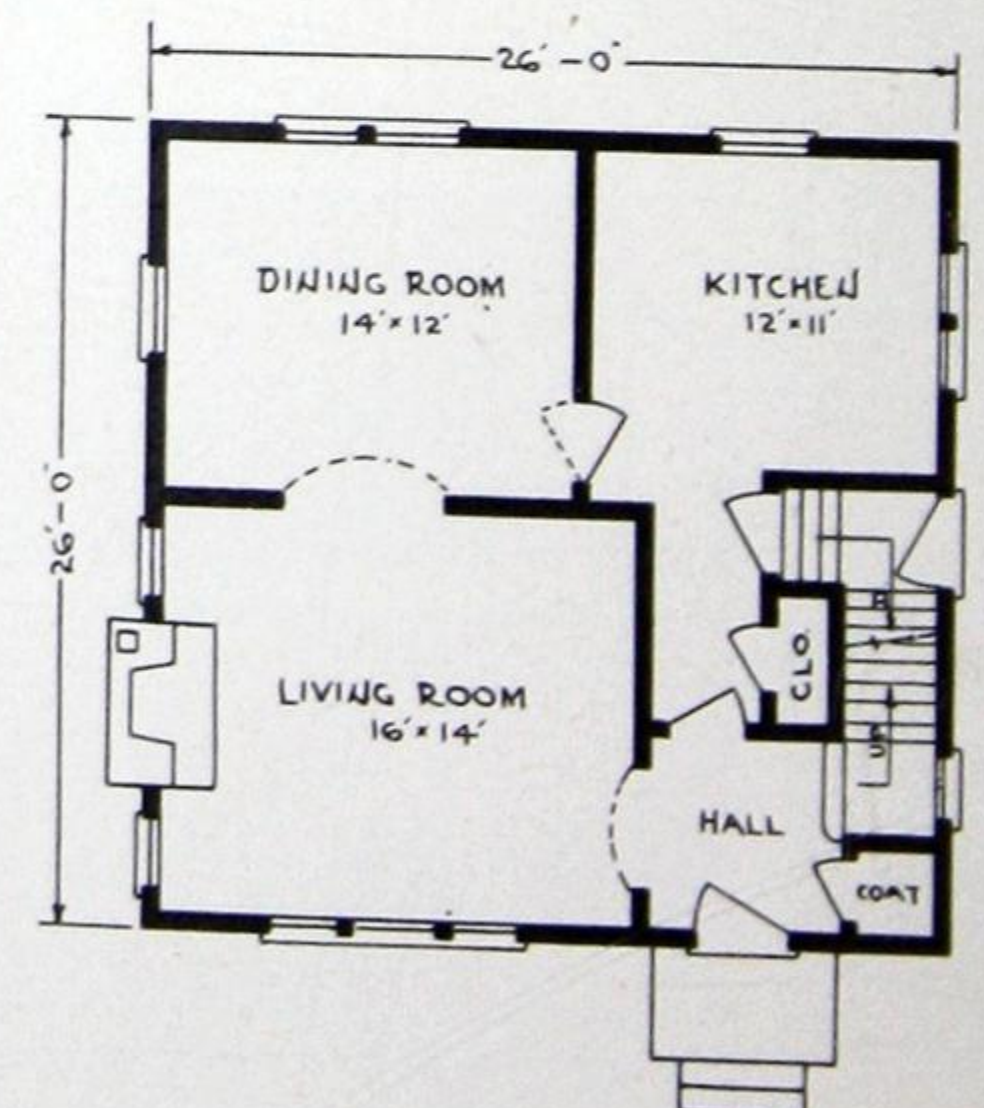

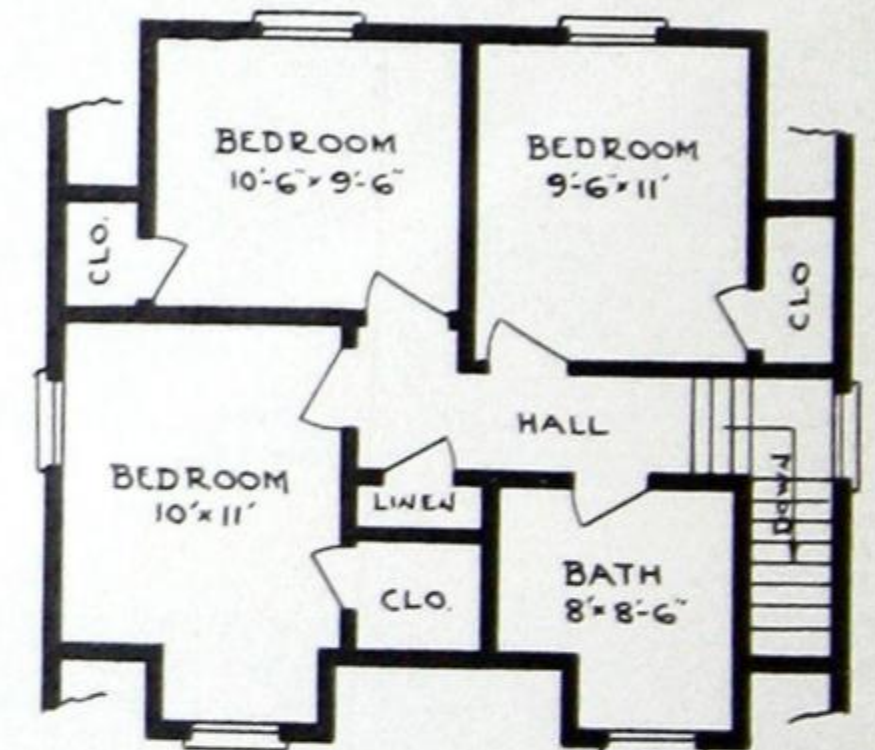

NOTHING has been omitted that would add to the attractive exterior or the convenient arrangement of the interior of the Kendal. The front elevation has two small dormers and the rear has one large dormer. Plan No. 2 is smaller than Plan No. 1 and its cost is proportionately lower. In choosing the Kendal or any other Aladdin Home, you have definite assurance of greatest value, best construction and finest materials.

THE MARSDEN gives the greatest accommodation and home comfort for a very small investment. Three floor plans are shown — Plan A being 22 feet by 26 feet in size, Plan B being 22 feet by 28 feet and Plan C being 24 feet by 30 feet. Plan A is designed to be built without a basement and does not have the basement stairway. The Marsden may be built with either the broad side or the narrow side facing the street. Interchanging the front door and window in the other wall of the living room accomplishes this. The trim lines of the exterior and the convenient arrangement of the interior make the Marsden a most desirable home.

THE ASHTON

The Ashton

THE ASHTON combines the greatest in comfortable living accommodation with economy of cost. The rounded top front door opens to a convenient vestibule with its coat closet. The living room is well lighted by a double window in the front and two windows in the side wall. The side wall of the living room makes a fine location for a fireplace and

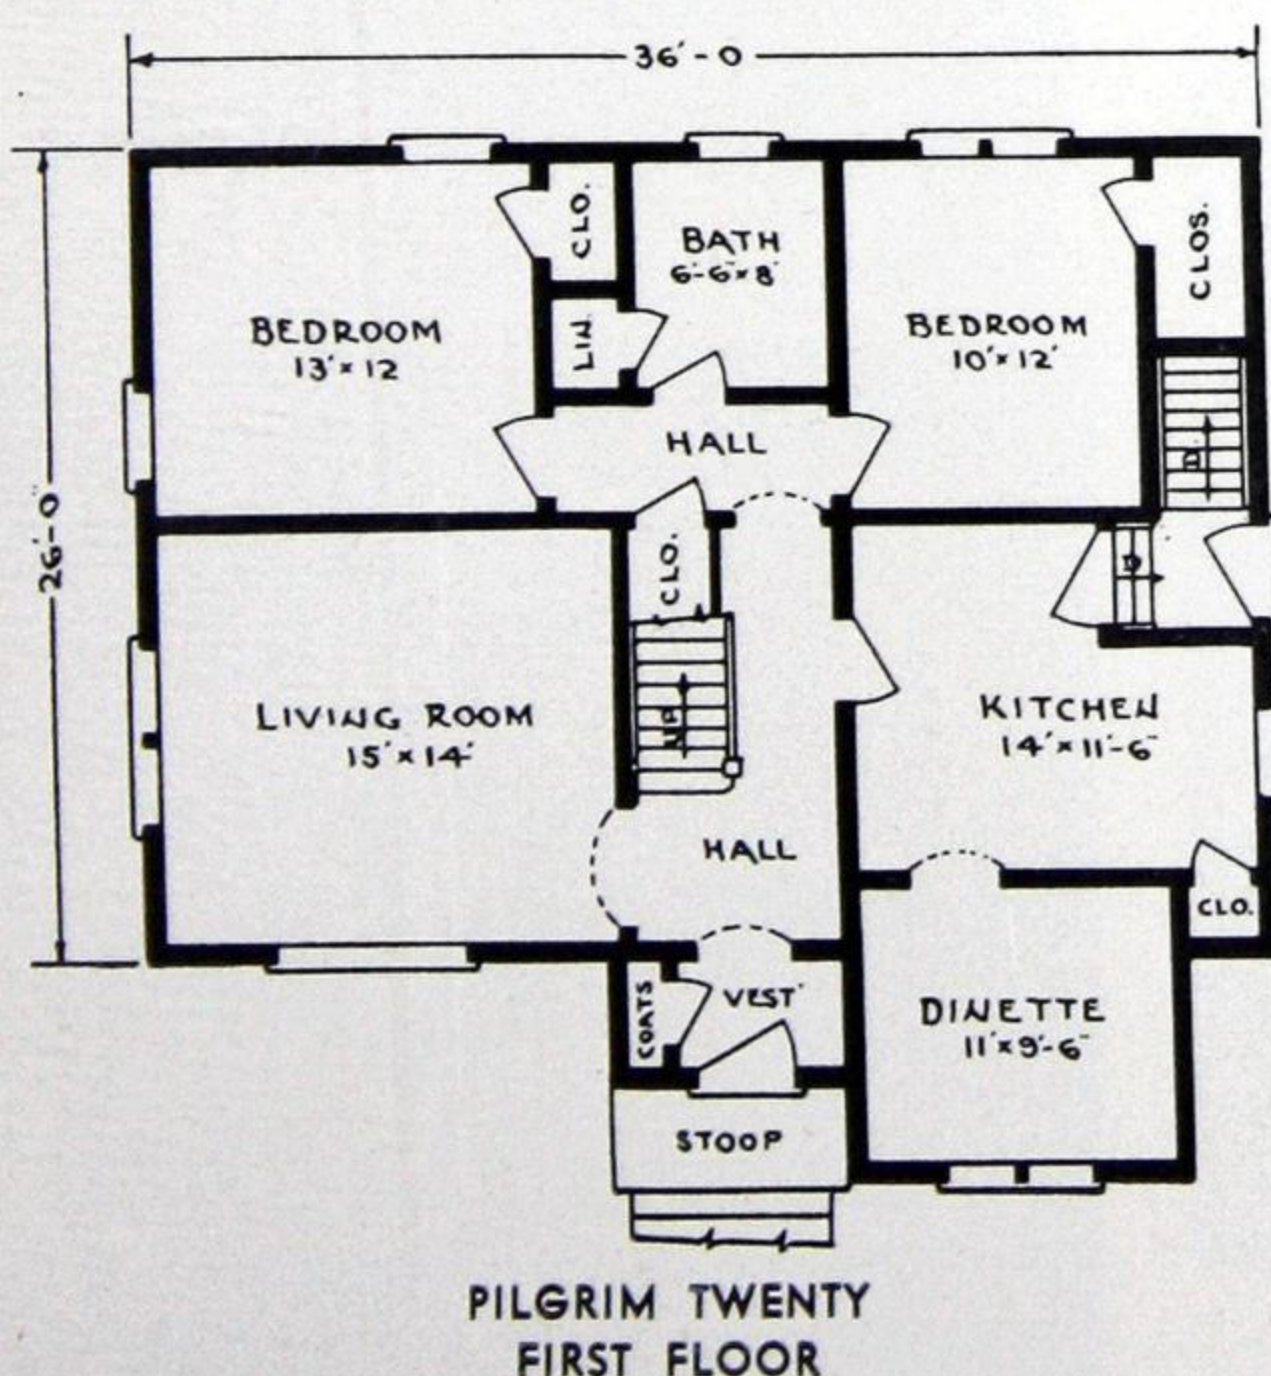

the two windows will be moved to make ample space between them for the fireplace. The two bedrooms are good size and conveniently located to the bathroom. Aladdin quality of materials and construction is your assurance that your home will be well and soundly built in every particular. Ask for complete information regarding the Ashton or any other design you favor.

We will REVERSE the plans of any Aladdin Home, without charge.

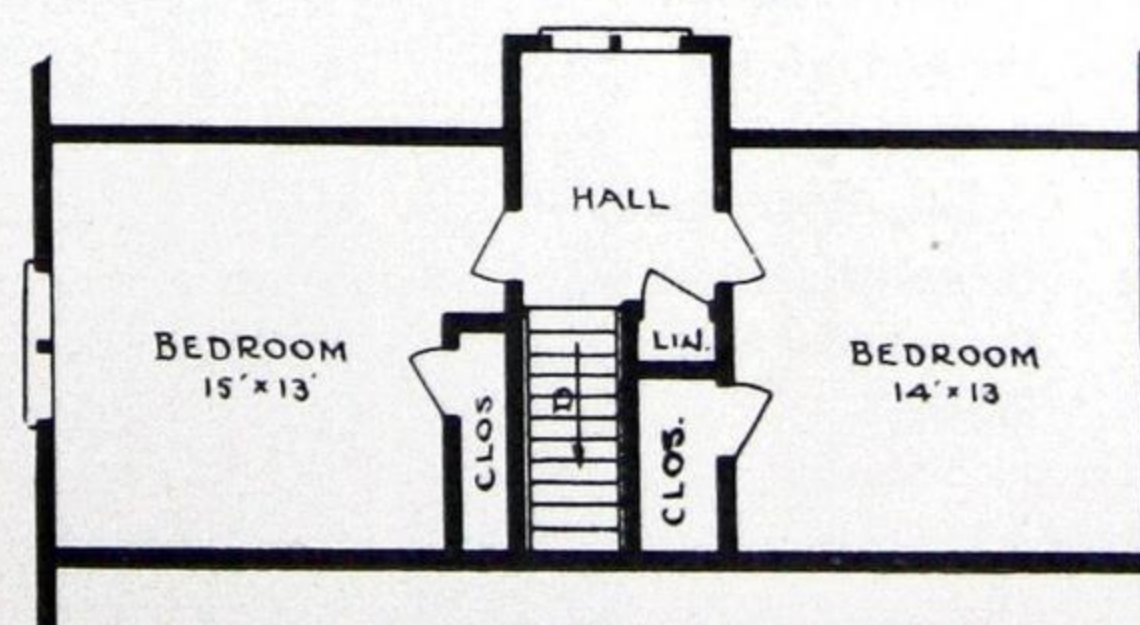

The Pilgrim Twenty

MANY people admire the Pilgrim shown on the previous page but require two additional bedrooms. The Pilgrim Twenty is the perfect answer. The Pilgrim Twenty is a reproduction of the Pilgrim with the addition of two splendid bedrooms with ample closets, a hall and linen closet upstairs. A dormer is placed in the roof at the rear to give full ceiling height in the upstairs hall. Double windows are placed in the gables at the sides and in the dormer at the rear to provide plenty of light and ventilation upstairs. The price given on the price list includes sub-flooring, hardwood flooring, and all materials required

for finishing the upstairs. No where else will you find a home providing living room, good size dinette, kitchen, four bedrooms and bathroom of such attractive design at such a moderate cost as the Pilgrim Twenty. The roof slope appears only slightly in the upstairs ceiling as shown by the diagram below yet the Pilgrim Twenty retains attractive bungalow lines.

The Windsor

Price Given On
Enclosed Price List

THE WINDSOR is a spacious home, providing every convenience one can desire. It is attractive with individuality of design. The front entrance opens from the verandah into a vestibule with its coat closet to the left. The large living room is well lighted by a double mullion window and, if desired, a fireplace may be built in the side wall. A framed opening leads to the dining room which, like the living room, has dignified double mullion windows. The kitchen is complete with breakfast nook and grade entrance to the garden and basement.

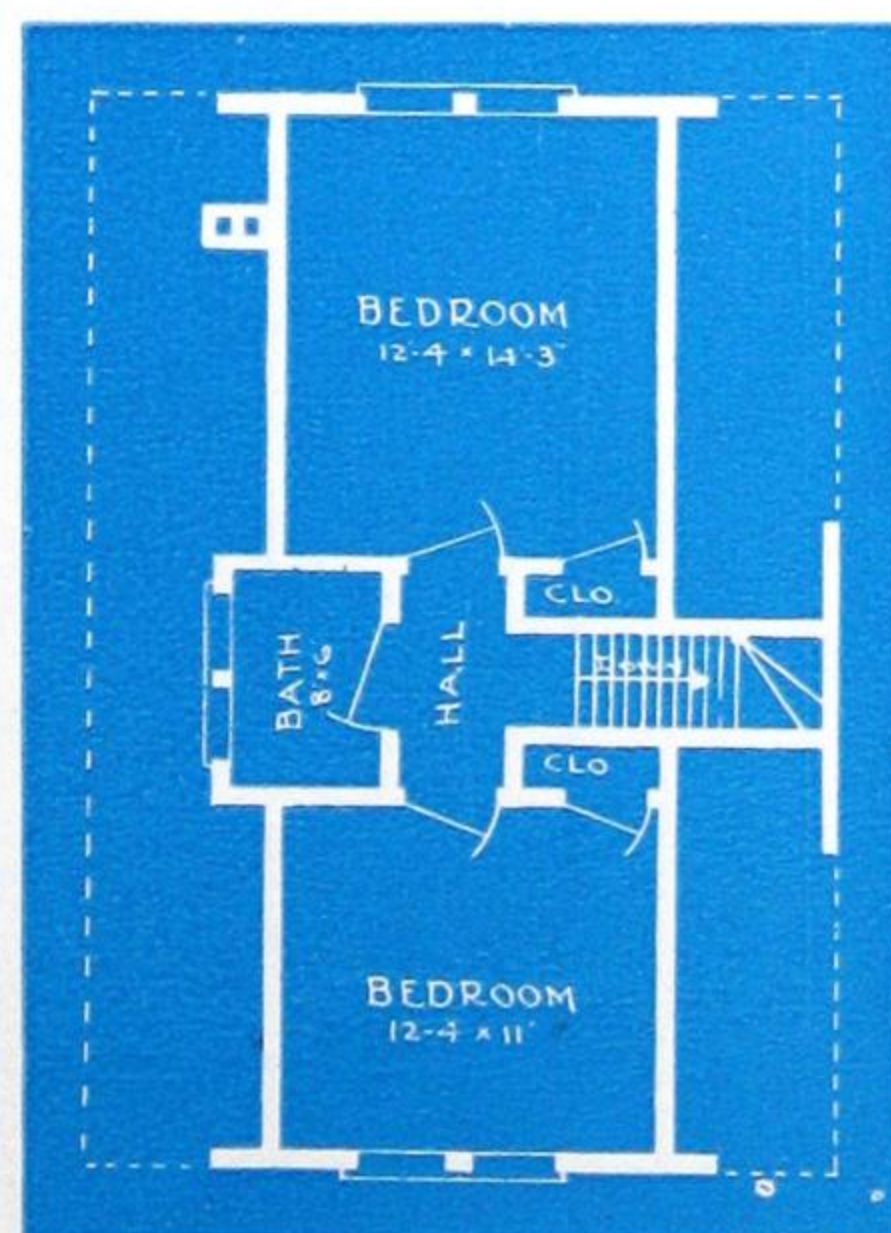

THE WINDSOR — FIRST FLOOR

There is also a bedroom on the ground floor, a linen closet and spacious hall. Upstairs are two fine bedrooms, with closets, and the bathroom.

If it is desired to have the bathroom downstairs, it can be arranged without additional cost by opening the main stairway from the living room and utilizing the outer portion of the downstairs hall as a bathroom, size 7 feet by 6 feet.

The exterior appearance is just as attractive and dignified as the interior is convenient and spacious. The exterior walls are shown finished with stucco, although you may use siding, shingles or brick veneer if you prefer.

The plans of any Aladdin Home will be reversed without charge if it will suit your building site better that way.

THE WINDSOR — SECOND FLOOR

Every Aladdin Home Specially INSULATED to KEEP IN THE HEAT and to KEEP OUT THE COLD

We supply Aladdin Heavy Interwall Insulation for entirely covering and insulating all exterior walls. It is put on outside the sheathing, between it and the siding, shingles, stucco or brick veneer, whichever you select for exterior finish. It seals the house tightly. Heat or Cold cannot go through it.

Insulating Rock Wool insulates and protects the ceiling and roof, keeping furnace heat inside in winter and the hot rays of the sun outside in summer.

ROOMS ON ONE FLOOR, SEE NEXT PAGE.

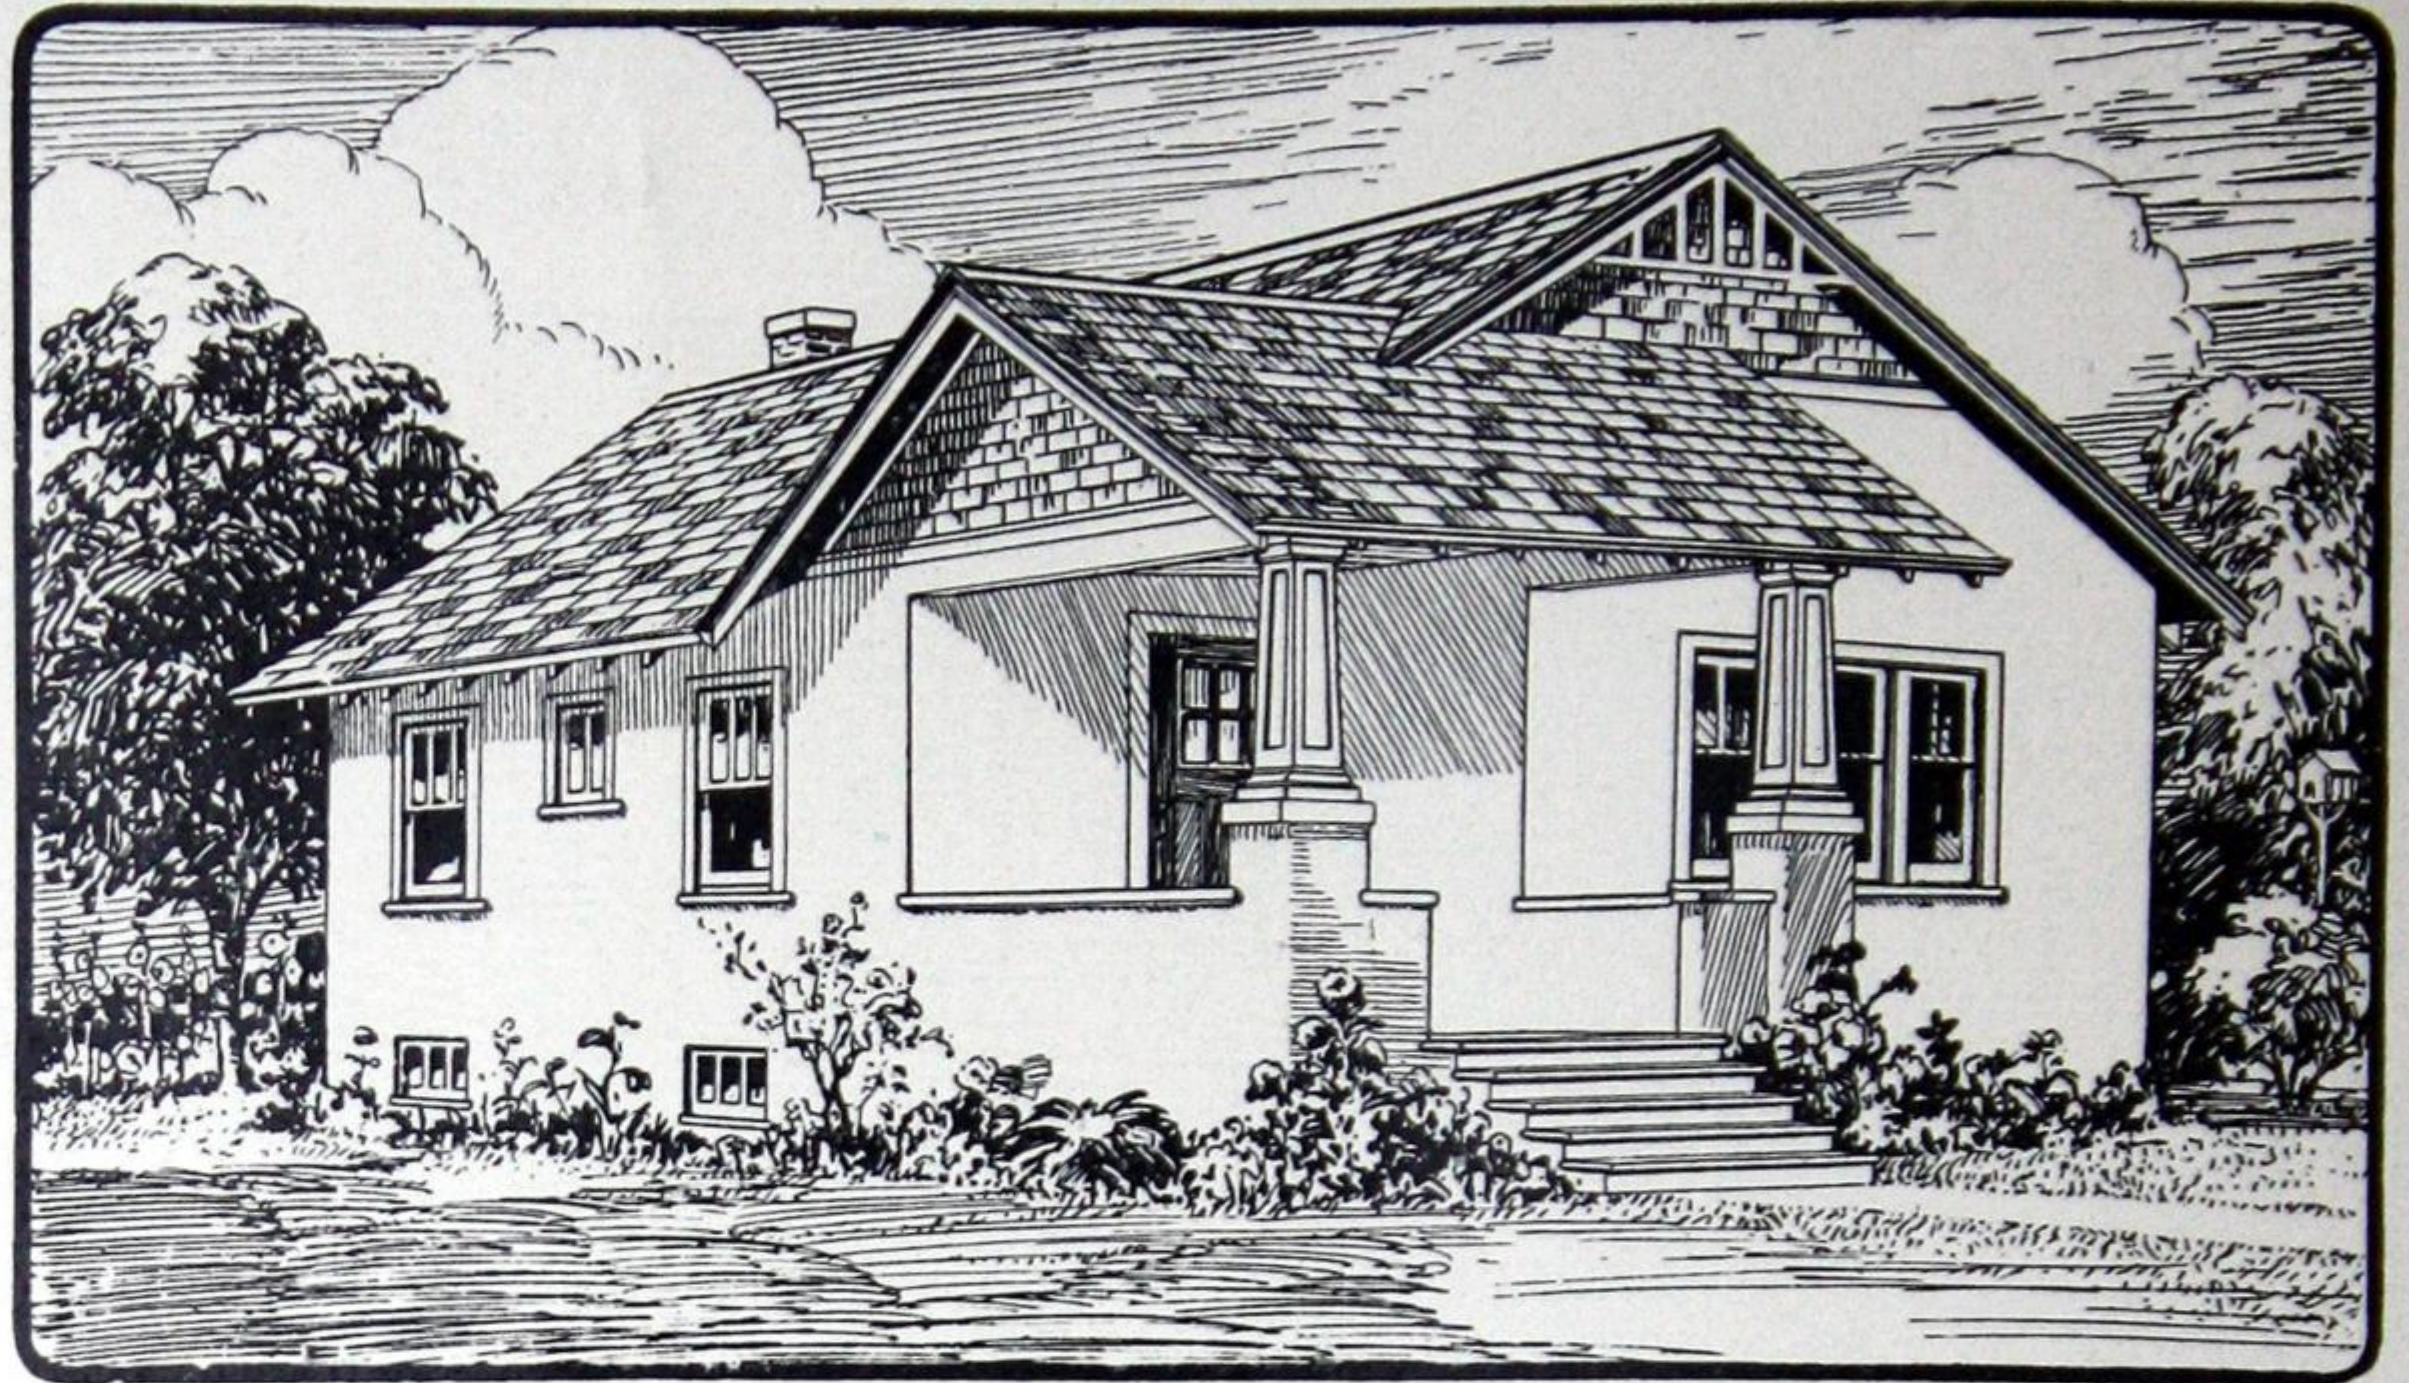

The WINDSOR "Master Series" of Bungalows — Five Plans

This is the Windsor Bungalow 
It has one storey only —
No second floor.

The WINDSOR BUNGALOWS

The Windsor "Master Series" of Bungalows is our most recent achievement. They are meeting with instant popular approval. The lines of the home are delightful and the many unusual features of roof, gables, verandah, panelled columns and attractive window groupings lend themselves to a contrasting and harmonious color scheme. It can be truly said that, if you live in a Windsor Bungalow there is no handsomer home in town than yours.

The Master Series is a group of five Bungalows. Each one is a triumph of design in which the maximum of convenience and comfort is arranged in an architecturally perfect home at the absolute minimum of cost.

Like any Aladdin Home, the Windsor may be finished on the exterior walls with siding, shingles, stucco or brick veneer. Ask for quotation if you prefer a type of finish other than that given on the price list. Best quality asphalt slate shingles of the colour you select are furnished for the roof of every Aladdin Home.

"WINDSOR" BUNGALOW No. 1 22' x 28'

This smallest of the series is adapted to the family that requires a large kitchen but no dining room. The two bedrooms each have closets. The bathroom can be used as a pantry, if desired. The grade cellar entrance is a great convenience.

"WINDSOR" BUNGALOW No. 2 22' x 30'

Three bedrooms are provided in this design. The living room and kitchen are both large and well lighted. The bathroom is located to permit its being used as a pantry, if desired. All bedrooms have closets. Bungalow No. 2 is a compact and convenient home.

"WINDSOR" BUNGALOW No. 3 22' x 34'

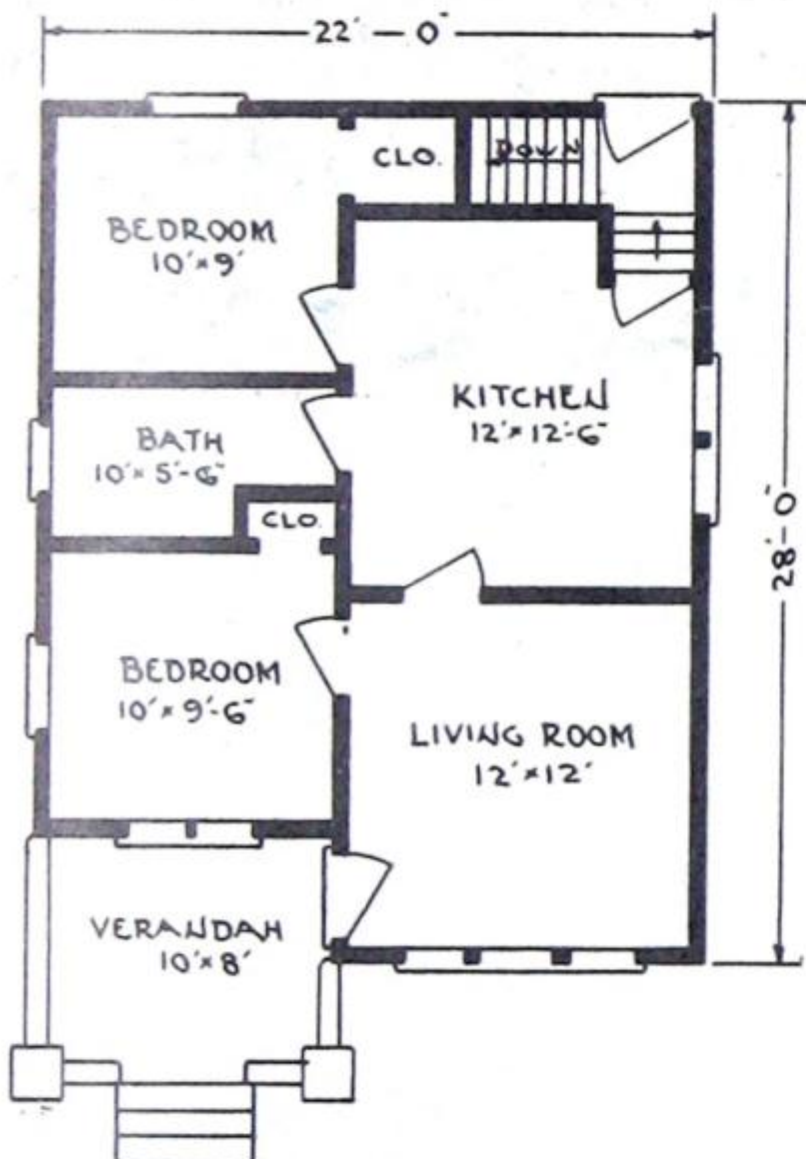

The front door opens to a vestibule with coat closet from which access is had to the living room and dining room. A grade cellar entrance goes down from the kitchen. There is a center hall off the dining room from which the bathroom and bedrooms are reached.

"WINDSOR" BUNGALOW No. 4 22' x 34'

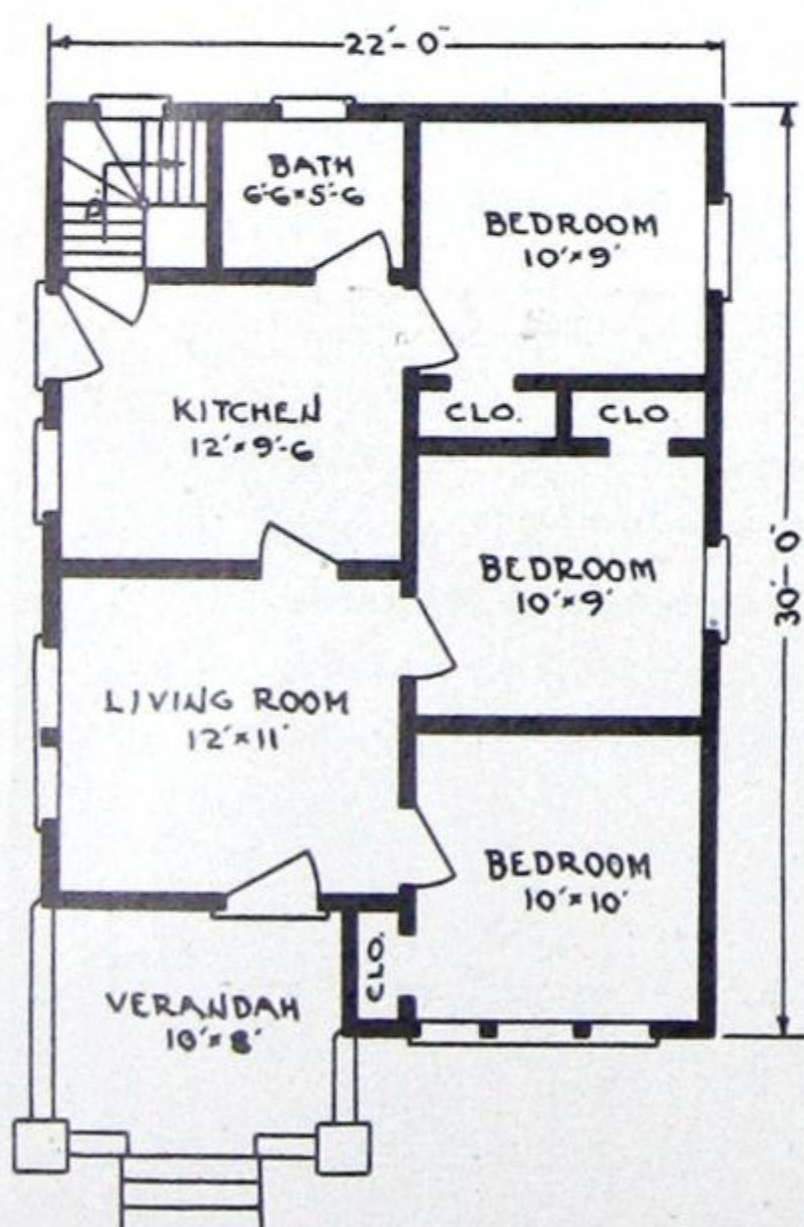

A compact and roomy three-bedroom home with every essential but no waste space is provided by Plan No. 4. Living room, dining room, kitchen and bath are conveniently arranged.

"WINDSOR" BUNGALOW No. 5 22' x 38'

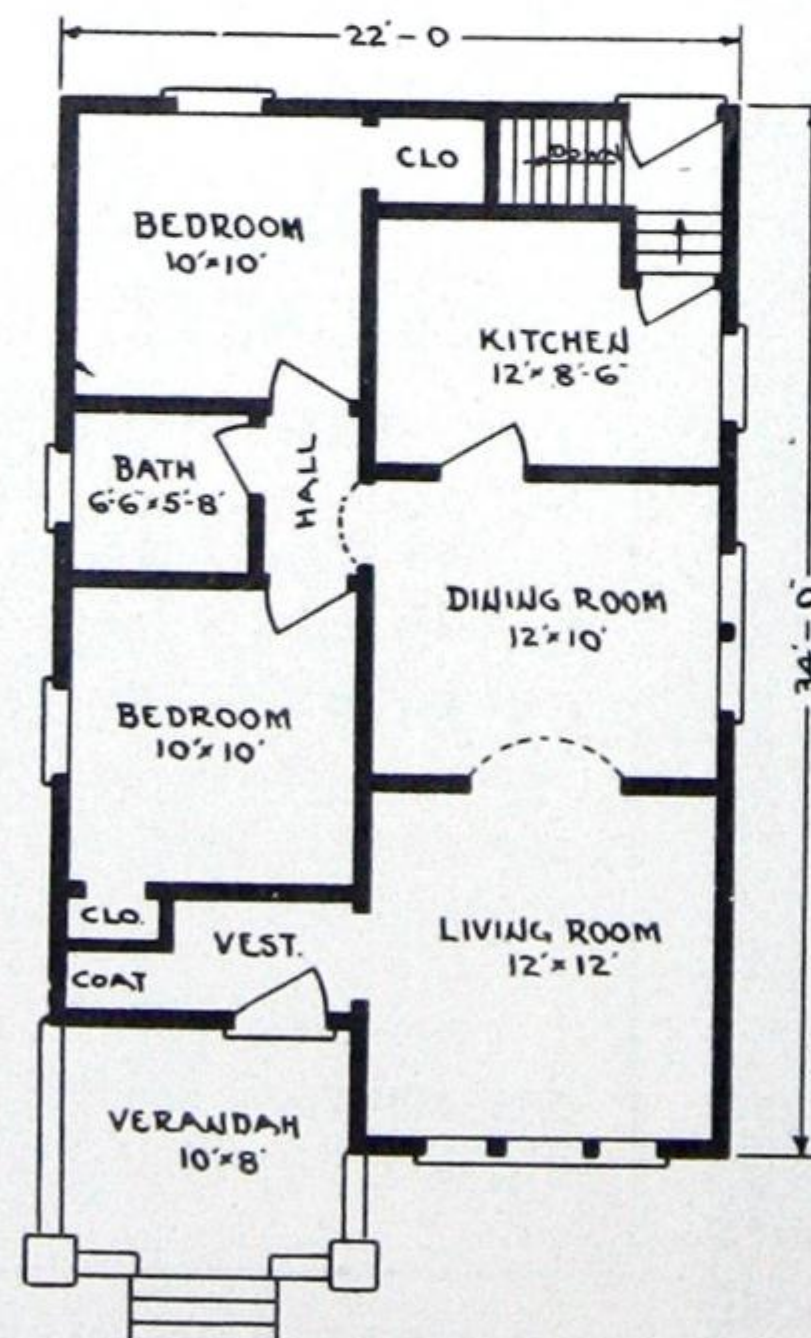

Plan No. 5 is a very complete and convenient arrangement. Note the central hall opening to the bathroom and two of the bedrooms. The bedrooms have splendid closet space. It is a perfect bungalow plan in every respect and is a great satisfaction to every owner.

The Victoria XVII

Price Given On
Enclosed Price List

THE attractive exterior lines, the hooded entrance with the Colonial benches and door, the distinctive window grouping, French doors in the dining room and side of the living room and the excellent arrangement of floor plan make the Victoria a particularly popular home. On entering the living room you can see out through the glass doors to the piazza and the dining room, a distance of about forty feet to the rear of the dining room. The Victoria is shown built with siding on the outside walls but may be built with stucco or brick veneer if you prefer. If it will suit your building lot to better advantage the plan of the Victoria will be reversed without extra cost. This means that the rooms shown on the left side will be on the right side and the rooms shown on the right side will be on the left side.

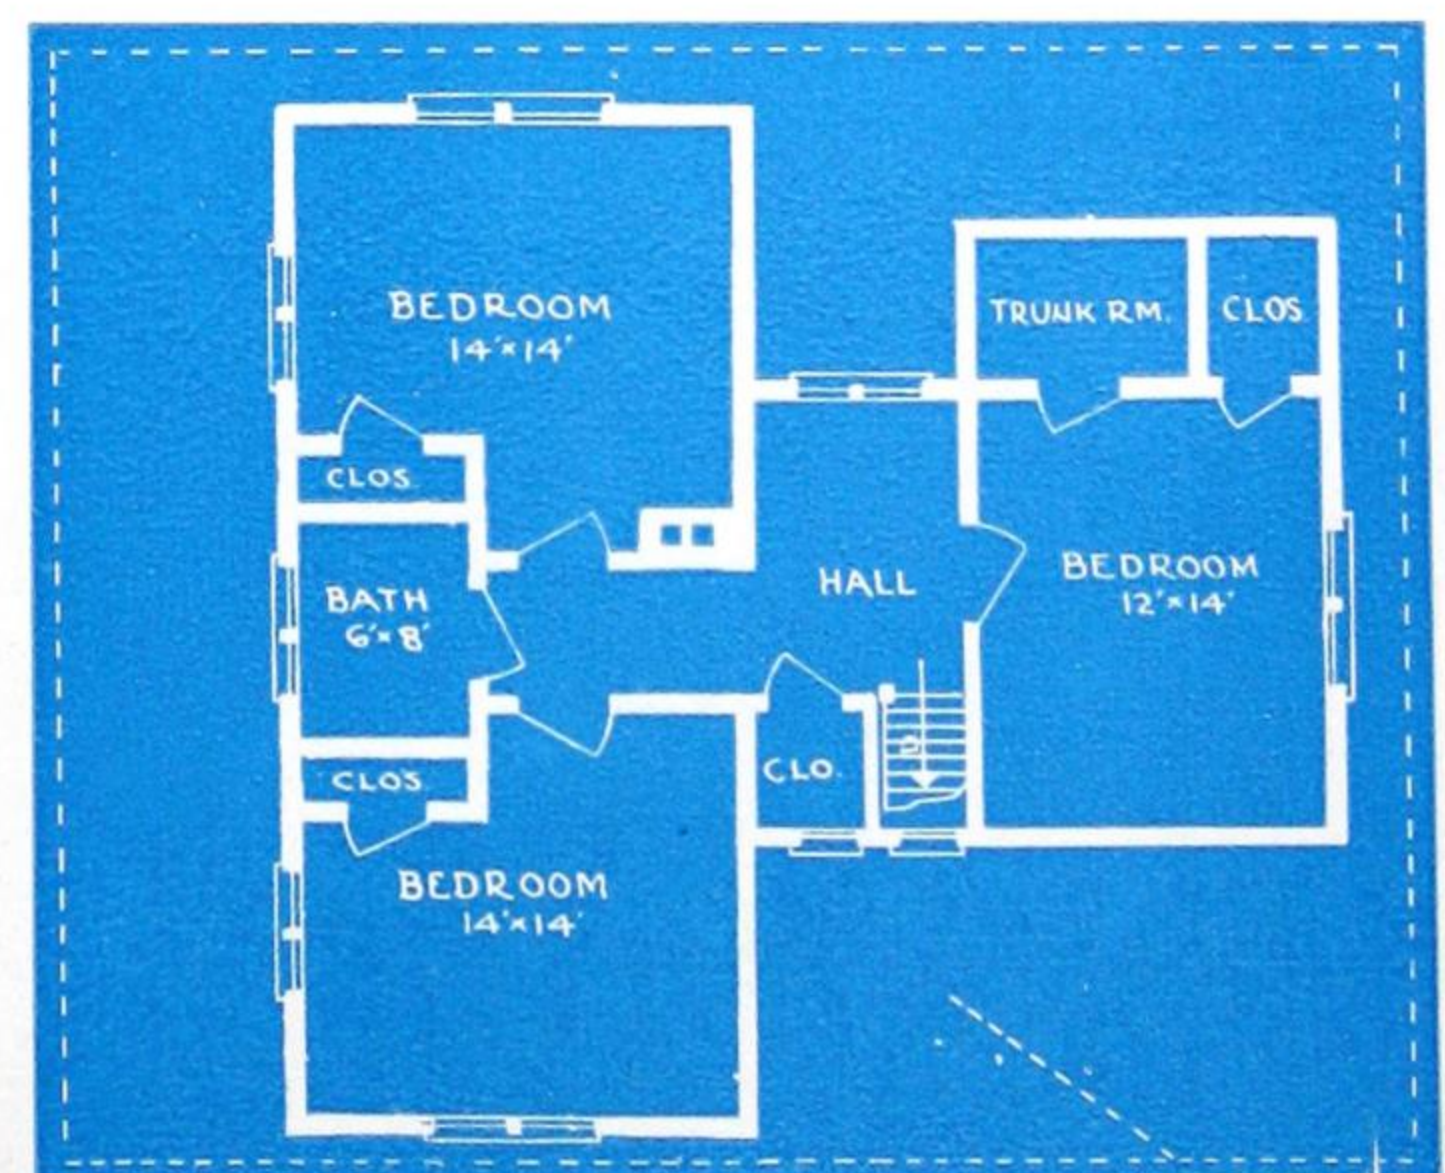

VICTORIA XVII — FIRST FLOOR PLAN

The floors of the piazza and the front porch are of concrete or flag stones.

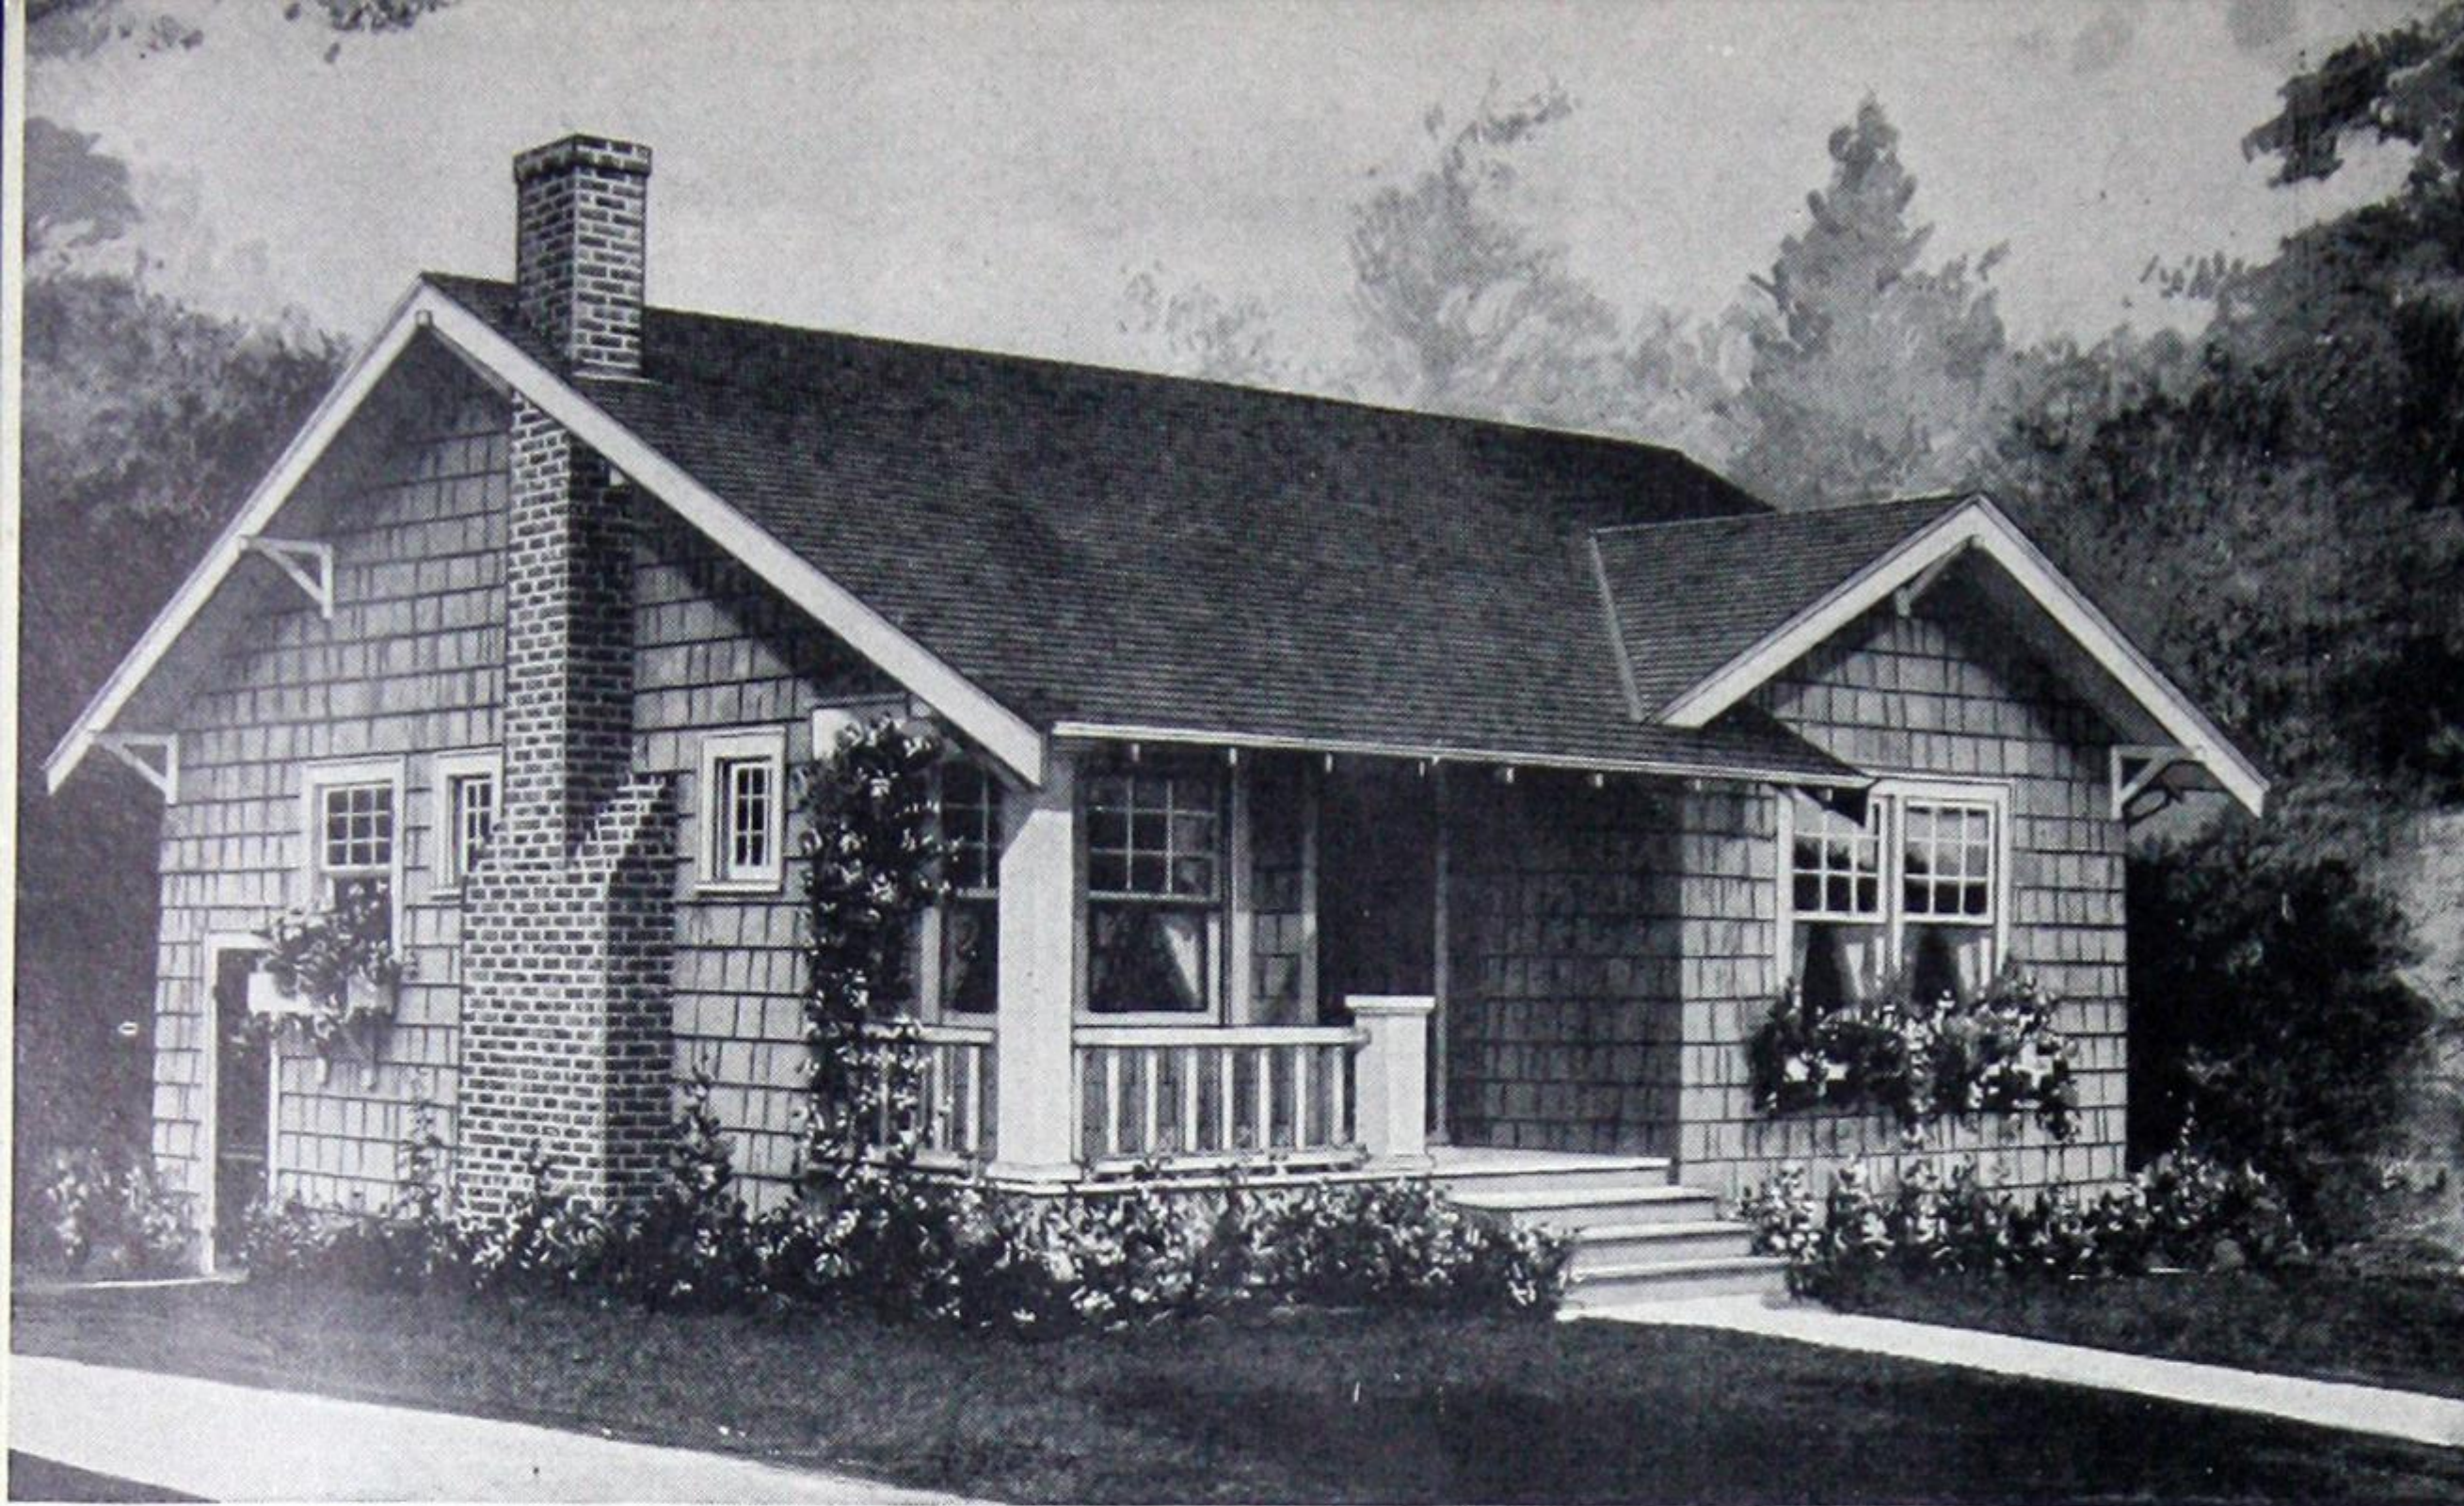

If desired, the piazza will be taken into the main body of the house and made into a heated sun-room with windows on both sides. The additional cost of the materials required for this purpose will be quoted upon request.

MELROSE — PLAN A

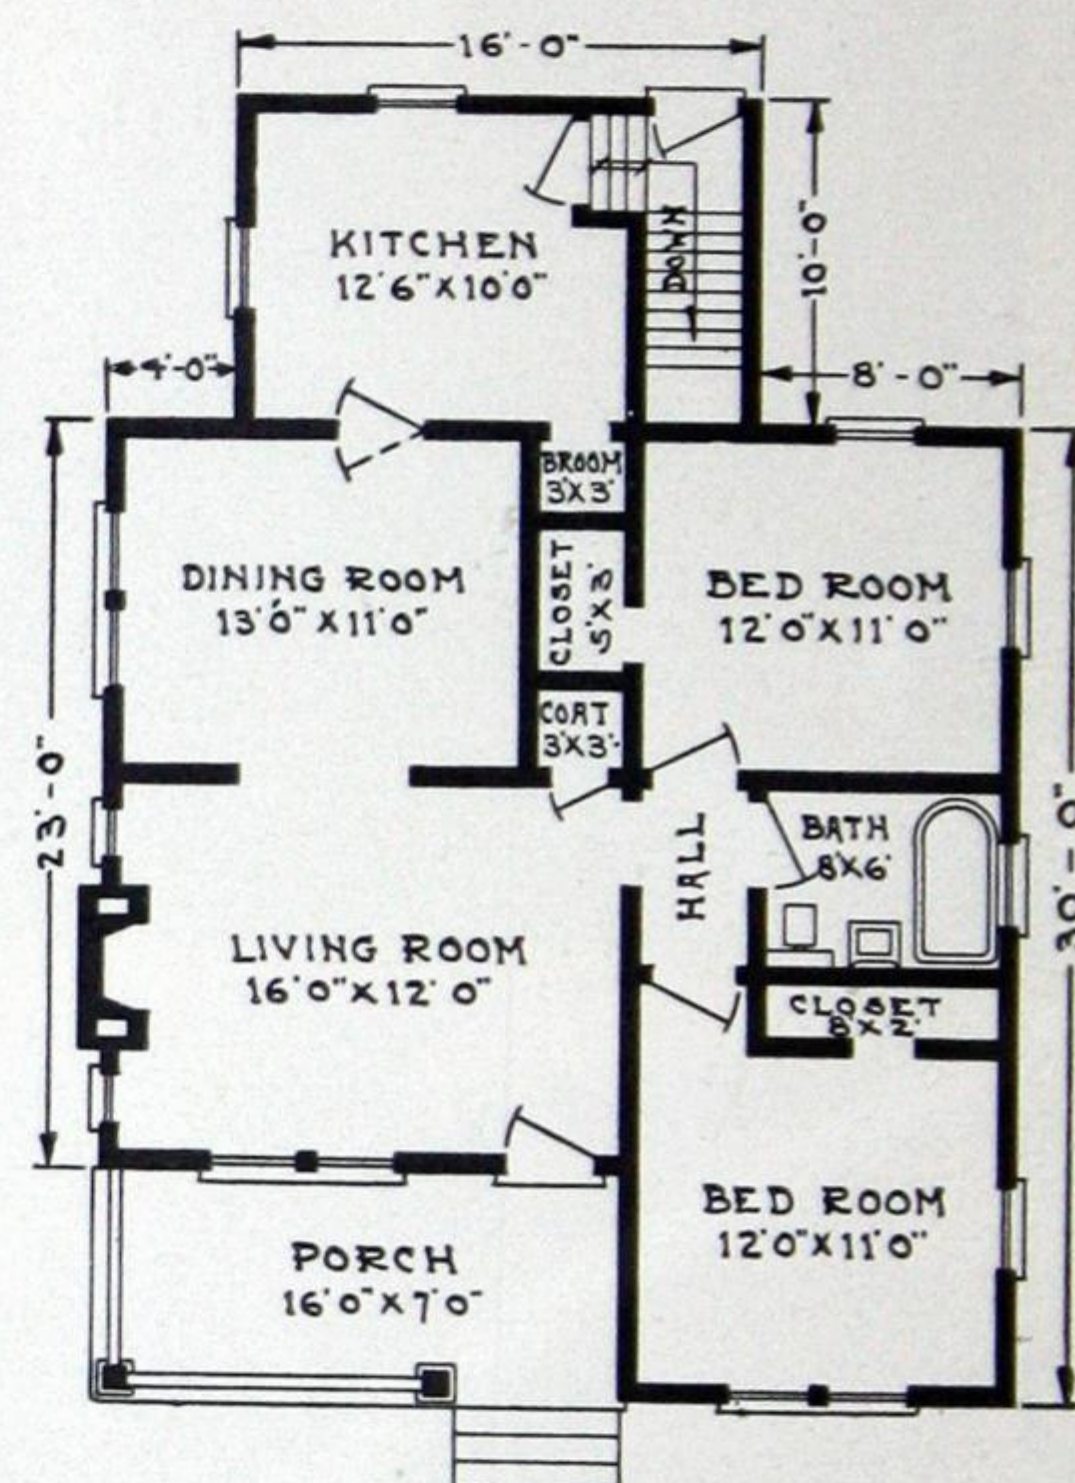

The Melrose

THE inset front porch is an attractive feature of this snug home which provides unusual accommodation at moderate cost. Shown above finished on the exterior walls with Cedar shingles, the Melrose may be built with siding without additional cost or with stucco or brick veneer.

If you do not intend to build the fireplace, the two small windows in the end of the living room will be eliminated and one full size window furnished in their place at no extra cost. Plan A has a conveniently located dinette, or dining alcove, off from the kitchen. Plan B has a full size dining room.

The high quality of all materials and the substantial construction of every Aladdin Home is your assurance of complete satisfaction. Aladdin Read-Cut Homes are strong and permanent. The Aladdin Read-Cut System not only saves you time, money and labor, but gives your home greater strength. It has the strength of a well built home — the quality which means a lifetime home.

Ask for complete information regarding the Melrose or any other design you favor.

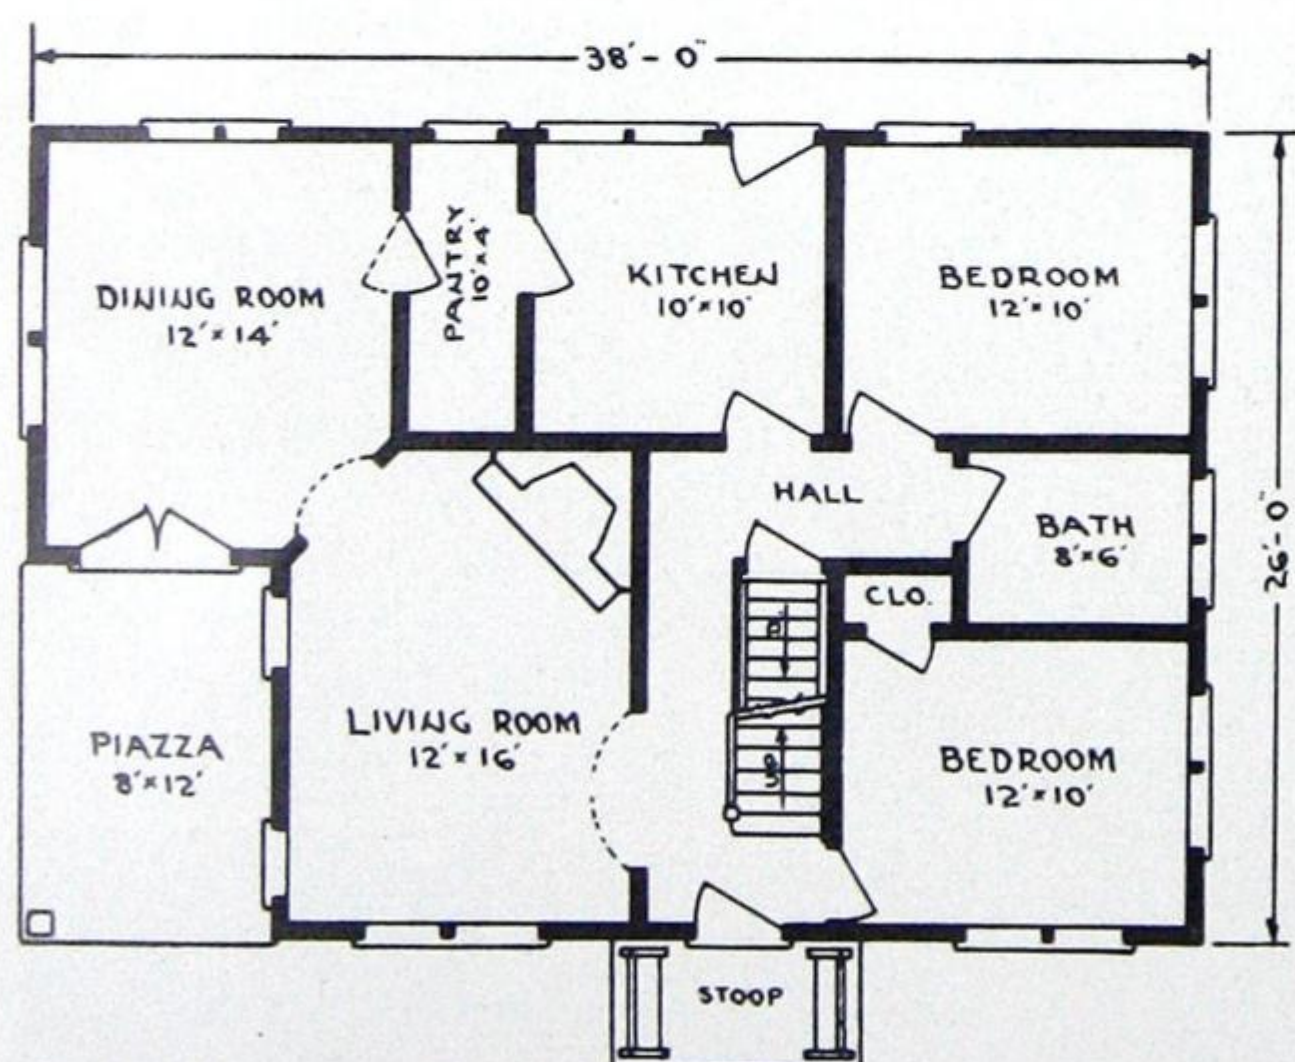

MELROSE — PLAN B

The Victoria 109

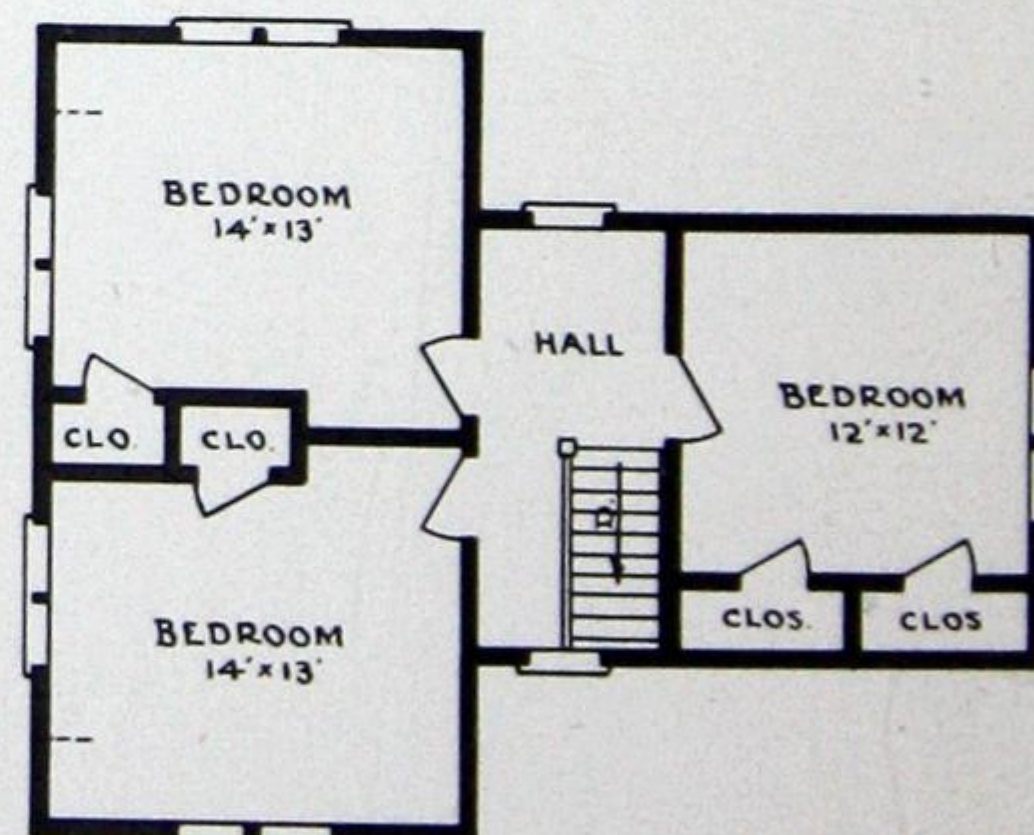

THE Victoria 109 is a reproduction of the Victoria XVII shown on the previous page and is lower in cost. It is designed for the many who admire the Victoria XVII but do not require as large a home.

The Victoria 109 does not have a bathroom upstairs but provision can be made for a wash room and toilet upstairs by placing a partition and door across the rear of the upstairs hall. The small cost of the added materials required for this purpose will be quoted upon request.

The piazza can be taken in to the main body of the house and changed into a heated sun-room with windows on both sides. The added cost for the required materials, including the floor, will be quoted upon request.

THE excellent balance of the exterior of the Brentwood is immediately apparent and a study of the plans below reveals two very convenient and well laid out interior arrangements. The terraced entrance is surmounted by a gabled vestibule and flanked by attractive windows.

Two sizes are shown for the Brentwood. Each has many desirable features and will furnish the owner with the greatest satisfaction. Plan No. 1 is 32 feet by 24 feet with well-

proportioned rooms and a maximum of convenience. Note the alcove dinette with particularly splendid lighting. The two bedrooms, bath, kitchen and living room are all excellent size. Plan No. 2 is smaller, 28 feet by 22 feet, and retains the same attractive lines.

The very finest of material goes into every Aladdin Home and it is only after many safeguards and inspections we are satisfied that each piece is the very best for its respective purpose.

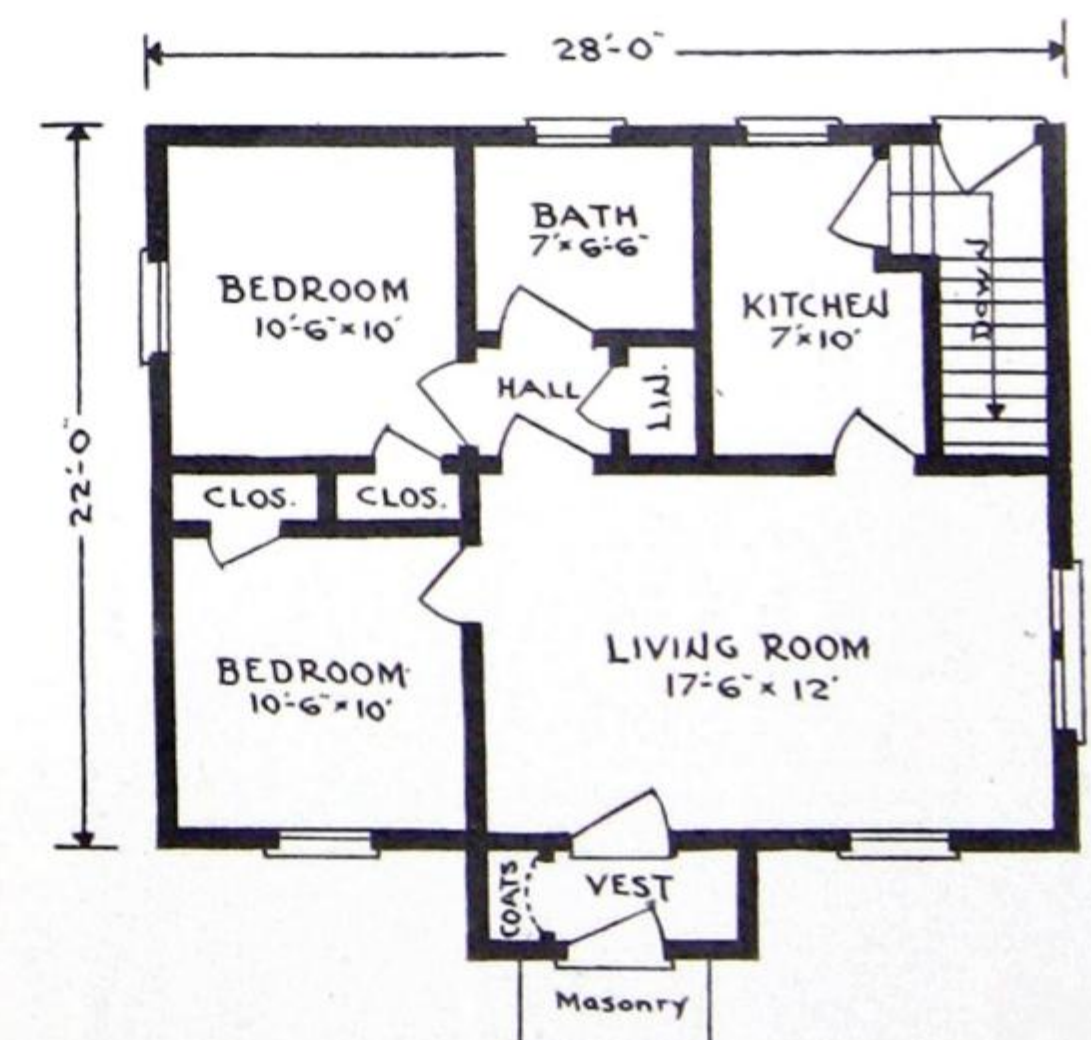

BRENTWOOD PLAN No. 1

THE ALADDIN SYSTEM IS BUILT ON THIS PRINCIPLE

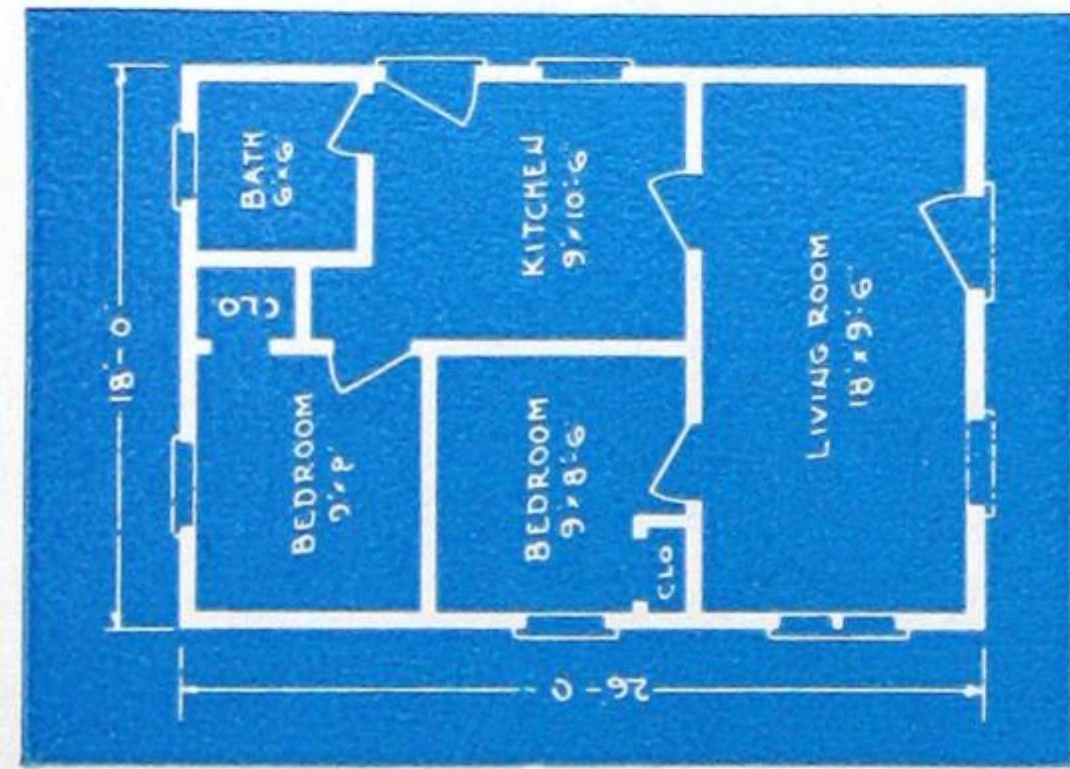

That modern power-driven machines can do immensely better work at lower cost than hand labor—that all work that can be done by machine should be so done. The lumber for Aladdin Homes is cut to fit in the Aladdin Mills and is all ready for erection without measuring, marking, cutting or fitting.

THIRTY YEARS' ALADDIN SUCCESS

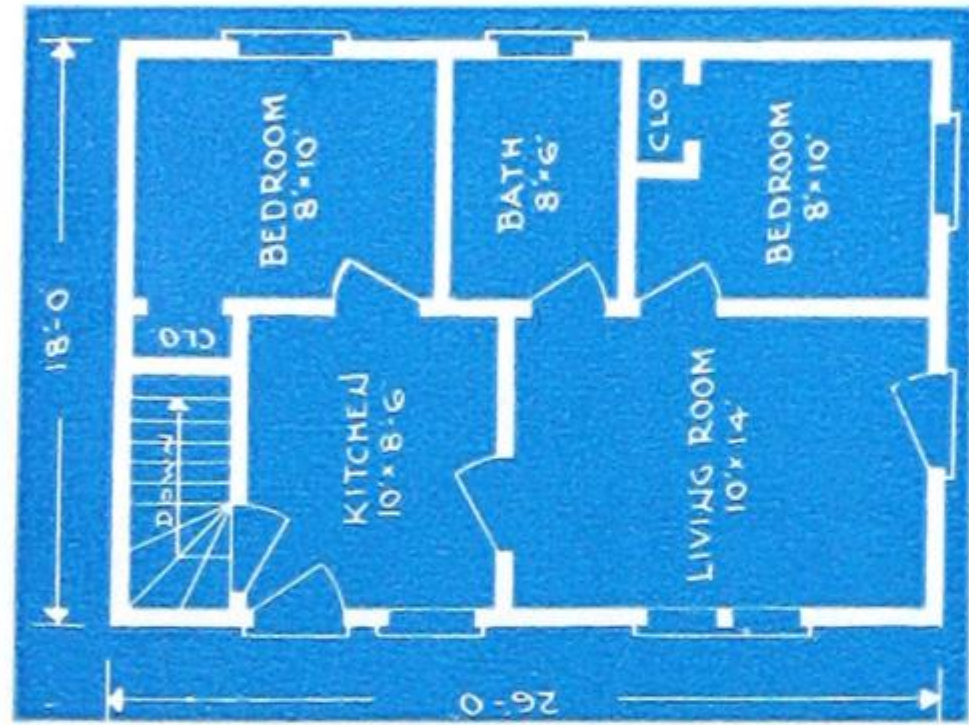

The Aladdin Read-Cut System was planned and put into operation over thirty years ago. Each year has shown a big increase in the number of Aladdin Homes erected and the large number of delighted Aladdin Home owners. The thousands of Aladdin Homes throughout Canada are real proof of merit, value and satisfaction.

ALADDIN HOMES — BEST THAT MONEY CAN BUY

An Aladdin Home is built of the same joists, studding, rafters, wall sheathing, flooring, doors, windows, stairs, trim, etc., that are built into the finest houses you have seen. The only difference between an Aladdin Home and the best house constructed in the old-fashioned way is the method by which the finished result is accomplished, at much lower cost. We design our homes to cut without waste, cut our materials in large quantities by the most modern machinery, and use all materials in volume at the lowest price consistent with the very high standard of Aladdin quality.

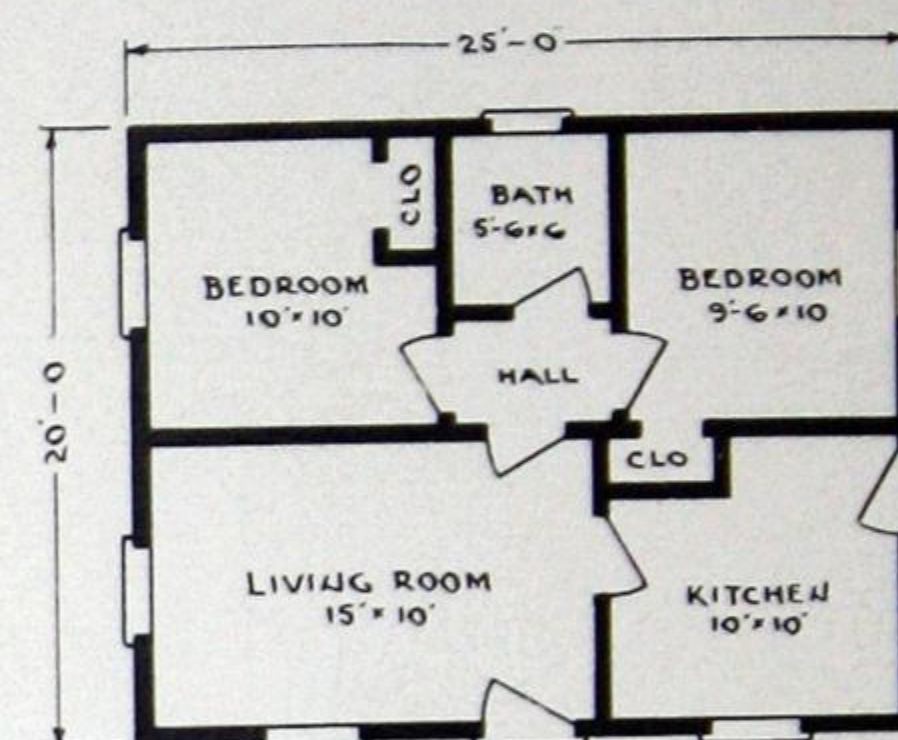

The Sunbeam

THE SUNBEAM is an attractive home of up-to-date appearance. The very same high quality materials are used in the Sunbeam as in the largest Aladdin Home. Both Plan No. 1 and Plan No. 2 are 25 feet by 20 feet in size. Plan No. 2 is designed to be built without a basement and does not have a basement stairway. The hood illustrated over the front door is included in the standard price. Every inch of space is used in both floor plans and the Sunbeam is an ideal home for those wishing to build at low cost and obtain the greatest possible amount of comfortable living accommodation. Ask for complete information regarding the Sunbeam or any other design you favor.

SUNBEAM PLAN No. 1

SUNBEAM PLAN No. 2

BUILDING WITHOUT A BASEMENT

Any Aladdin Home may be built on posts or piers without a basement. The basement stairway will be floored over without added cost. We will send you the foundation plan showing the exact location for each post or pier and supply all sills required.

MANY HOURS OF WORK ELIMINATED BY TIME-SAVING MACHINERY

The portion of the work that is the hardest in building a house and that takes the most time is measuring, marking, cutting and fitting the lumber—getting it ready to nail in place. Much time is wasted in doing things by hand that can be done much more quickly and cheaply by modern machinery.

The Aladdin Read-Cut System does away with this time consuming and expensive hand labor. The work of measuring and sawing the lumber is done at our Mill by the most modern machinery and with absolute accuracy in a small fraction of the time required to do it by hand. By purchasing the material for your home cut to size and ready to nail in place you save hours and hours of time and many dollars.

Many purchasers of Aladdin Homes do not hire a carpenter at all because with the difficult work done at our Mill it is a comparatively simple matter to nail the materials in place according to the simple and detail blueprint plans supplied.

EFFICIENT PRODUCTION METHODS

An immense number of Aladdin Homes are manufactured each year and this quantity production results in a large saving for you in building your new home, just the same as it does with any other manufactured article, automobile, refrigerator, typewriter, etc.

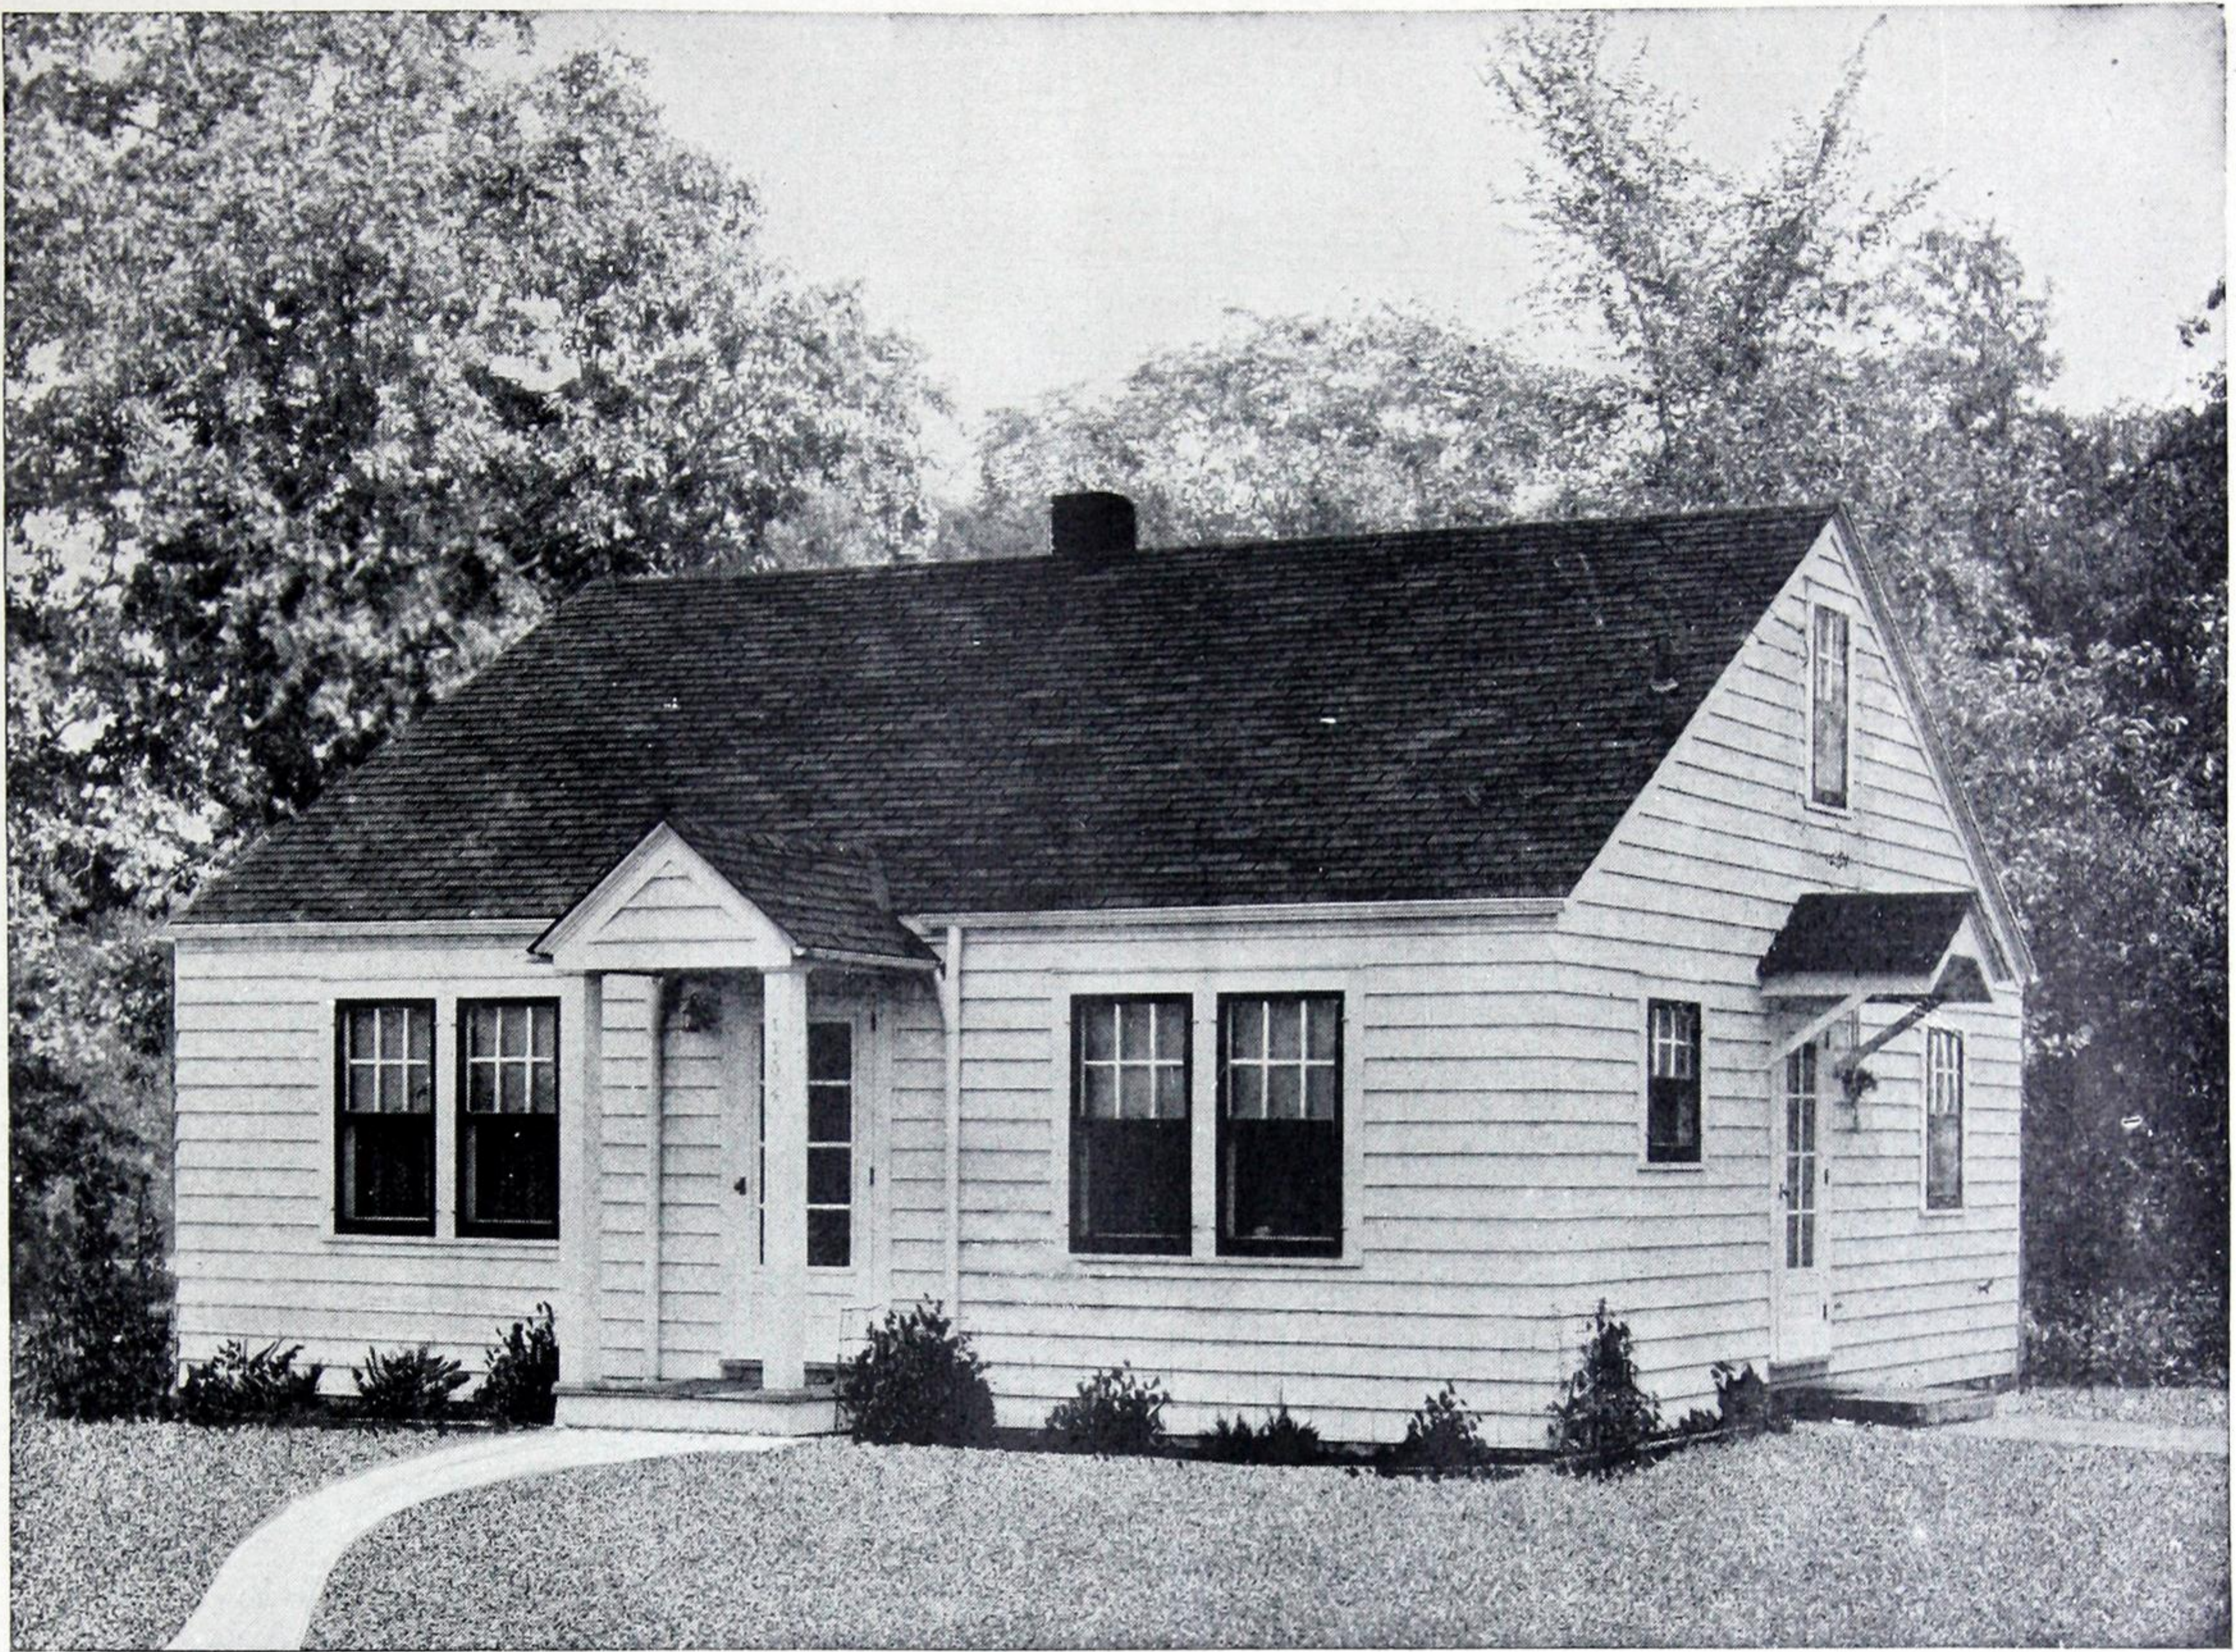

Aladdin Mills are equipped with the most modern machinery to cut lumber and to manufacture stairs, window and door frames, window sash, and the other items that go into your home. These modern and efficient production methods make it possible for us to produce the finished article at much less than the usual cost. Aladdin Homes are not built in just one community but throughout the country and we purchase all materials in very large volume at much lower prices than if we purchased in small lots. This tremendous purchasing power in itself results in a considerable saving in money to you.

NO MATERIAL WASTED

The Aladdin Read-Cut System not only saves time and money in building but also eliminates waste. Waste is an important item in building a home. No doubt you have seen the heap of wasted material lying around a newly finished house. This wasted material cost the owner just as much as the material actually used in building the house, but it was thrown away. The Aladdin Read-Cut System eliminates all of this waste and you pay only for the material that goes into the house itself. By scientific planning and modern manufacturing methods every inch of good lumber is used.

The construction of Aladdin Homes is exactly the same as that of the finest homes you have ever seen and admired. Aladdin Homes are not new or experimental—thousands have been built throughout Canada during the past thirty-five years with the greatest satisfaction to their owners. The high quality of all materials used throughout is your assurance that your Aladdin Home will be all that you expected it to be—a home you will be proud to own.

THE NORFOLK is a highly popular home and achieves the maximum comfort and convenience for every dollar expended. Two floor plans are shown below. Plan A has large living room, two bedrooms, a splendid kitchen and bath conveniently located off the hall. This plan has an enclosed

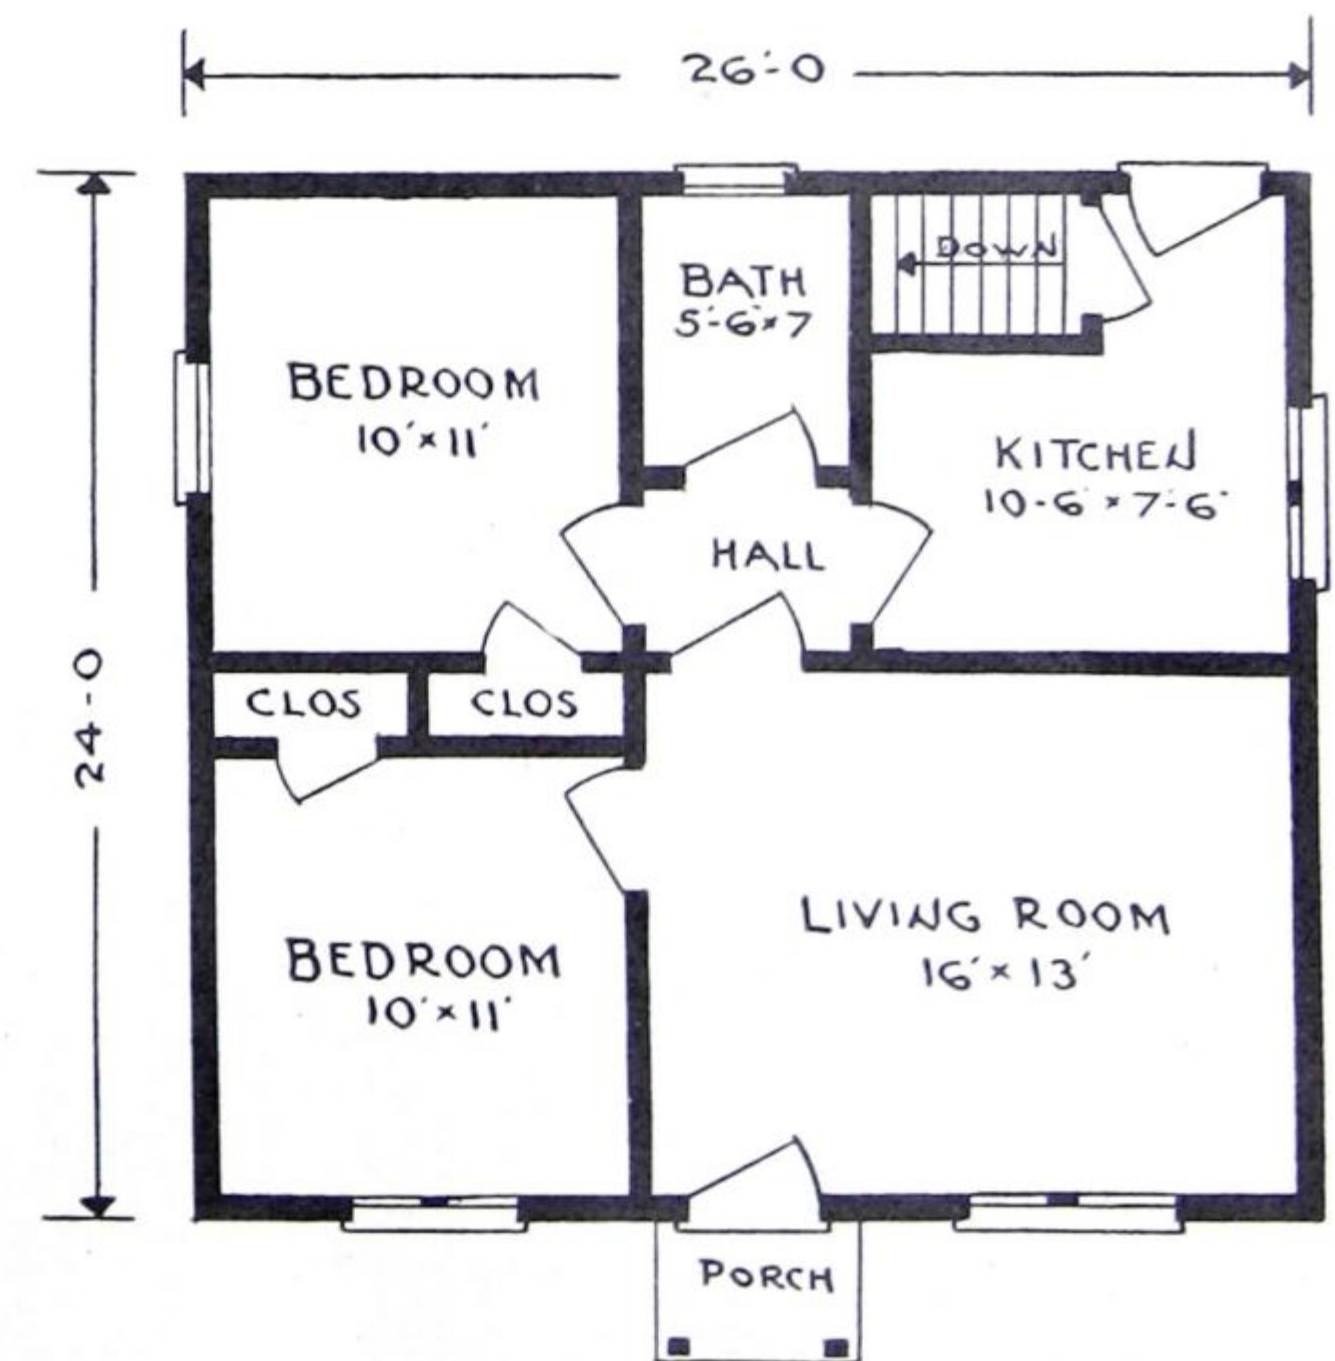

stairway to the attic and it is included in the standard price. This makes it possible to finish off the attic later for use as either storage or added living quarters. Plan B has excellent living room, two bedrooms with closets, bath and kitchen. It is smaller than Plan A and priced accordingly. The rooms in both plans are spacious and conveniently arranged.

NORFOLK PLAN A

MANY unusual features distinguish this attractive and original home. Note the hood, supported by well proportioned brackets, which graces the front entrance. The roof lines of this home are particularly distinctive. In both plans, the living room is large and given greater spaciousness by the alcove dinette. The kitchen has light and exposure on three

sides. Two bedrooms, with ample closets, hall and bath offer every comfort and convenience. The genuine quality of all materials in Aladdin Homes is a great satisfaction to every owner. Remember, Aladdin's guarantee of Complete Satisfaction means absolute protection in building the Aladdin way.

The Chatham

Price Given On
Enclosed Price List

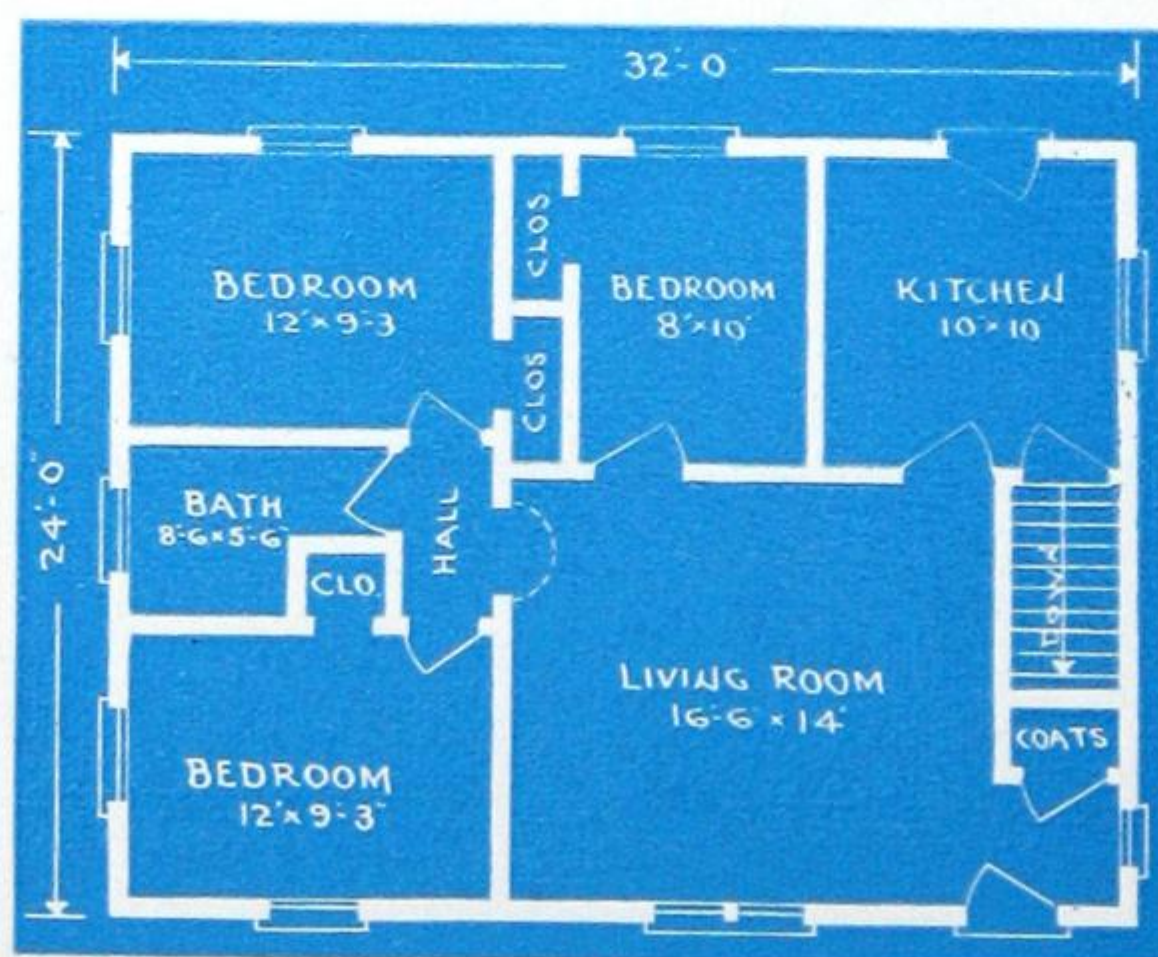

THE CHATHAM is one of the finest small homes ever designed. It is a compact home of up-to-date appearance. Every dollar invested brings the maximum of convenience and comfort. The quality of materials used in the Chatham is identical with that used in the largest Aladdin Homes. Three

fine interior arrangements are offered for your choice. Plan No. 2 incorporates three bedrooms while Plan No. 1 and Plan No. 3 have two bedrooms. You will note that in all three plans the rooms have double exposure, windows on two sides to admit the greatest amount of light and air. The Chatham is one of our most popular homes.

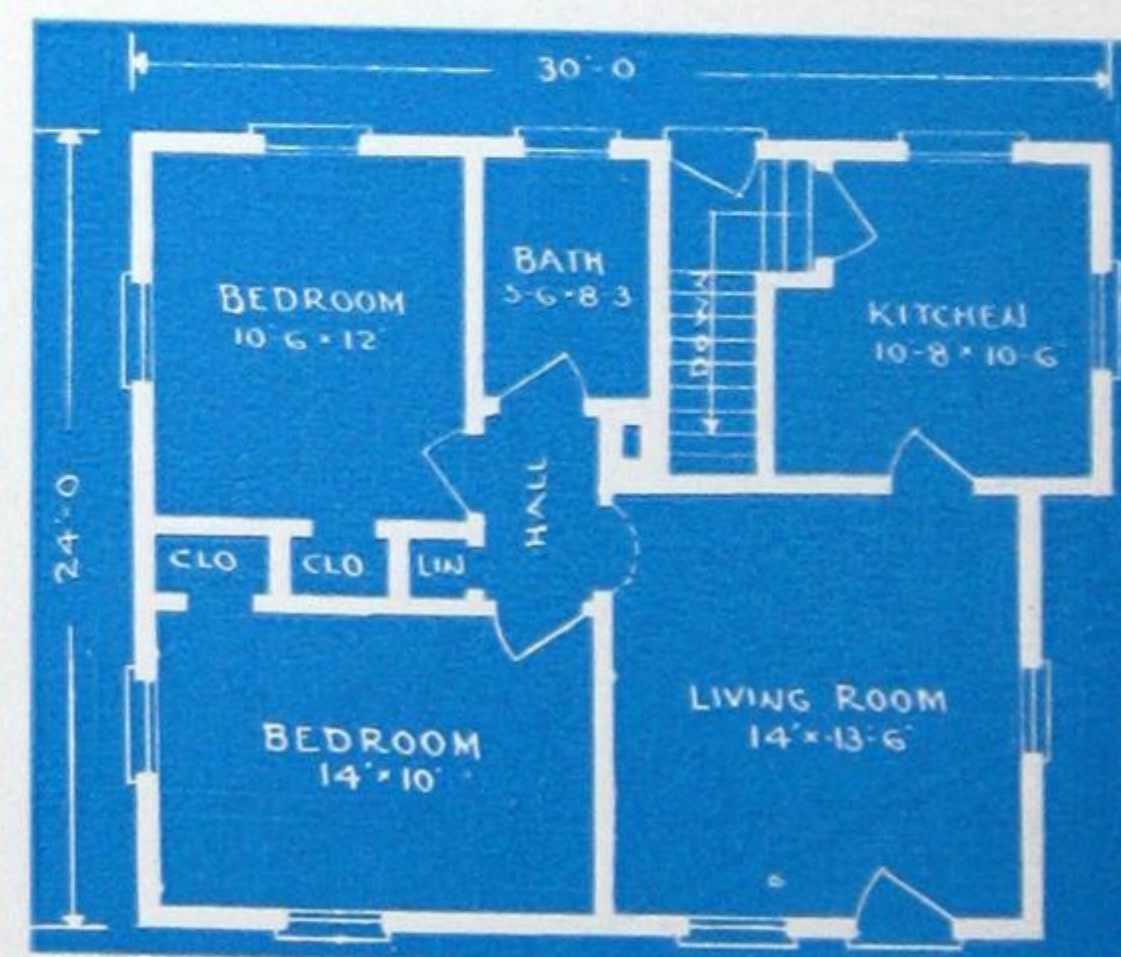

**Good Materials Plus Good Construction and Correct Architecture Make
ALADDIN HOMES the Outstanding HOME VALUE of All Time**

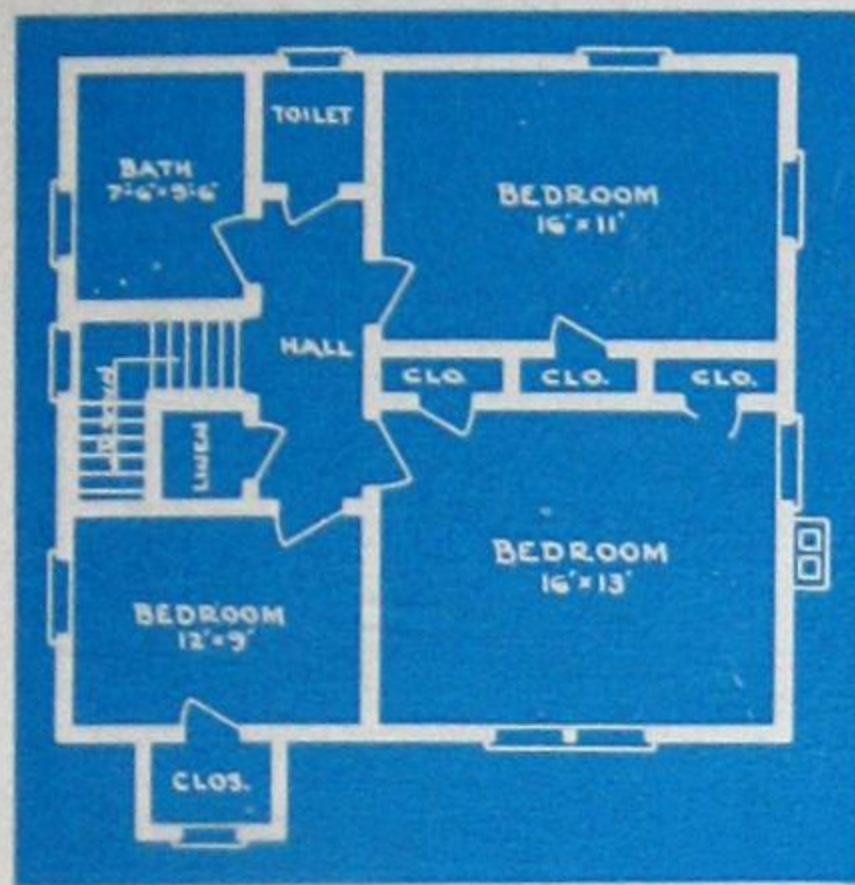

CHATHAM PLAN No. 1

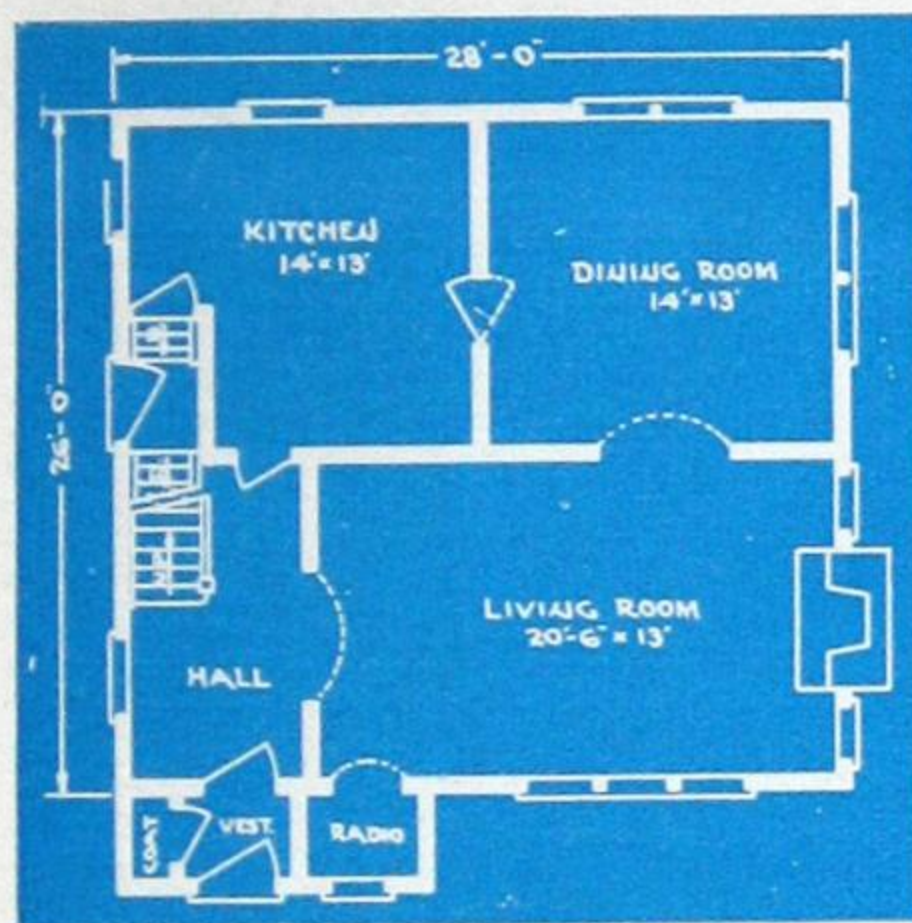

CHATHAM PLAN No. 2

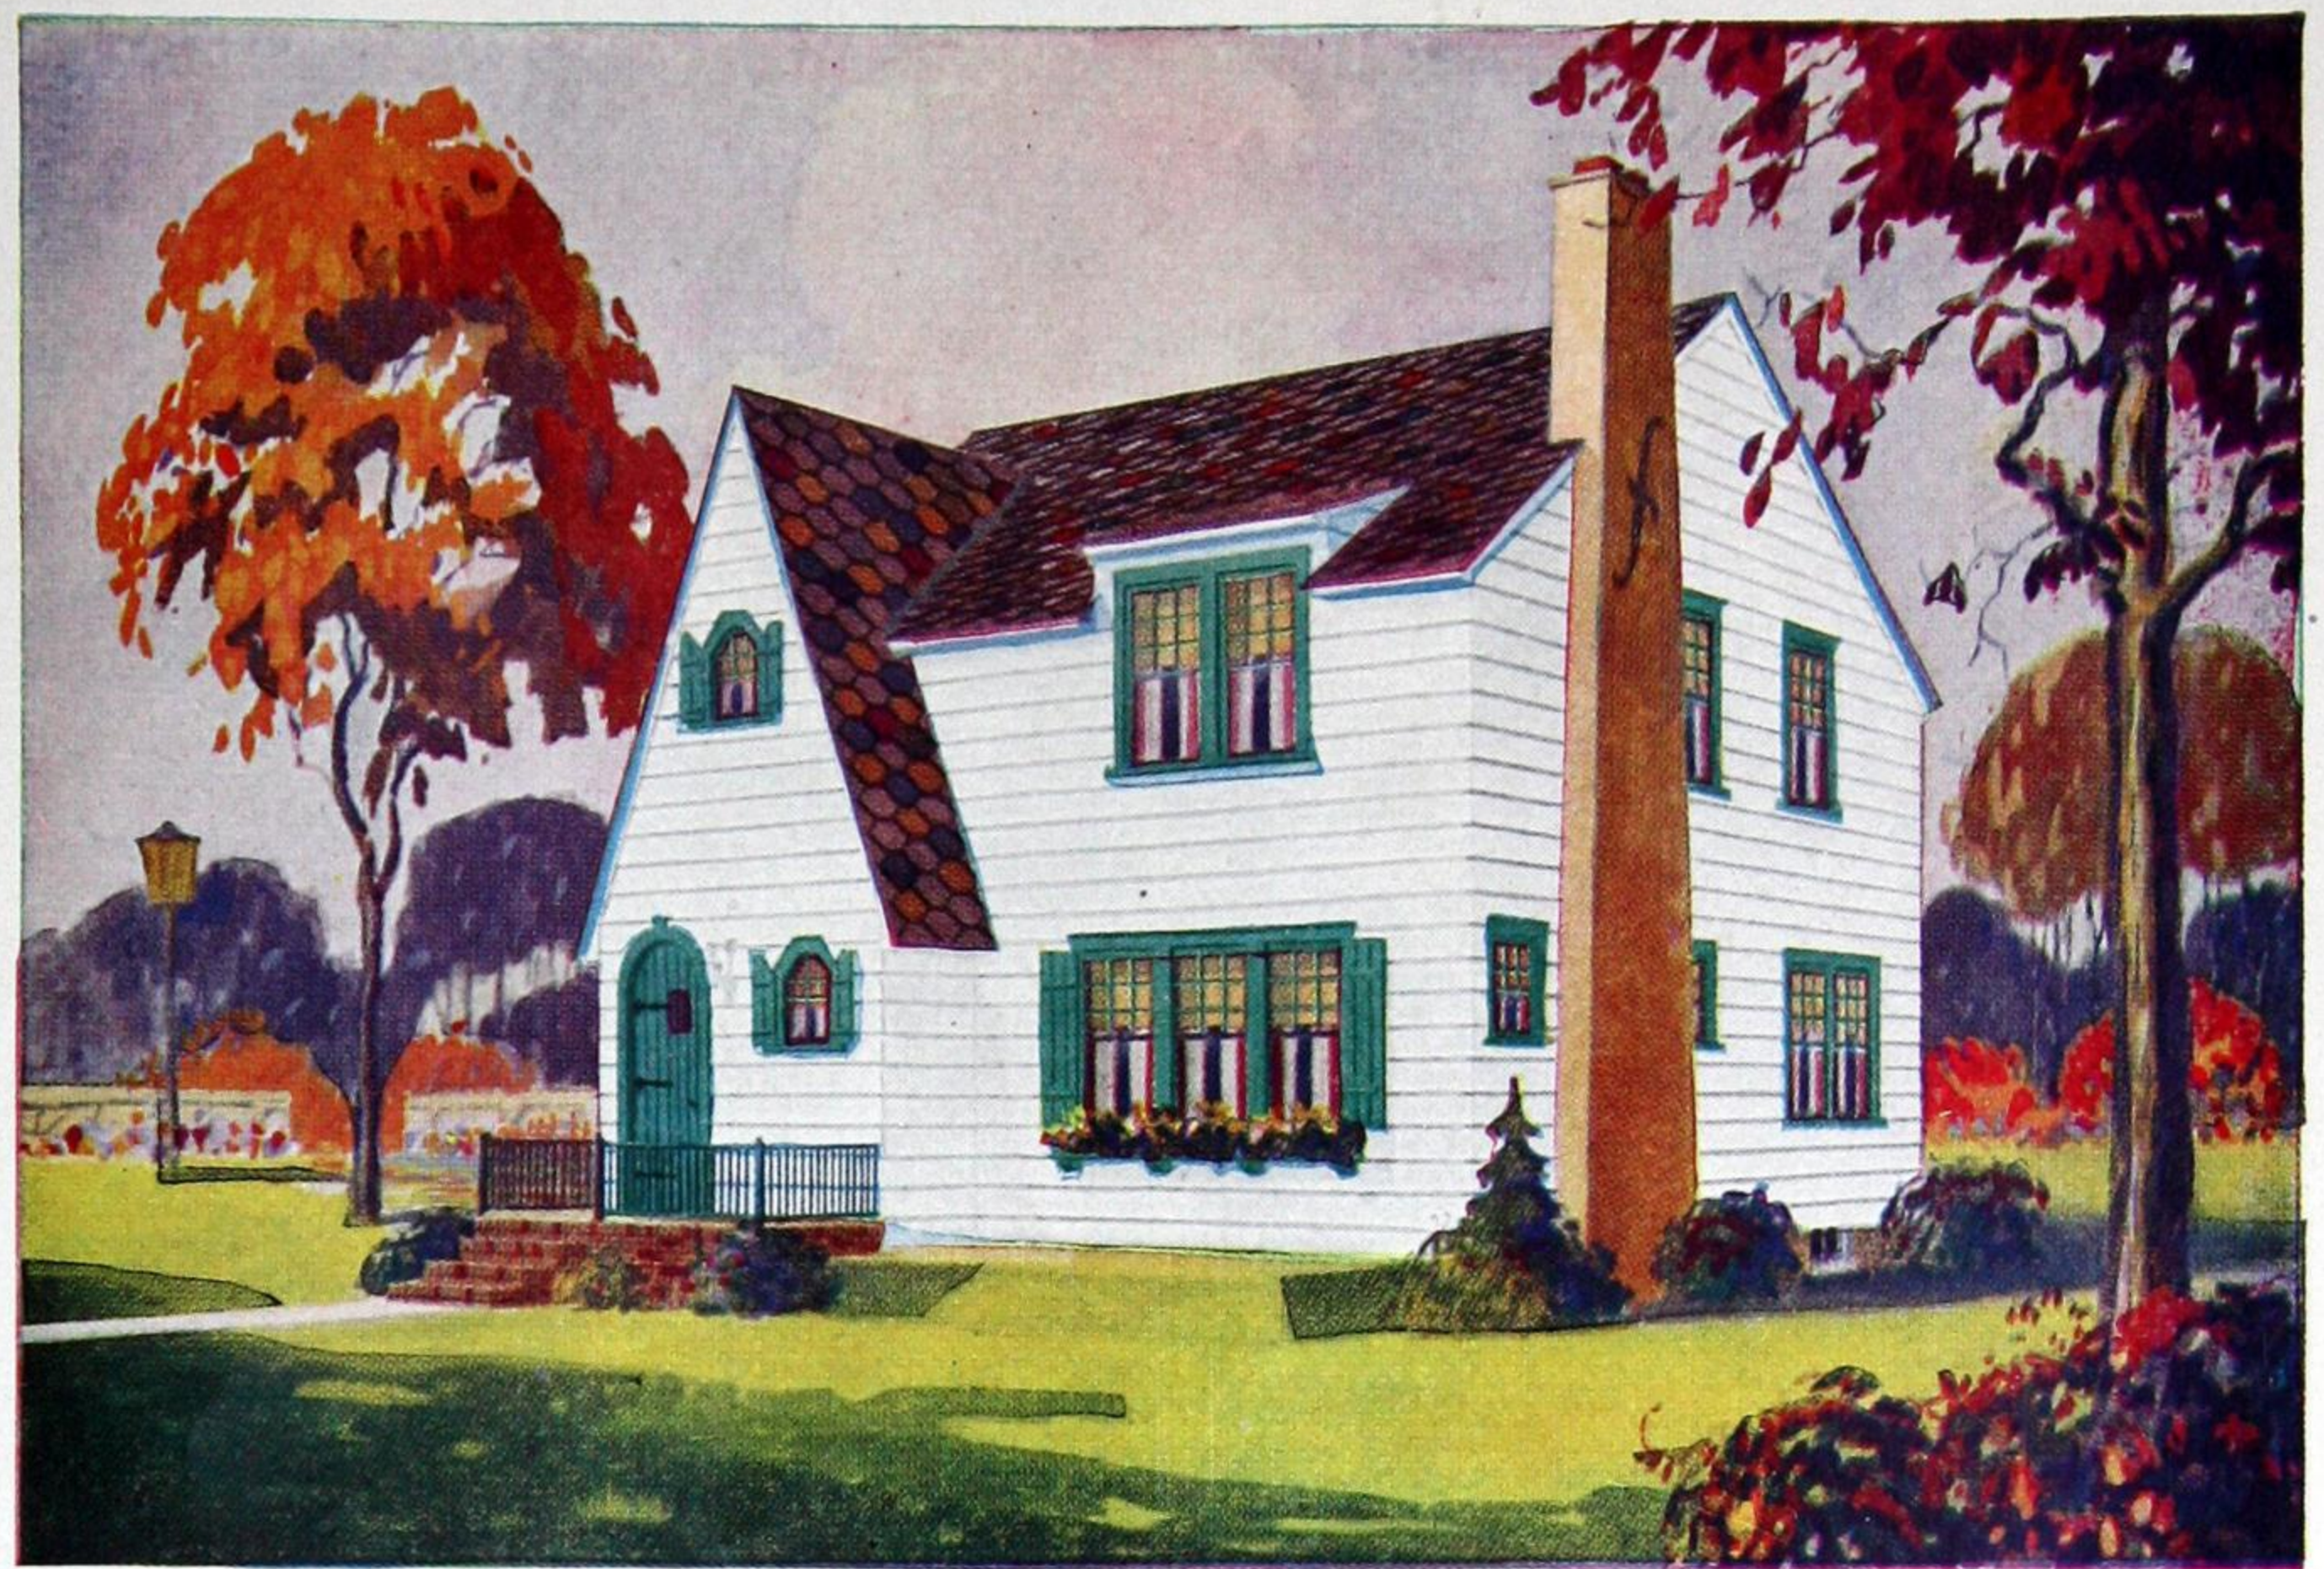

CHATHAM PLAN No. 3

SOVEREIGN SECOND FLOOR

SOVEREIGN FIRST FLOOR

The Sovereign

THE EXTERIOR of the Sovereign is different and most appealing. The graceful sweeping roof gives added charm. The new type front door with its circle top leads into the entrance hall and the main hall. The living room is excellent size with a fine

location for a fireplace. A wide framed opening, or a plastered arch if preferred, leads from the hall into the living room. The dining room is well lighted by mullion windows on two sides. The second floor has three excellent bedrooms all with splendid closet space. The genuine quality of all materials and the staunch construction of your Aladdin Home will be a source of lasting satisfaction.

Garages Priced Remarkably Low

The four Aladdin Garages shown here cover the demand for 95% of all garages built, designed from our many years' experience in manufacturing garages.

Aladdin Garages are staunchly built of sound materials. The lumber is all cut to fit, so that a couple of days' time will erect and FINISH one. These garages are sold only if ordered with an Aladdin Home.

THE FORD, 10' x 18'

The Ford, illustrated at left, size 10 feet by 18 feet, is designed for smaller cars. It is furnished complete with all lumber, cut to fit, hardware, locks, nails, shingles, etc. Paint will be furnished to match the colour of your house.

THE CADILLAC

The Cadillac is an attractive two car garage with four swinging doors. It is size 18 x 18ft., has plenty of room for two large cars. It is attractive in appearance and can be painted, if desired, to match the colour scheme of house.

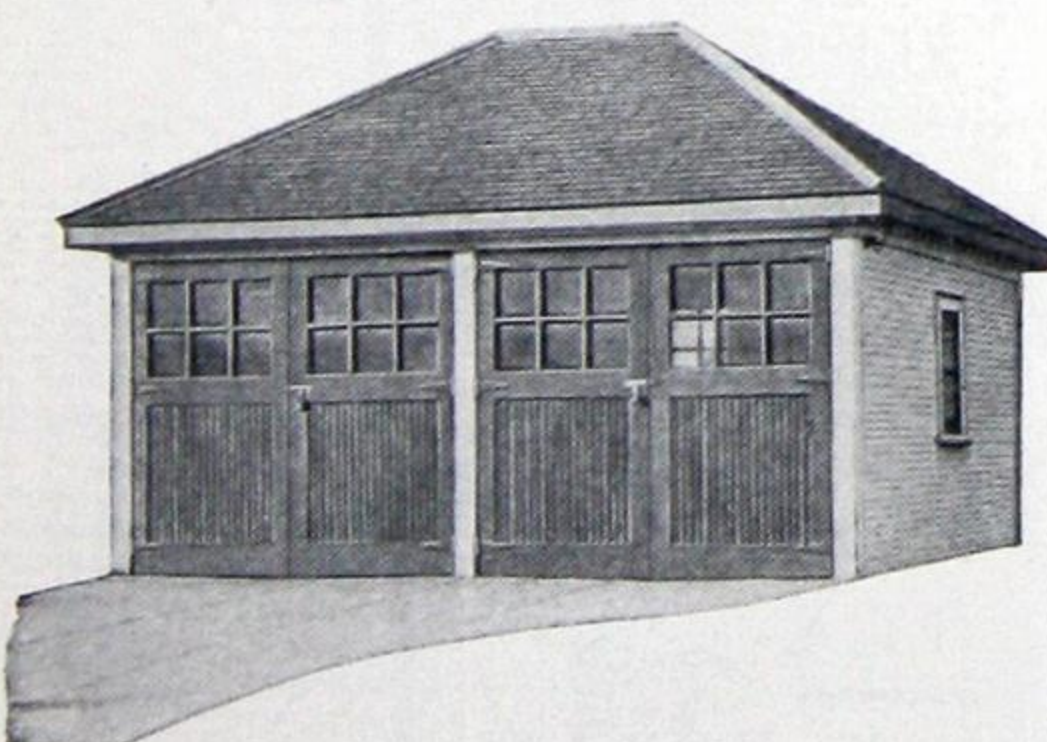

Complete with glass, hardware and paint.

Specifications as follows: Sills 4" x 4"; Studding 2" x 4", 24" centers; Cove siding for side walls; Rafters 2" x 4", 24" on centers; Exposed Eaves. Roof Sheathing, inch lumber laid tight. Best quality asphalt shingles for roof. Hardware, nails and paint. Materials readi-cut and complete blue prints showing every step of erection. All garages shown are furnished without floors as practically all auto owners prefer to build floor of concrete or cinders.

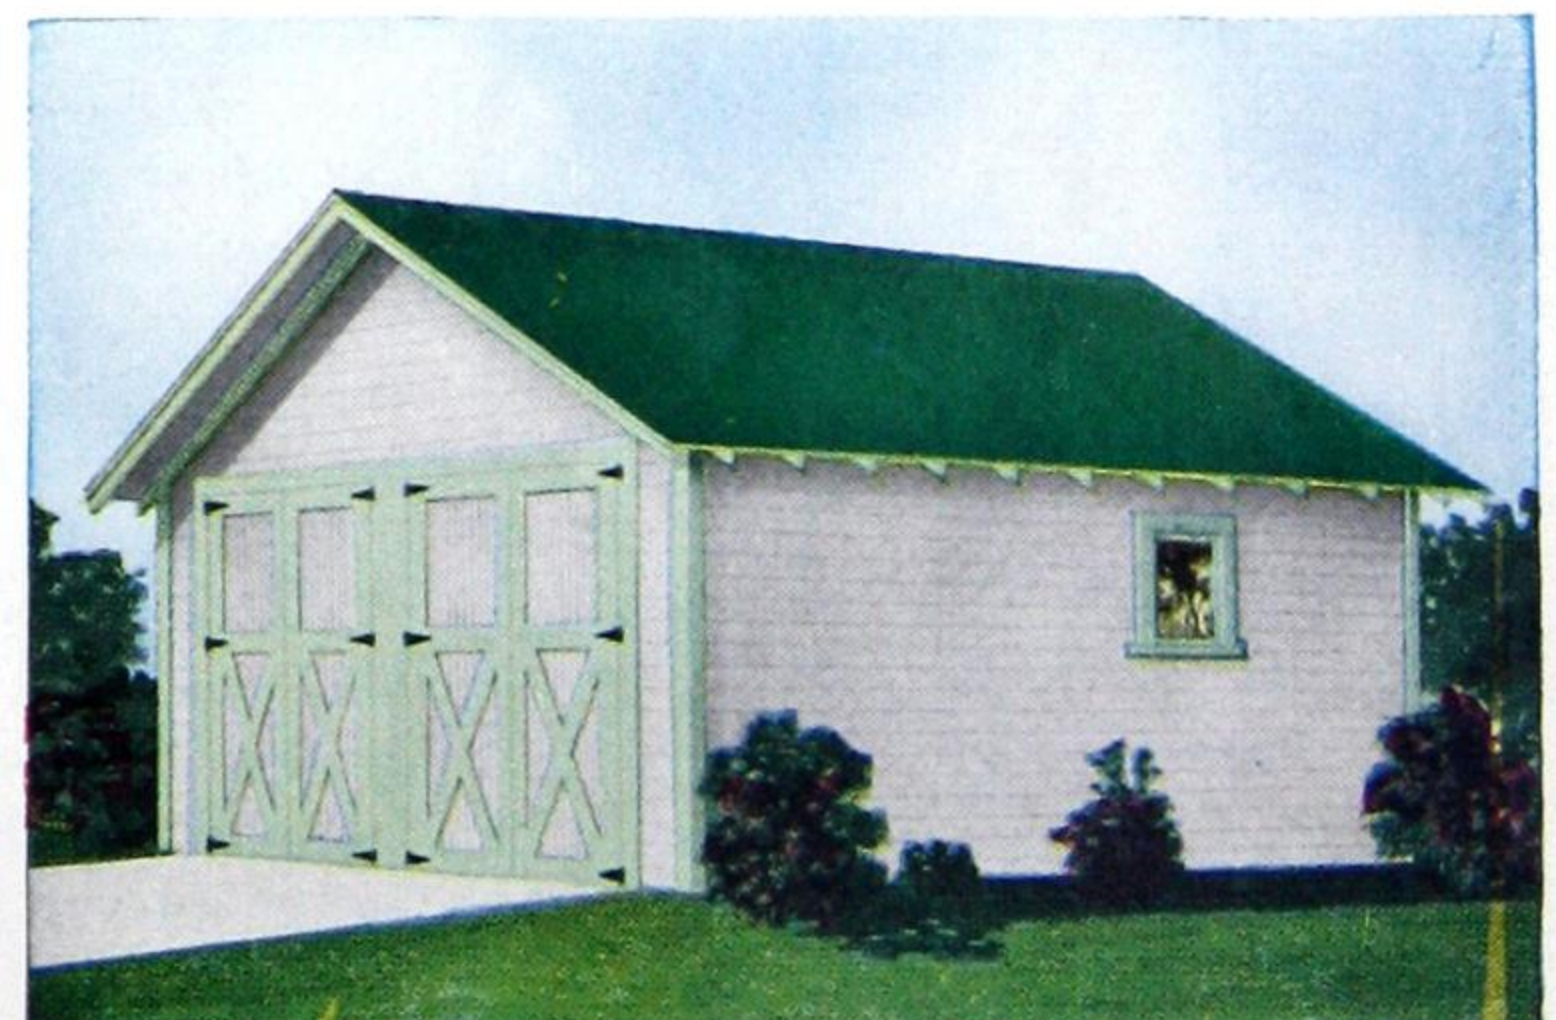

THE STUDEBAKER

The Studebaker, size 12 x 20 feet, will take a large car, with ample room at sides for working about the car, also storage space for supplies. It has swinging doors. It is of a splendid type and always looks well wherever it may be erected. Paint to match your house.

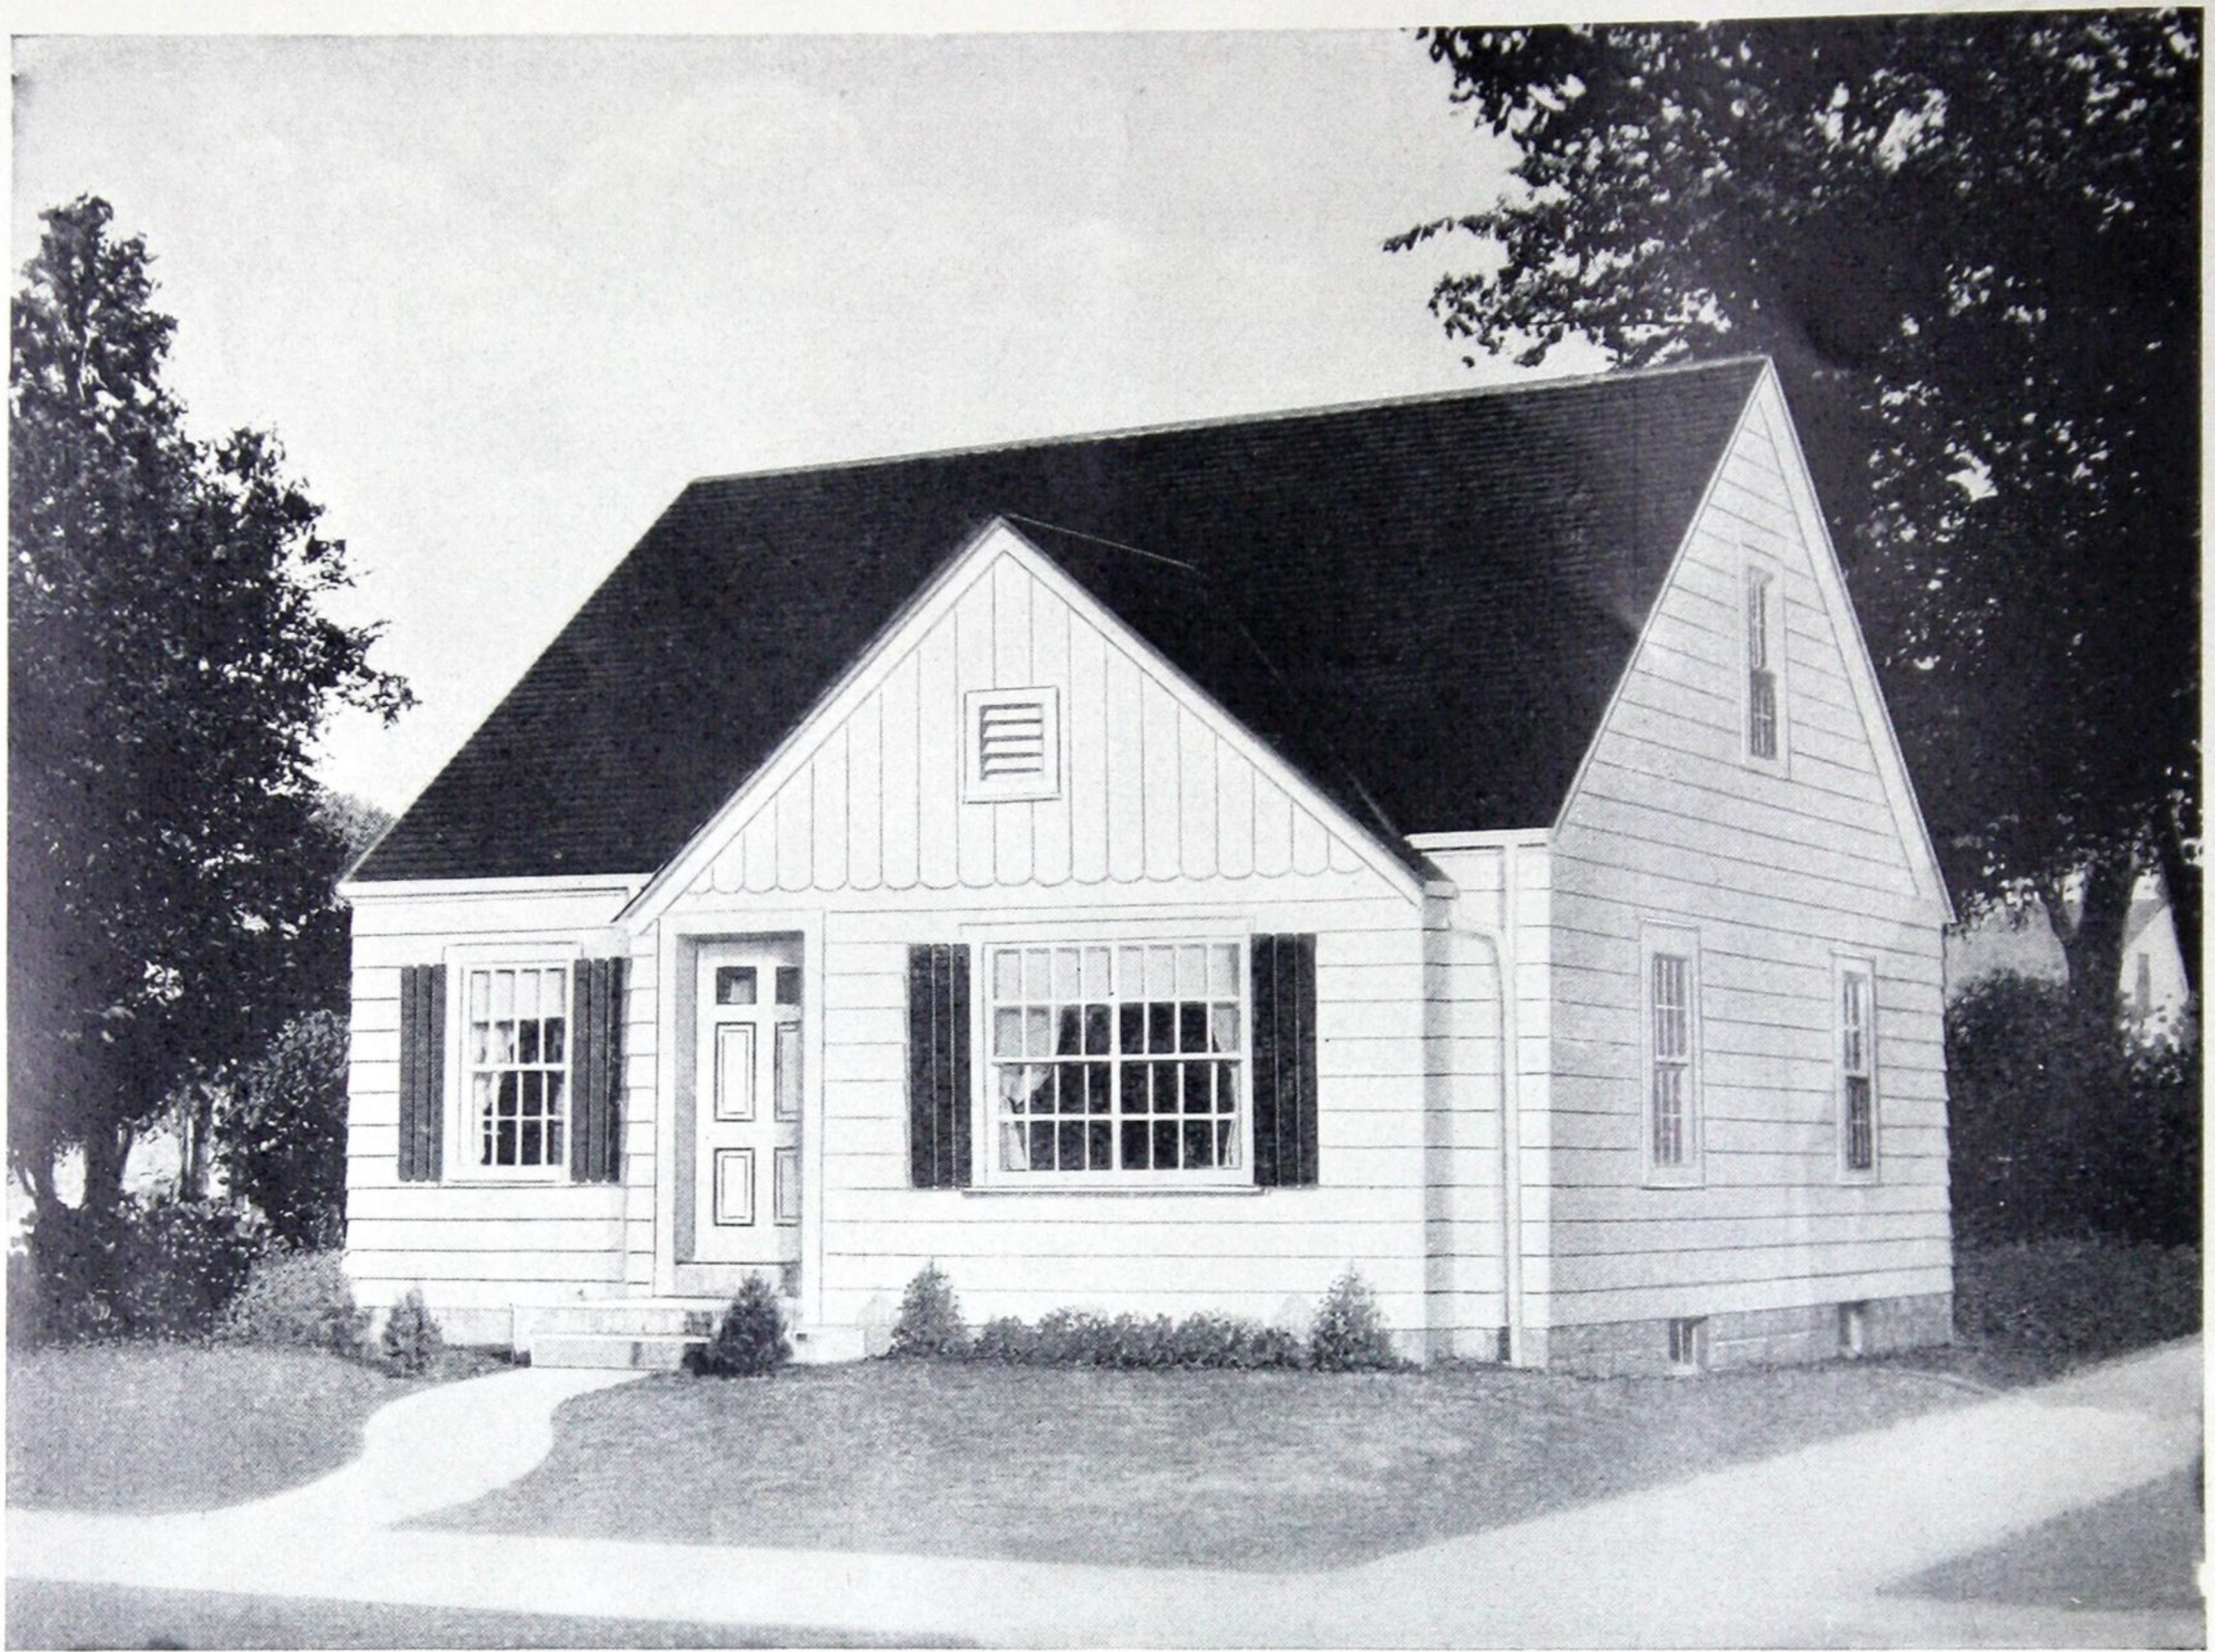

THE FRANKLIN

Distinctive and attractive, the Franklin, size 20 x 20 ft., two car garage will do credit to any surroundings. It is furnished with siding which can be painted to match colour scheme of home. Four swinging doors are provided.

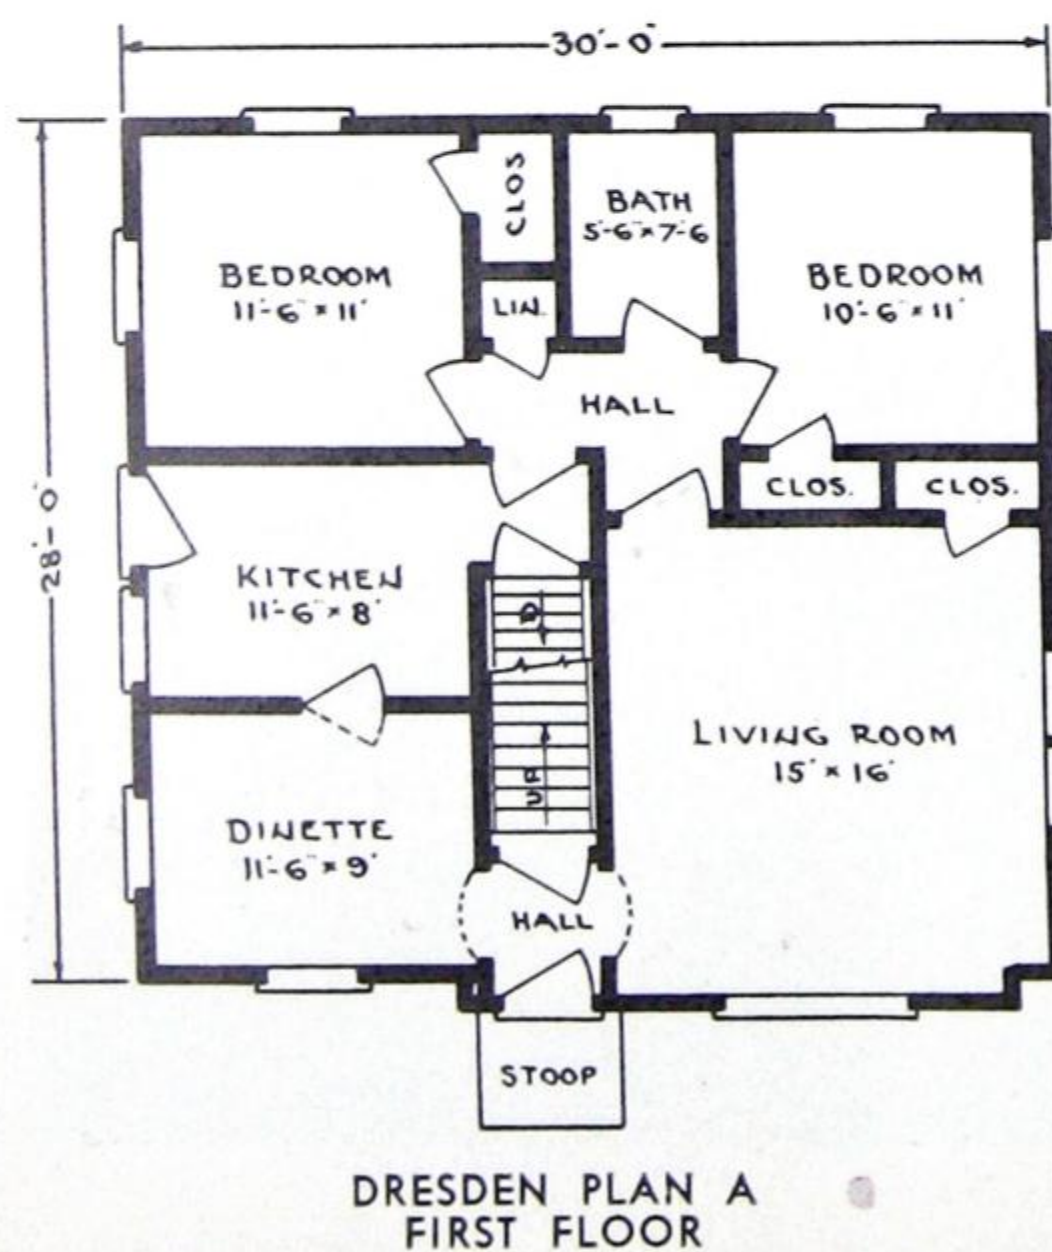

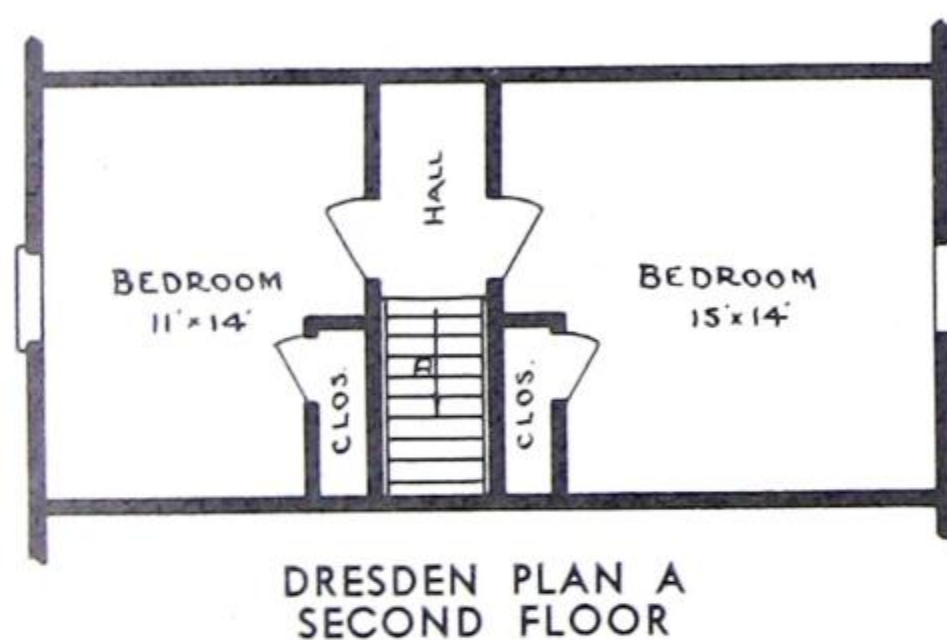

An Appealing Design with Two Fine Floor Plans

The Freight

The Dresden

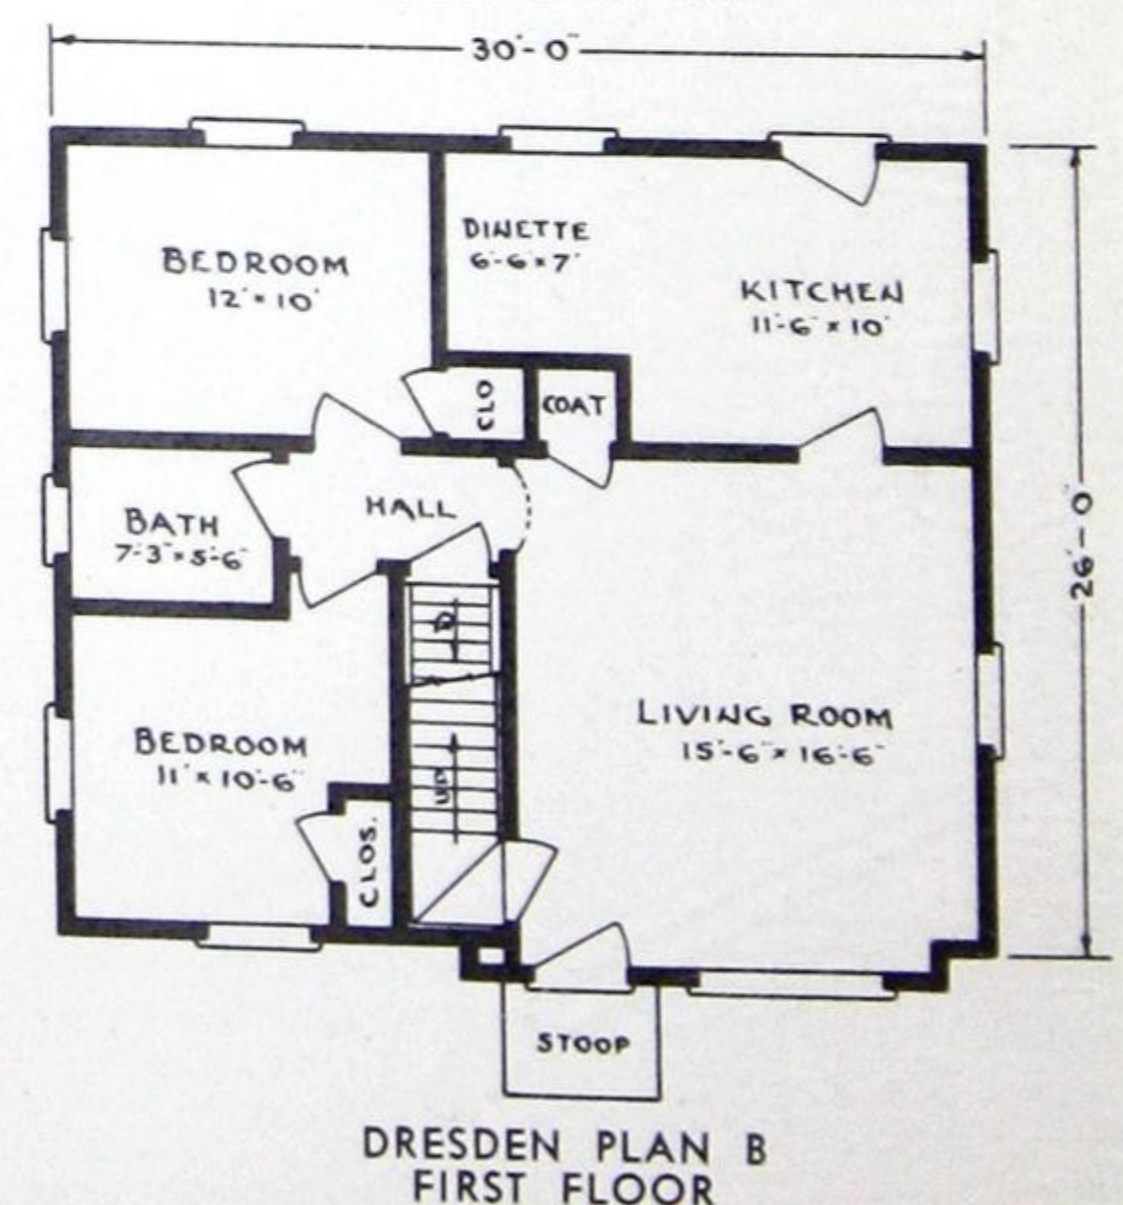

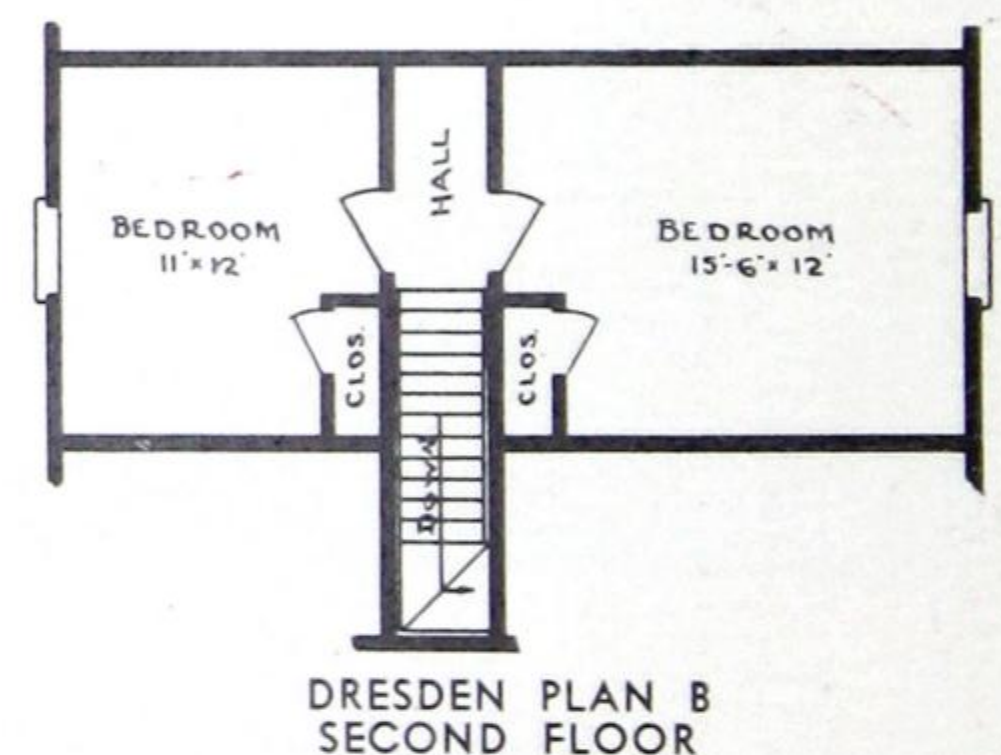

Price Given On
Enclosed Price List

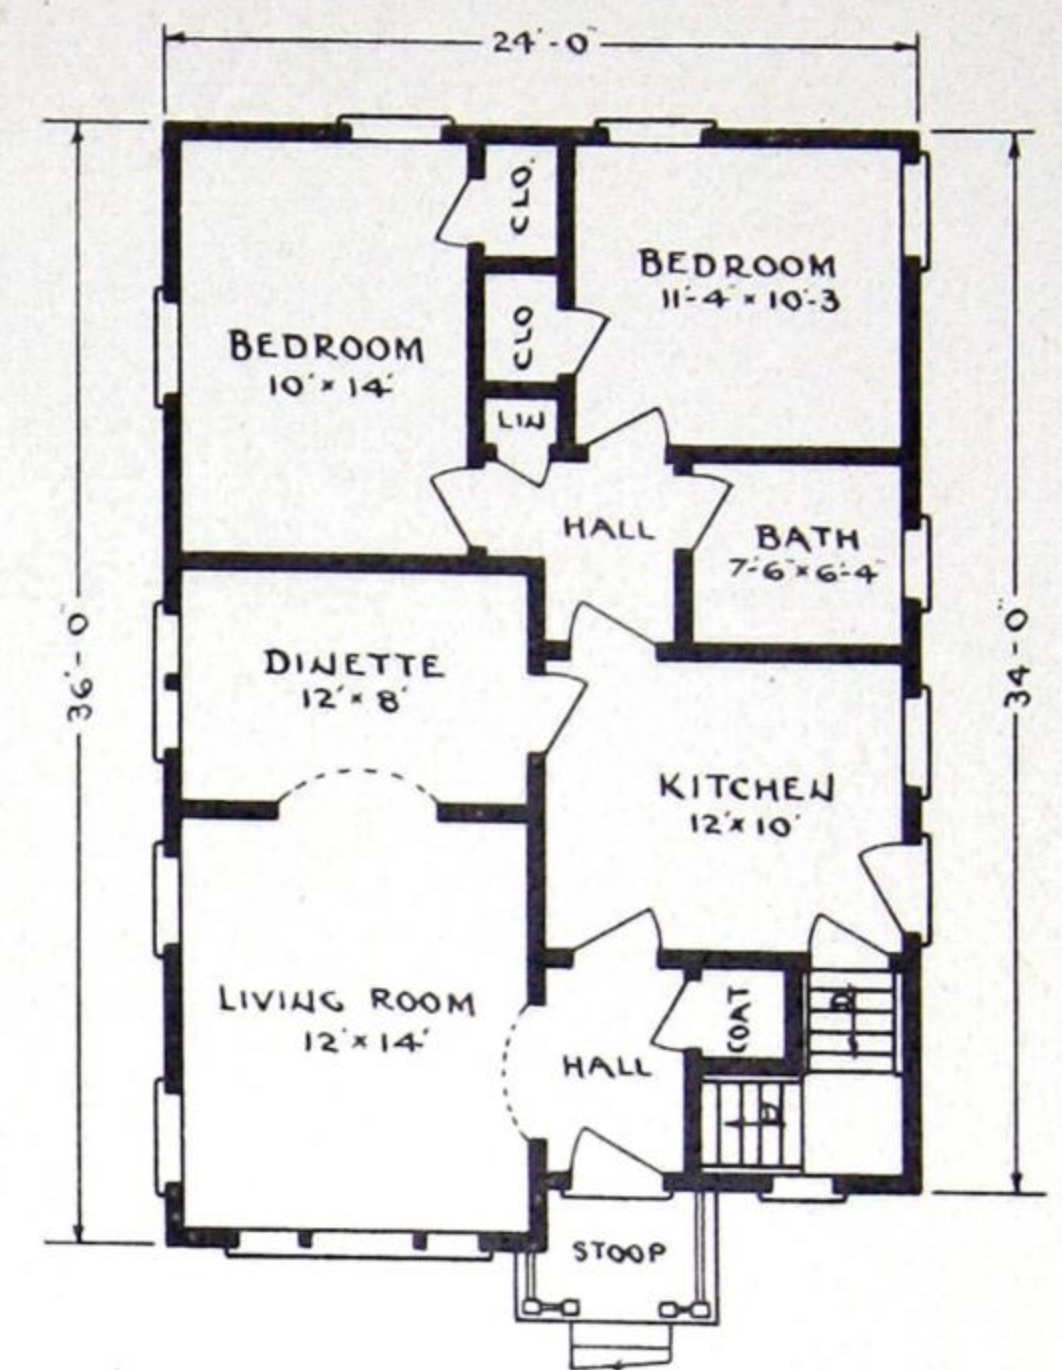

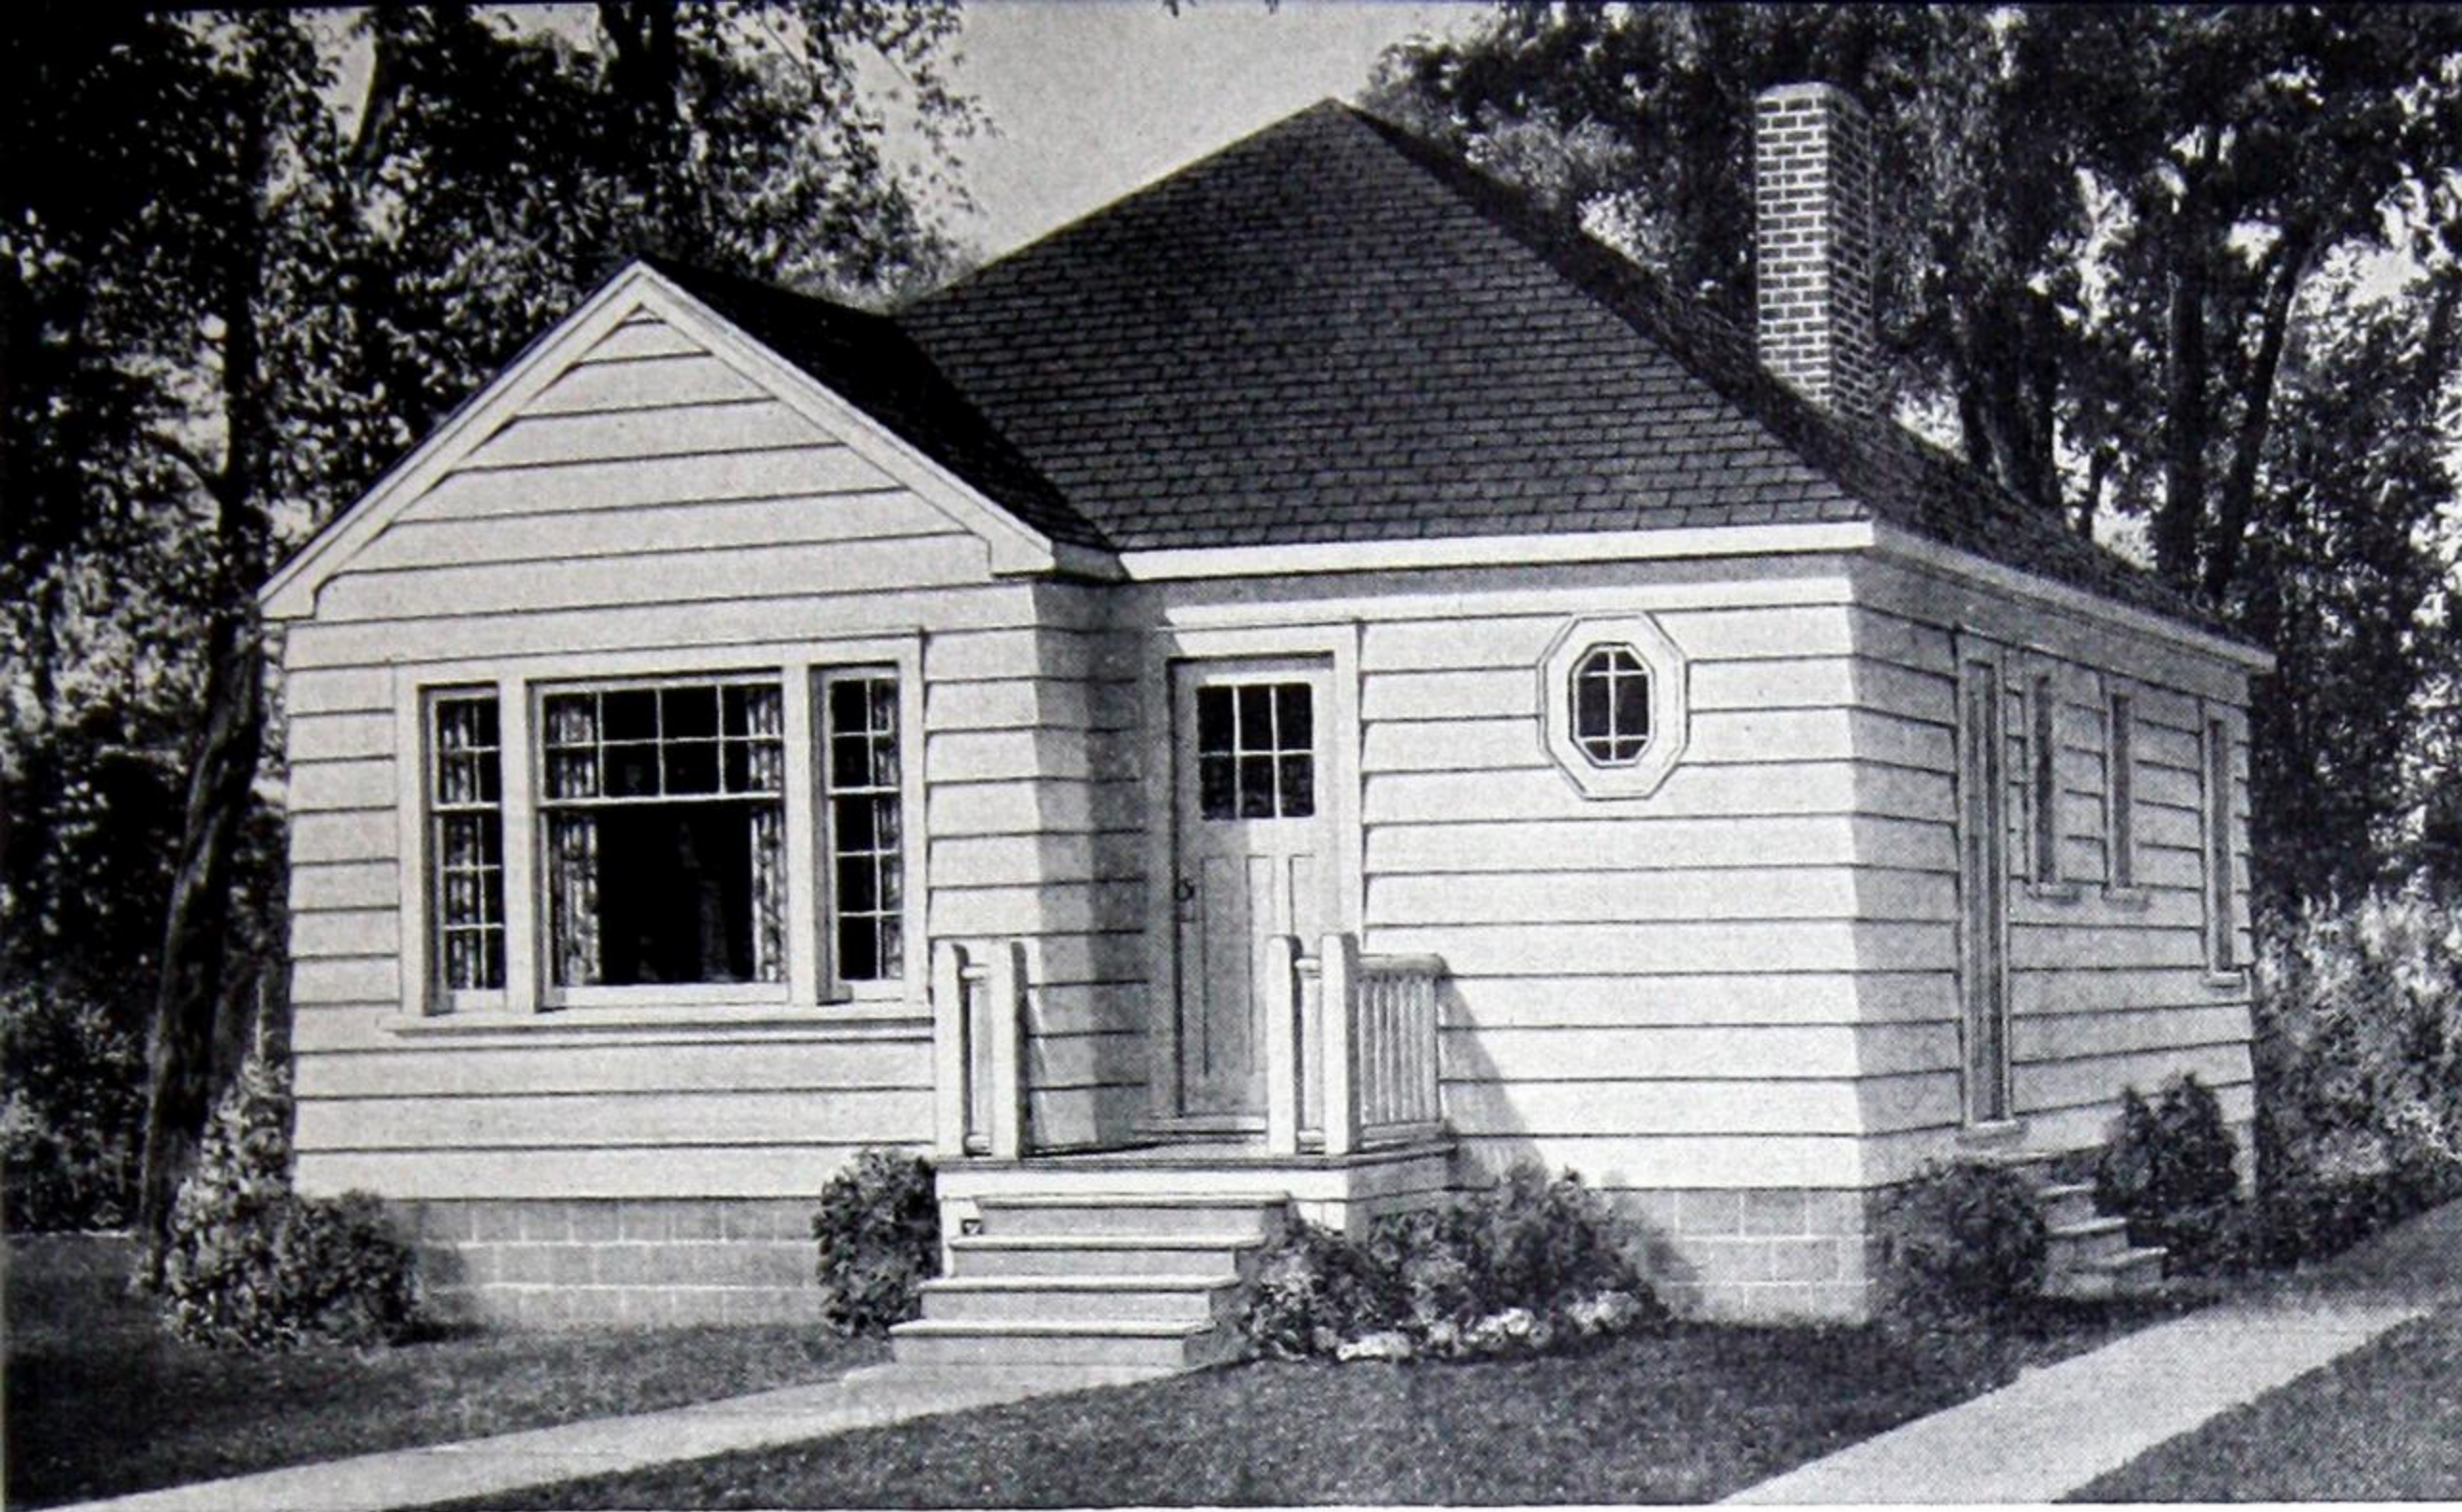

MODERN architecture and skilful interior designing distinguish the Dresden. Note that in both plans each room downstairs has cross ventilation providing the maximum amount of light and air. The attractive front elevation is balanced by the trim shutters at the windows. Plan A is 30 feet by 28 feet in size and Plan B is 30 feet by 26 feet in size.

The second floor is closed off from the first floor by a door at the bottom of the stairway. The stairway and the door at the bottom of the stairway are included in the standard price but the sub-flooring, hardwood flooring, and other materials for finishing the upstairs space into two bedrooms as shown are quoted separately on the price list. Thus you may include in your order the materials for finishing the upstairs rooms or the upstairs can be left unfinished until later on.

Aladdin furnishes highest quality materials, performs about one-third of the construction labor for you at the factory, and quotes one low price on the entire bill of materials. Buying an Aladdin Home is the safest, easiest and wisest way to build.

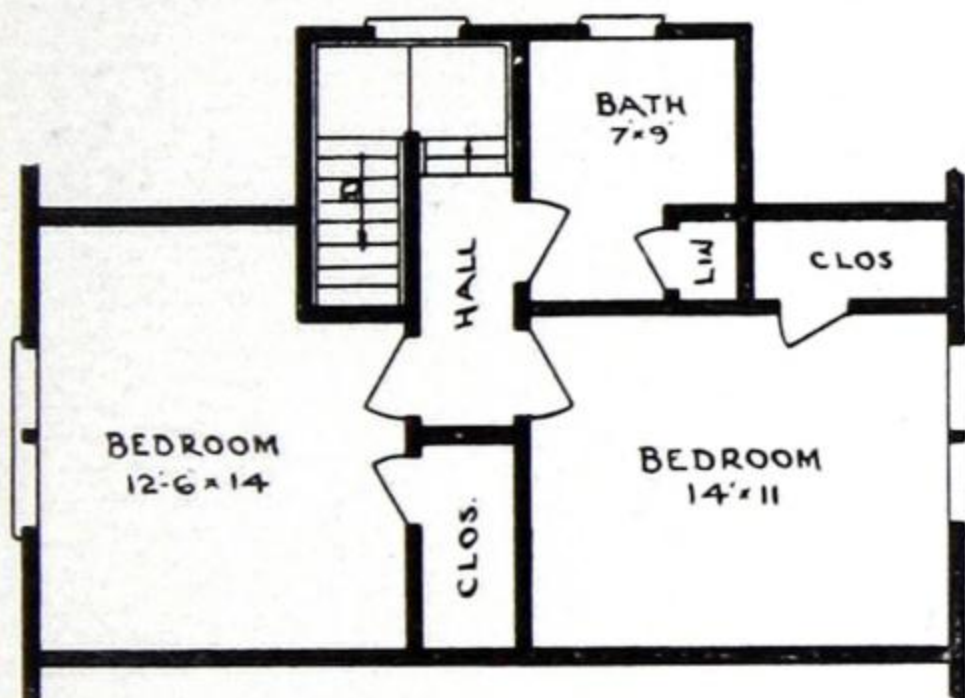

THE PRESCOTT

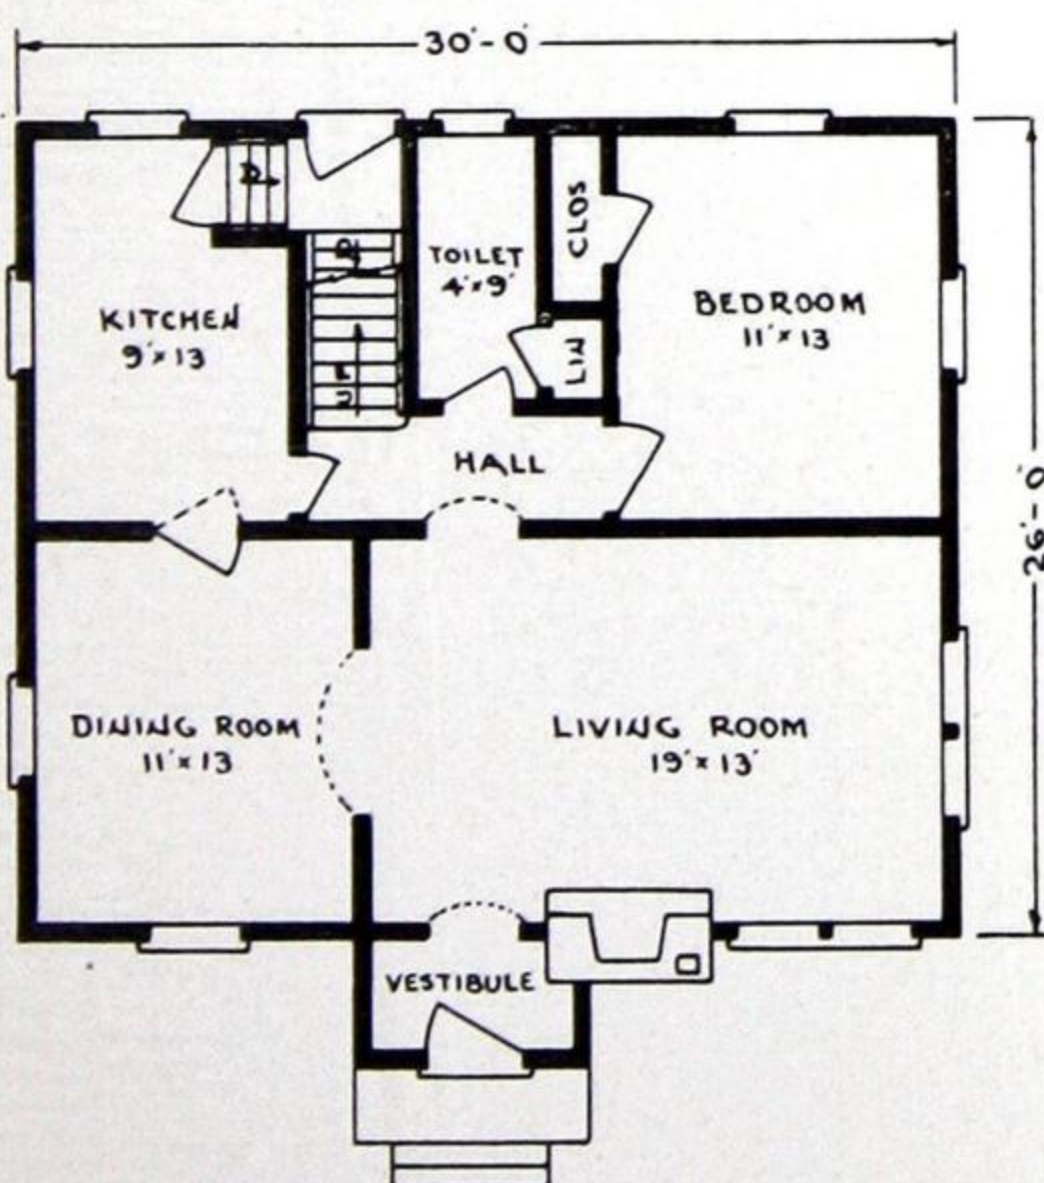

The Prescott

IN the Prescott you have positive proof that comfort, practicability and good taste can be combined in a home of modest cost. The living room has an abundance of light and the archway connecting with the dinette gives it added roominess and brightness. Note how conveniently the bathroom

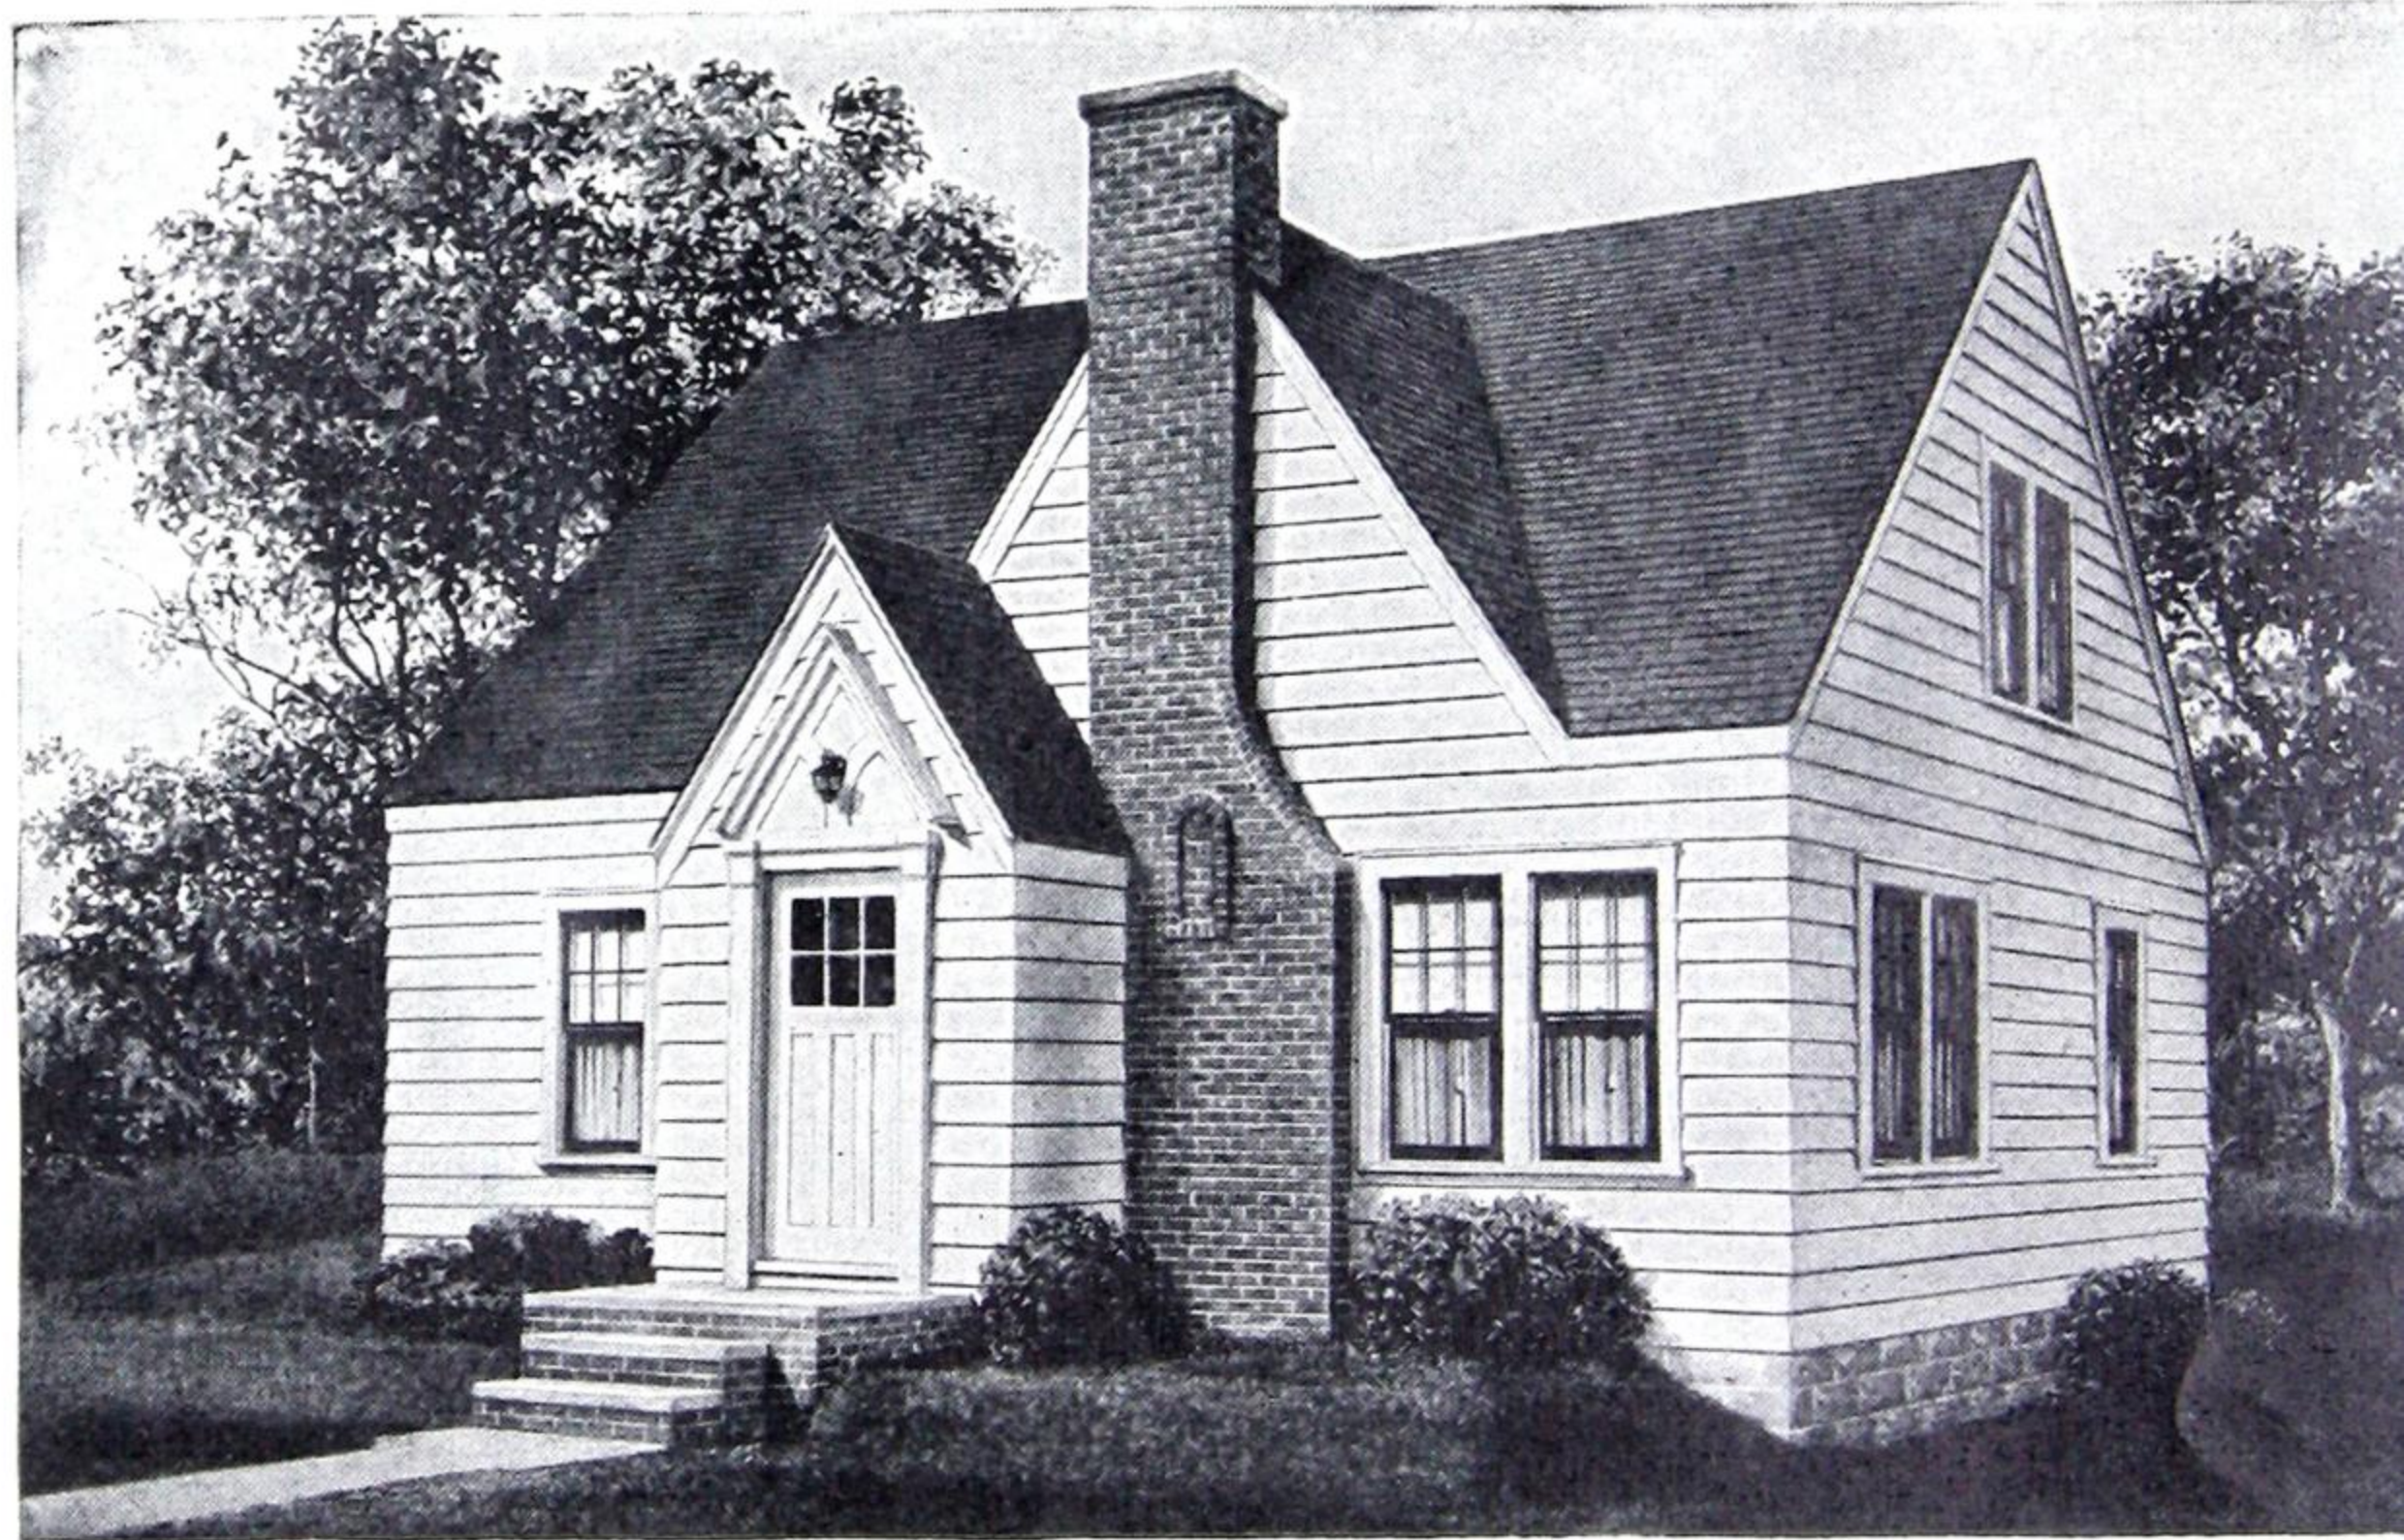

is located to the bedrooms and kitchen. Note also the linen closet opening from the rear hall and the coat closet opening from the front hall. The front porch is a desirable feature of the Prescott. If desired, a fireplace may be placed between the two windows in the side wall of the living room.

VASSAR — SECOND FLOOR

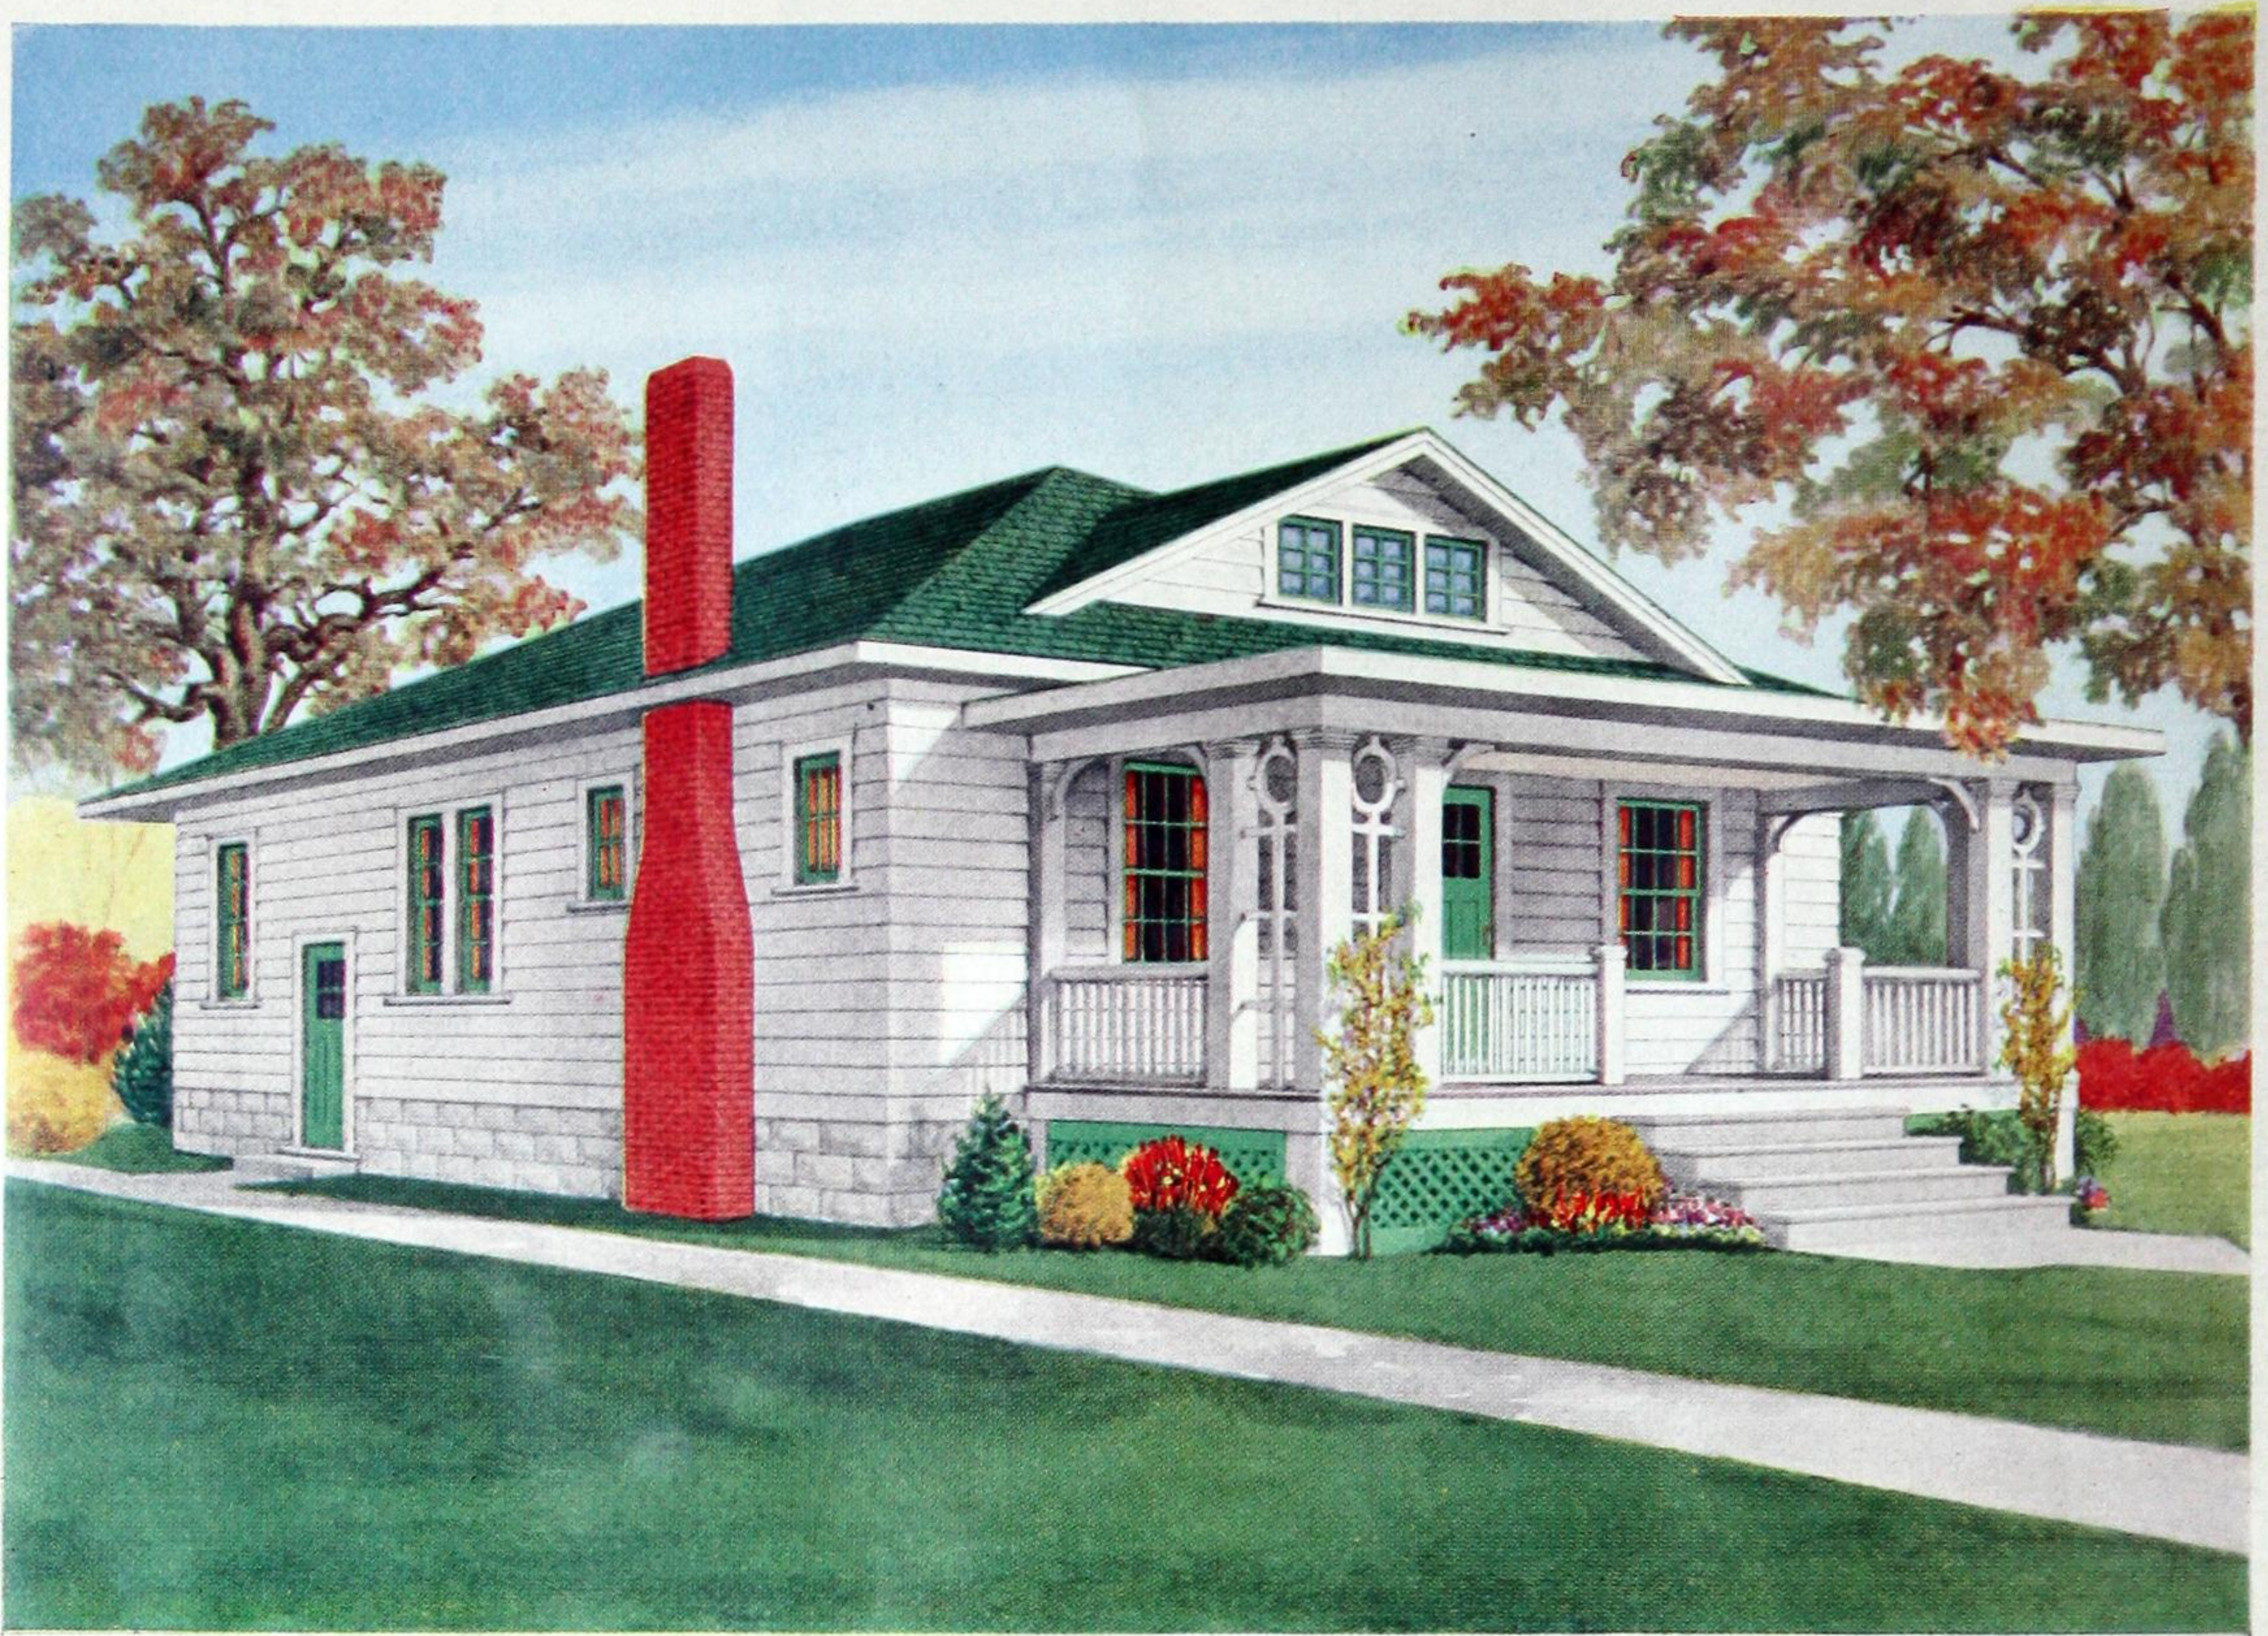

VASSAR — FIRST FLOOR

The Vassar

THE VASSAR is typical of the modern home. It has a perfect combination of unusually attractive exterior and an ideal interior plan. All the facilities for comfortable living are offered at low cost. The fireplace shown in the front may be located elsewhere or omitted entirely if desired. Double windows in the front and side of the living room ensure ample light. The downstairs bedroom of the Vassar is an attractive feature. Upstairs are two bedrooms with spacious and ample closet space. The Vassar is a design that will lend itself well to any surroundings and will prove to be a sound investment in every way.

A Very Popular and Commodious Bungalow

THE WABASH is very popular because of its practical and convenient interior arrangement and attractive roof lines. Plan No. 1 is 26 feet by 36 feet in size with a verandah 20 feet by 8 feet. Plan No. 2 is 22 feet by 30 feet with a verandah 18 feet by 8 feet. With both plans the verandah is priced separately so that it can be included or not.

*Wallboard will be furnished
for the interior of any
Aladdin Home. Ask
for quotation.*

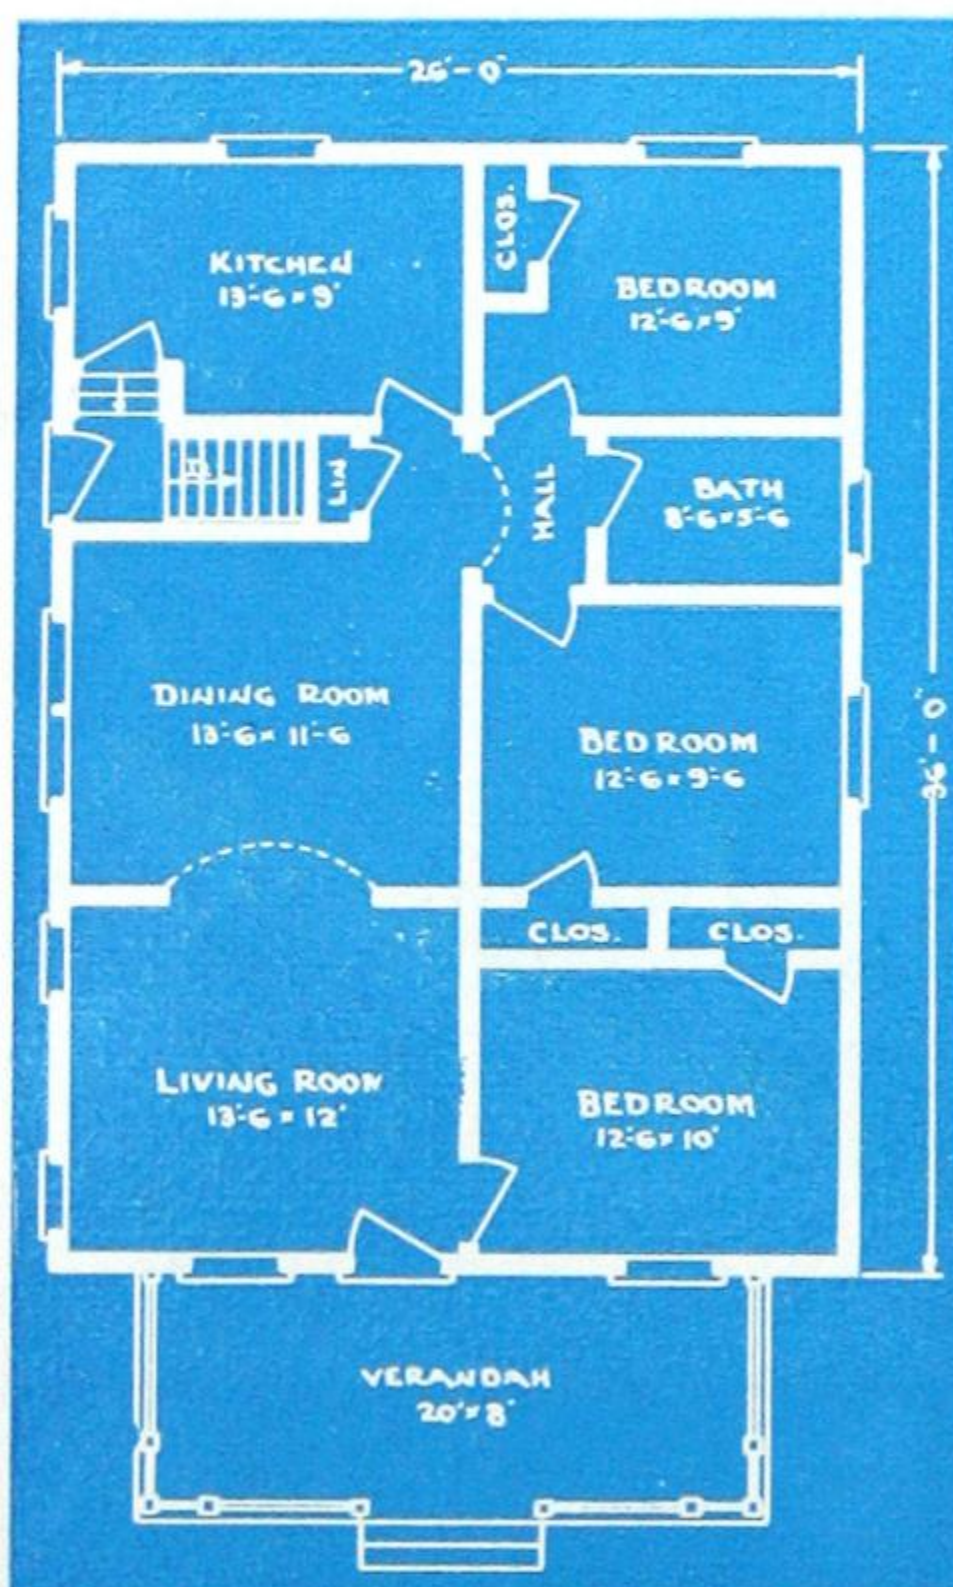

The Aladdin Read- Cut System of home construction is so simple that many of the owners do all of the building themselves without a carpenter. The fact that Aladdin blueprint plans are so complete in every detail makes it possible to build an Aladdin Home without the slightest difficulty and in the shortest possible time. The result is a home that is architecturally correct in every particular and built according to plans which have been tried and proven by hundreds of others, like yourself, who wanted a first quality home at the lowest cost.
